Kriegstein, Henry Kriegstein, 2022-10-04 In terms of quality historical significance and sheer numbers the Kriegstein family's ship model collection in the United States is the finest in private hands anywhere in the world Principally made up of official 17th and 18th century models in the Admiralty or Navy Board style the collection is unrivalled by any museum outside the British national collection at Greenwich As the models are not on public display this book fills the need for a detailed catalogue and visual reference with superb colour photos of all the models both overall portraits and multiple close ups Apart from lengthy descriptions of these magnificent artefacts space is devoted to how they were identified and the valuable research done by Arnold and Henry Kriegstein the identical twins whose shared passion brought this all together Beyond the technicalities of the ships the story has a human dimension in the brothers' adventures in pursuit of every model and their dogged determination to secure them against official obstruction and dubious antiques trade practices This is an entirely new and revised edition of *Seventeenth and Eighteenth Century Ship Models* first published in 2007 now expanded to include the additions to the collection since that date

Steamship Models Edward Keble Chatterton, 1924 [Ships and Ship Models](#), 1938 [Catalogue of Ship Models and Marine Engineering in the South Kensington Museum](#) South Kensington Museum, 1889 **Some Historic Ships and Their Models in the Francis Russell Hart Nautical Museum** James Robertson Jack, 1941 **Ship Alley** Cicely Fox Smith, 1925 Notes on ships and descriptions of life along the water front particularly on the London docks *Monthly Nautical Magazine, and Quarterly Review*, 1855 **Catalogue** Bernard Quaritch (Firm), 1909 [Making Model Ships](#), 1957 *The Ship of the Line* Brian Lavery, 2015-01-14 A beautiful book a goldmine of information to anyone interested in the capital ships of the sailing navy of the 17th and 19th Centuries Ships in Scale The National Maritime Museum in Greenwich houses the largest collection of scale ship models in the world many of which are official contemporary artifacts made by the craftsmen of the navy or the shipbuilders themselves and ranging from the mid seventeenth century to the present day As such they represent a three dimensional archive of unique importance and authority Treated as historical evidence they offer more detail than even the best plans and demonstrate exactly what the ships looked like in a way that even the finest marine painter could not achieve The Ship of the Line is the second of a new series that takes selections of the best models to tell the story of specific ship types in this case the evolution of the ship of the line the capital ship of its day and the epitome of British seapower during its heyday from 1650 1850 This period also coincided with the golden age of ship modelling Each volume depicts a wide range of models all shown in full color including many close up and detail views These are captioned in depth but many are also annotated to focus attention on interesting or unusual features and the book weaves the pictures into an authoritative text producing a unique form of technical history The series is of particular interest to ship modellers but all those with an enthusiasm for the ship design and development in the sailing era will be attracted to the in depth analysis of these beautifully presented books

[Sailing Ships from Plastic Kits](#) Kerry Jang, 2024-10-30 Models of sailing ships with their towering masts and billowing sails have always held a special

fascination for model makers because they capture all the romance of the sea shipboard life and a fighting spirit However many would be modelers are discouraged by the inherent complexity of the subject especially the masts and rigging as well as the often sumptuous decoration Plastic kit manufacturers were quick to capitalize on this interest and produced kits that were advertised as easy and reasonably quick to assemble featuring ready made detail that is easily tackled by modelers of varying skills and ages with the promise of a good result Plastic sailing ship kits are affordable especially in comparison to wooden ship kits and building a fleet of the most famous ships in history is easily achieved Despite their ease of assembly plastic models of sailing ships like the ships themselves remain complicated to build Manufacturers devised several simplifications of the most difficult aspects such as molding the lower upper and topmasts in one piece offering preformed molded plastic shrouds and ratlines or sails in vacuum formed plastic However modelers have long complained that these simplifications the physical limitations of injected plastic moldings and the very medium of styrene plastic itself have resulted in often crudely detailed and unrealistic finished models This book is the remedy It describes and demonstrates techniques unique to plastic sailing ship models that overcome these limitations allowing the construction of authentic and personally satisfying models Each modeler has a different expectation for their model Some will want a simple build with some straightforward refinements whereas others will want a more detailed build that takes advantage of the many new aftermarket items and there are those who seek the most accurate and detailed replica possible Sailing Ships from Plastic Kits aims to give every modeler regardless of skill and experience a range of fundamental and advanced techniques to choose from when transforming a plastic kit into an authentic sailing ship model Heavily illustrated in color throughout this book is an ideal addition to the purchase of any plastic ship kit The American Neptune ,1955 A quarterly journal of maritime history Proceedings of the United States Naval Institute United States Naval Institute,1924
