America's Built Heritage is a comprehensive and eye opening look at the decline of America's built environment Pasquale De Marco weaves together history economics and environmental science to tell the story of how our once great cities and towns have fallen into disrepair The book begins with a look at the early days of American settlement The colonists who arrived in the New World found a land of abundance but they also faced a number of challenges The climate was harsh the land was difficult to farm and there were few roads or other means of transportation Despite these challenges the colonists persevered and they built a new nation that was the envy of the world In the 19th century America experienced a period of rapid industrialization The country's population grew rapidly and cities sprang up all over the country The Industrial Revolution also brought with it a number of environmental problems such as air pollution water pollution and deforestation In the 20th century America continued to grow and prosper However the country also faced a number of new challenges such as the Great Depression and the Cold War These challenges put a strain on the country's infrastructure and many cities and towns began to decline In recent decades the decline of America's built environment has accelerated The country's infrastructure is aging and crumbling and many cities and towns are struggling to keep up with the demands of a growing population The environmental problems that began in the 19th century have also continued to worsen and they now pose a serious threat to the health and well being of Americans Pasquale De Marco argues that the decline of America's built environment is a serious problem that needs to be addressed He calls for a renewed commitment to investing in our infrastructure and protecting our environment He also urges Americans to change their lifestyles and reduce their consumption of resources
