New Millennium Writings Spring And Summer 1997:

Environmentalism for a New Millennium Leslie Paul Thiele, 1999 The vast majority of people in the industrialized world consider themselves environmentalists Yet environmental problems continue to worsen While the environmental movement is winning the battle for the hearts and minds of citizens in the United States and across the globe it may be losing the war to preserve the health of the planet and its biological diversity The reasons become clear in this book Leslie Paul Thiele provides a much needed analysis of the driving forces within the environmental movement and the key challenges that it faces He begins with a concise history of the movement in the United States where he identifies four successive waves of environmental thought and action The first wave conservation emerged in the mid 1800s and focused on the responsible use of natural resources and the preservation of isolated tracts of wilderness By the 1960s the general public had become aware of the widespread impact of environmental problems on human health and welfare A concern for the containment of industrial society's environmental degradation emerged This second wave was followed by a period of co-optation beginning in the 1980s as a now popular social movement made a significant impact on public policy and witnessed the dilution of its goals Thiele largely focuses on the fourth and current wave of coevolution Coevolutionary thought and action is grounded in the interdependence of humans and nature in a global context With the goal of sustainable development in mind contemporary environmentalists argue that human livelihoods must be integrated into complex and evolving ecological systems This affirmation of coevolutionary interdependence has brought coherence to an inherently diverse social movement Through extensive interviews and a critical study of environmental publications and scholarly research the author provides an inside look at the environmental movement His analysis illuminates the social economic political and cultural forces that shape the environmental movement today and set its trajectory for the 21st century Anyone interested the future of environmentalism will find this book an invaluable guide [Ibss: Political Science: 1997](#) British Library of Political and Economic Science, 1999-01-14 Provides an unrivalled overview of intellectual development in political science **The Writers Directory**, 2013 **Progressive Library Organizations** Alfred Kagan, 2015-03-27 This work presents the history and impact of the seven most important progressive library organizations worldwide in Austria Germany South Africa Sweden United Kingdom and two in the United States Each organization is considered within its national context and in fact the English word organization does not quite fit the nature of all of the groups The South African organization LIWO was transitional in that it helped bring South African librarianship from apartheid to majority rule and then disbanded The other organizations or their successors are still working in one form or another Some of the organizations have had or continue to have vibrant local chapters though many of the original activists have recently retired or died The author has interviewed many of them at a time when they were assessing their life work and handing off to new generations *Musicological Identities* Jacqueline Warwick, 2017-07-05 No music scholar has made as profound an impact on contemporary thought as

Susan McClary a central figure in what has been termed the new musicology In this volume seventeen distinguished scholars pay tribute to her work with essays addressing three approaches to music that have characterized her own writings reassessing music's role in identity formation particularly regarding gender sexuality and race exploring music's capacity to define and regulate perceptions and experiences of time and advancing new modes of analysis more appropriate to those aspects and modes of musicking ignored by traditional methods Contributors include in overlapping categories many fellow pioneers current colleagues and former students and their essays like McClary's own work address a wide range of repertoires ranging from the established canon to a variety of popular genres The collection represents the generational arrival of the new musicology into full maturity dividing fairly evenly between pre eminent scholars of music and a group of younger scholars who have already made their mark in significant ways But the collection is also and fundamentally interdisciplinary in nature in active conversation with such fields as history anthropology philosophy aesthetics media studies film music studies dramatic criticism women's studies and cultural studies
