The book identifies processes that nurture and sustain strong bonds in couples, dual earner, divorced, single parent, and remarried families, gay and lesbian families, and adoptive and kinship care families. It discusses how families are influenced by social and economic constraints, changing gender norms, immigration experiences, and spirituality. It examines the multigenerational family life cycle and describes key family processes for coping and resilience with attention to the normative strains of childrearing as well as major stressors such as trauma, loss, and chronic illness or disability. Rounding out the volume, the final section reviews the state of the science of family assessment and probes genetic and neurobiological interactions with family processes.
