Pacific Rim Development Integration And Globalisation In The Asiapacific Economy:

Pacific Rim Development Peter James Rimmer, Australian National University. Dept. of International Relations, 1997
This volume critically examines a number of the key propositions which have emerged from the growing literature on the relationships between economics and security Much of this literature derives from Europe or the US and its relevance to the dynamic Asia Pacific region which is the geographical focus of this study is contested BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved Globalisation and the Asia-Pacific Peter Dicken, Philip F. Kelly, Lily Kong, Kris Olds, Henry Wai-chung Yeung, 2005-06-27 Most books that analyse the crucial subject of globalisation only look at it from a western perspective This is the first detailed study to look at globalisation specifically in the Asia Pacific region An impressive collection of leading interdisciplinary scholars explore various dimensions of globalisation and their relationship to development processes in the region *Regional Change in Industrializing Asia* Leo van Grunsven, 2019-01-04 First published in 1998 this book responds to the dynamics of Industrializing Asia and the behavioural changes of actors which in response to changing internal and external forces have given rise to and are constantly giving rise to alterations in patterns of growth From a geographical perspective these are expressed in regional change understood as a reconstruction of spatial organization The imperatives of dynamic comparative advantage changing global or regional competitiveness and regional competition faced by different actors entities or territorial units can be identified as important forces underlying and shaping regional change This volume provides further illumination contextualization and interpretation of the spatiality of the economic reality in Industrializing Asia as well as the role played by and the implications for different actors The objectives of this book are 1 to outline the processes of regional change linked to responses in the form of restructuring and integrative and regionalization tendencies as well as the realignment of the global regional local divide in production systems complexes and the operation of firms associated with reorganization of production in the process of maintaining and reconfiguring comparative advantage 2 to highlight the wide scope of the process by considering differential units of analysis linked to the agents and manifestations of regional change and the role of scale in terms of the spatial units involved 3 to highlight the implications as to the current and future position or role of differential actors agents particularly nation state in shaping the new economic reality in the region and as a corollary its positioning in the global economic order

Migration, Globalisation and Human Security David T. Graham, Nana K. Poku, 2005-08-04 Migration Globalisation and Human Security looks at a range of security and human security issues related to the displacement of civilian populations and shows how the tenuous existence of migrants can lead to a myriad of human security threats Providing major theoretical analyses of recent migration trends and in depth case studies this book shows that a redefinition of the notion of human security is now needed *The Globalisation of the Oceans* Frank Broeze, 2017-10-18 This book maintains that container shipping is vital to the actualisation of globalisation and that without it globalisation would remain a concept rather

than reality It argues that container shipping has been academically overlooked as a global business sector in favour of more prominent sectors such as oil or arms trade and aims to provide a complete history of containerisation from the 1950s to the turn of the millennium This history explores the growth of the container industry due to prominent innovation in vessel design early adoption of the internet large international mergers and significant physical alterations to the global port system With particular emphasis on the east west trade the chapters cover the growth and development of the container industry to the social changes experienced by seafaring labour forces the cultural impact of the container bringing a domineering land presence to maritime activity through to the environmental concerns surrounding the industry The study is not a quantitative economic analysis of the industry rather an updated history that strives to demonstrate the importance of transport infrastructures to any consideration of global business sectors by providing evidence of the container industry s stimulation of the global economy
