Early Detection and Management of Cerebral Palsy H. Galjaard, H.F.R. Prechtl, M. Velickovic, 2012-12-06 At the end of September 1984 Dr M Velickovi and Prof H Prechtl with the help of the International Cerebral Palsy Society organized an international conference on New developments in the assessment of early brain damage in Bled Yugoslavia I was invited as a speaker at this conference and I went there curious but without too much knowledge about the central theme cerebral palsy During the conference and a satellite meeting I became impressed by the quality of various contributions and also by the great variety of problems related to the etiology early diagnosis management and psychosocial aspects of cerebral palsy Today in many areas of biology and medicine progress seems to require concentration on a very narrow field As a consequence many conferences are highly specialized and most young scientists rightly consider this as most useful for their own work On the other hand the care of patients and counselling of parents and other close relatives require a multidisciplinary approach Also advances in the study of complicated unresolved medical biological problems are often made unexpectedly by using ideas theories approaches or methods from other disciplines
