The Origins of the Irish J. P. Mallory, 2013-04-01 An essential new history of ancient Ireland and the Irish written as an engrossing detective story About eighty million people today can trace their descent back to the occupants of Ireland But where did the occupants of the island themselves come from and what do we even mean by Irish in the first place This is the first major attempt to deal with the

core issues of how the Irish came into being J P Mallory emphasizes that the Irish did not have a single origin but are a product of multiple influences that can only be tracked by employing the disciplines of archaeology genetics geology linguistics and mythology Beginning with the collision that fused the two halves of Ireland together the book traces Ireland's long journey through space and time to become an island The origins of its first farmers and their monumental impact on the island is followed by an exploration of how metallurgists in copper bronze and iron brought Ireland into increasingly wider orbits of European culture Assessments of traditional explanations of Irish origins are combined with the very latest genetic research into the biological origins of the Irish

The Iron Age Round-House D. W. Harding, 2009-11-19 In contrast to Continental Europe

where the Iron Age is abundantly represented by funerary remains as well as by hill forts and major centres the British Iron Age is mainly represented by its settlement sites and especially by houses of circular ground plan apparently in marked contrast to the Central and Northern European tradition of rectangular houses In lowland Britain the evidence for timber round houses comprises the footprint of post holes or foundation trenches in the Atlantic north and west the remains of monumental stone built houses survive as upstanding ruins testimony to the building skills of Iron Age engineers and masons D W Harding s fully illustrated study explores not just the architectural aspects of round houses but more importantly their role in the social economic and ritual structure of their communities and their significance as symbols of Iron Age society in the face of Romanization
