Coatings and Inks for Food Contact Materials Martin Forrest, 2007-10. This Rapra Review Report *Coatings and Inks for Food Contact Materials* has attempted to cover all of the coatings and inks products used in food contact scenarios. In practice, this encompasses an extremely wide range of polymer systems and formulations and an emphasis has been placed on coatings and inks used in food packaging as this is usually regarded as representing the most important application category with respect to the potential for migration to occur. In addition to a thorough introduction of the polymers and additives that are used to produce coatings and inks, there are also chapters covering the regulation of these materials, the migration and analytical tests that are performed on them to assess their suitability for food contact applications, the migration data that have been published and the areas in the field that are receiving the most attention for research and development. The report is accompanied by around 400 abstracts compiled from the Polymer Library to facilitate further reading on this subject.
