Pakistans Nuclear Development

Paul K. Kerr, Mary Beth Dunham Nikitin

Pakistans Nuclear Development:

Pakistan's Nuclear Development Ashok Kapur, 1987-01-01 *Pakistan's Nuclear Weapons* Bhumitra Chakma, 2012-10-12

Pakistan is a vitally important country in the contemporary global political system. It is a de facto nuclear state and a pivotal country in the War on Terror. This book provides a comprehensive study of a nuclear armed Pakistan investigating the implications of its emergence as a nuclear weapons state. Setting out the historical background of Pakistani nuclear development, the book examines the lessons for proliferation that can be drawn from the Pakistan case. It explains the changes and continuities of Pakistan's nuclear policy, assessing its emerging force posture and the implications for Pakistani, South Asian and global security. It also considers the extent to which Pakistan can be said to have a nuclear doctrine, the Pakistani nuclear command and control system and the relationship between Pakistan and the Non Proliferation regime. Addressing the issue of whether Pakistan should be viewed as a proliferator and the implications of a nuclear Pakistan for global terrorism, *Pakistan's Nuclear Weapons* is an important study of all the major issues surrounding Pakistan's emergence as a nuclear power.

Pakistan's Nuclear Weapons Paul K. Kerr, 2010. Pakistan's nuclear arsenal consists of approx 60 nuclear warheads although it could be larger. Islamabad is producing fissile material, adding to related production facilities and deploying additional delivery vehicles. These steps will enable Pakistan to undertake both quantitative and qualitative improvements to its nuclear arsenal. Islamabad does not have a public detailed nuclear doctrine but its minimum credible deterrent is widely regarded as primarily a deterrent to Indian military action. Contents of this report: Background, Nuclear Weapons, Responding to India, Delivery Vehicles, Nuclear Doctrine, Command and Control, Security Concerns, Proliferation Threat and Pakistan's Response to the Proliferation Threat.

Pakistan's Nuclear Policy Zafar Khan, 2014-07-17. In May 1998, in reaction to India's nuclear weapons tests, Pakistan tested six nuclear weapons. Following this, the country opted for a policy of minimum deterrence and within a year, Pakistan had altered its policy stance by adding the modifier of minimum credible deterrence. This book looks at how this seemingly innocuous shift seriously impacted on Pakistan's nuclear policy direction and whether the concept of minimum has lost its significance in the South Asian region's changed strategic environment. After providing a brief historical background, exploring why and how Pakistan carried out the nuclear development program, the book questions why Pakistan could not sustain the minimum deterrence that it had conceptualized in the immediate aftermath of the 1998 test. It examines the conceptual/theoretical framework of the essentials of minimum deterrence in order to question whether Pakistan's nuclear policy remained consistent with this, as well as to discover the rudimentary factors that are responsible for the inconsistencies with regard to minimum deterrence conceived in this study. The book goes on to look at the policy options that Pakistan had after acquiring the nuclear capability and what the rationale was for selecting minimum deterrence. The book not only highlights Pakistan's deterrent force building but also analyzes closely Pakistan's doctrinal posture of first use option. Furthermore, it examines the policy towards arms control and

disarmament and discusses whether these individual policy orientations are consistent with the minimum deterrence Conceptually providing a deeper understanding of Pakistan's post 1998 nuclear policy this book critically examines whether the minimum deterrence conceived could be sustained both at the theoretical and operational levels It will be a useful contribution in the field of Nuclear Policy Security Studies Asian Politics Proliferation Non Proliferation Studies and Peace Studies This book will be of interest to policy makers scholars and students of nuclear policy nuclear proliferation and arms control related research

Pakistan's Pathway to the Bomb Mansoor Ahmed,2022-05-01 In Pakistan's Pathway to the Bomb author Mansoor Ahmed provides a groundbreaking account of Pakistan's rise as a nuclear power By drawing on elite interviews and previously untapped primary sources Ahmed reveals how bureaucratic politics shaped the nuclear program's development and where it stands today

Pakistan's Nuclear Bomb Hassan Abbas,2018 This book provides a comprehensive account of the mysterious story of Pakistan's attempt to develop nuclear weapons in the face of severe odds Hassan Abbas profiles the politicians and scientists involved and the role of China and Saudi Arabia in supporting Pakistan's nuclear infrastructure Abbas also unravels the motivations behind the Pakistani nuclear physicist Dr A Q Khan's involvement in nuclear proliferation in Iran Libya and North Korea drawing on extensive interviews He argues that the origins and evolution of the Khan network were tied to the domestic and international political motivations underlying Pakistan's nuclear weapons project and that project's organisation oversight and management The ties between the making of the Pakistani bomb and the proliferation that then ensued have not yet been fully illuminated or understood and this book's disclosures have important lessons The Khan proliferation breach remains of vital importance for understanding how to stop such transfers of sensitive technology in future Finally the book examines the prospects for nuclear safety in Pakistan considering both Pakistan's nuclear control infrastructure and the threat posed by the Taliban and other extremist groups to the country's nuclear assets

Pakistan Affairs ,1987

Pakistan's Nuclear Weapons Paul K. Kerr,Mary Beth Dunham Nikitin,2007 Pakistan's nuclear arsenal consists of approximately 60 nuclear warheads Pakistan continues fissile material production for weapons and is adding to its weapons production facilities and delivery vehicles Pakistan reportedly stores its warheads

unassembled with the fissile core separate from non nuclear explosives and these are stored separately from their delivery vehicles Pakistan does not have a stated nuclear policy but its minimum credible deterrent is thought to be primarily a deterrent to Indian military action Command and control structures have been dramatically overhauled since September 11 2001 and export controls and personnel security programs have been put in place since the 2004 revelations about Pakistan s top nuclear scientists A Q Khan s international proliferation network Pakistani and some U S officials argue that Islamabad has taken a number of steps to prevent further proliferation of nuclear related technologies and materials and improve its nuclear security A number of important initiatives such as strengthened export control laws improved personnel security and international nuclear security cooperation programs have improved the security situation in recent years Current instability in Pakistan has called the extent and durability of these reforms into question Some observers fear radical takeover of a government that possesses a nuclear bomb or proliferation by radical sympathizers within Pakistan s nuclear complex in case of a breakdown of controls While U S and Pakistani officials express confidence in controls over Pakistan s nuclear weapons it is uncertain what impact continued instability in the country will have on these safeguards For a broader discussion see CRS Report RL33498 Pakistan U S Relations by K Alan Kronstadt This report will be updated
