Birds of Two Worlds Russell Greenberg, Peter P. Marra, 2005-05-02 For centuries biologists have tried to understand the underpinnings of avian migration where birds go and why why some migrate and some do not how they adapt to a changing environment and how migratory systems evolve Twenty five years ago the answers to many of these questions were addressed by a collection of migration experts in Keast and Morton's classic work Migrant Birds in the Neotropics In 1992 Hagan and Johnston published a follow up book Ecology and Conservation of Neotropical Migrant Landbirds In Birds of Two Worlds Russell Greenberg and Peter Marra bring together the world's experts on avian migration to discuss its ecology and evolution The contributors move the discussion of migration to a global stage looking at all avian migration systems and delving deeper into

the evolutionary foundations of migratory behavior Readers interested in the biology behavior ecology and evolution of birds have waited a decade to see a worthy successor to the earlier classics Birds of Two Worlds will complete the trilogy and become indispensable for ornithologists evolutionary biologists serious birders and public and academic libraries **A Guide to the Birds of Sri Lanka** George Morrison Henry, 1998 This text the only newly comprehensive source of direct information on the avifauna of Sri Lanka for over 40 years includes 44 newly recorded species updated nomenclature and systematic index and additional distributional details Buntings and Sparrows Clive Byers, Urban Olsson, Jon Curson, 2010-09-30 Buntings and North American sparrows offer a great identification challenge Many of the long distance migrants are notable wanderers with a strong tendency to vagrancy while others are rare and local Some of the Asian buntings and tropical sparrows are still poorly known and the skulking habits of some species add to the challenge Most male buntings acquire a bright plumage but the American sparrows acquire this exceptionally rather than as the rule Many sparrows and female buntings appear to be rather dull brown birds but a closer look will reveal intricate and often quite beautiful plumage with these birds the field marks that will enable positive identification are to be found in minute feather detail This book is the first comprehensive guide to all the Old World buntings and North American sparrows It includes 39 plates in full colour depicting all the species and distinct races In the systematic section each species account is divided into sections the identification section summarises important field marks the description section details plumage and bare part characteristics for all ages and sexes geographical variation covers taxonomy and other sections give detailed measurements descriptions of moult and ageing habits voice status and habitat distribution and movements and references A range map is included for each species This beautifully presented book will for many years to come help solve the identification problems posed by a delightful and sought after family of birds
