Vanderploeg, 2014-04-04 Neuropsychological assessment is a difficult and complicated process Often experienced clinicians as well as trainees and students gloss over

fundamental problems or fail to consider potential sources of error. Since formal test data on the surface appear unambiguous and objective, they may fall into the habit of overemphasizing tests and their scores and underemphasizing all the factors that affect the validity, reliability, and interpretability of test data. But interpretation is far from straightforward and a pragmatic application of assessment results requires attention to a multitude of issues. This long-awaited, updated and greatly expanded second edition of the Clinician's Guide to Neuropsychological Assessment, like the first, focuses on the clinical practice of neuropsychology. Orienting readers to the entire multitude of issues, it guides them step by step through evaluation and helps them avoid common misconceptions, mistakes, and methodological pitfalls. It is divided into three sections: fundamental elements of the assessment process, special issues, settings, and populations, and new approaches and methodologies. The authors, all of whom are actively engaged in the clinical practice of neuropsychological assessment as well as in teaching and research, do an outstanding job of integrating the academic and the practical. The Clinician's Guide to Neuropsychological Assessment, Second Edition, will be welcomed as a text for graduate courses but also as an invaluable hands-on handbook for interns, postdoctoral fellows, and experienced neuropsychologists alike. No other book offers its combination of breadth across batteries and approaches, depth, and practicality.

Bridging theory and practice, the *Handbook of School Neuropsychology* provides critical information on neuroanatomy, assessment, and practical, evidence-based interventions for a variety of childhood neuropsychological difficulties and disabilities. Featuring contributions from leading experts, this groundbreaking resource covers all aspects of school neuropsychology, from training and credentialing, assessment, and intervention to understanding and serving students with specific disorders or diseases.
