## **Psychology Of Coaching Theory And Application:**

The Psychology of Executive Coaching Bruce Peltier, 2011-04-27 With the first edition of this text Peltier drew on his extensive experience in both the clinical and business worlds to create a comprehensive resource that brought psychological and coaching concepts together. It quickly became a practical and invaluable guide for both mental health practitioners looking to expand their practice into coaching and business professionals interested in improving their own coaching skills. In this updated edition, topics reflect the latest developments in the field of executive coaching. Peltier describes several important psychological theories and how to effectively translate them into coaching strategies, essential business lessons in leadership, marketing and the corporate viewpoint along with vocabulary for the therapist, the challenges women face as managers and executives and effective coaching methods for working with them and lessons from successful athletic coaches that can be integrated into consulting skills. This edition includes four new chapters: one describing psychopathology likely to be encountered by coaches, another describes and evaluates emotional intelligence, a third summarizes adult developmental theory for coaches and a fourth sorts out the popular and scientific literature on leadership and leader development.

**Psychology of Coaching** Jack H. Llewellyn, Judy A. Blucker, 1982      *Psychology of Coaching* Jack H. Llewellyn, Judy A. Blucker, 1982-01-01      Developing Leaders by Executive Coaching Andromache Athanasopoulou, Sue Dopson, 2015 This book offers an overview of the executive coaching field, what the coaching practice involves and who are its key stakeholders. Nicholls, 2012-12-20 Have you ever wondered how athletes learn and make use of the feedback they are given by their coach or how a coach could make his or her feedback more effective for athletes? *Psychology in Sports Coaching* has been written specifically for students studying coaching who want to improve their understanding of incorporating psychology into coaching practice. As such, it provides information on how coaches establish the psychological needs of athletes in order for them to provide psychological interventions such as mental imagery, mental toughness training and coping effectiveness training. This book also provides the reader with information on enhancing the awareness of athletes and the relationships that occur between the coach and the athlete. It explains how coaches can coach children, adolescents, adults and athletes with learning disabilities. These groups of athletes have different learning styles, are motivated by different factors and prefer instructions to be administered differently. So it is important that coaches tailor their coaching based on the athlete they coach, as this has the potential to enhance the performance and enjoyment of the players that are being coached. Essential reading for all students of sports coaching and sport psychology and for practising sports coaches, this book will help develop and extend coaching expertise.
