Edited by **JOSEPH E. JOHNSON III, MD**

A progress report on the current status of the understanding of the disease and the features which determine its control. The results of a symposium organized by the University of Florida College of Medicine and sponsored by the Tuberculosis Program of the National Communicable Disease Center (U.S. Public Health Service). An authoritative compilation of current knowledge of the epidemiology, pathogenesis, diagnosis, management, and control of tuberculosis. Includes a review of a promising new antituberculous drug, rifampin, which appears to have significant potential for an important role in the chemotherapy of tuberculosis.
