Durkheim and the Birth of Economic Sociology Philippe Steiner, 2024-05-14 An illuminating account of the development of Durkheim's economic sociology. While Durkheim's work has traditionally been viewed as a part of sociology removed from economics, Rectifying this perception, *Durkheim and the Birth of Economic Sociology* is the first book to provide an in-depth look at the contributions made to economic sociology by Durkheim and his followers. Philippe Steiner demonstrates the relevance of economic factors to sociology and shows how the Durkheimians inform today's economic systems. Steiner argues that there are two stages in Durkheim's approach to the economy: a sociological critique of political economy and a sociology of economic knowledge. In his early works, Durkheim critiques economists and their categories and tries to analyze the division of labor from a social rather than economic perspective. From the mid-1890s onward, Durkheim's preoccupations shifted to questions of religion and the sociology of knowledge. Durkheim's disciples such as Maurice Halbwachs and François Simiand synthesized and elaborated on Durkheim's first-stage arguments, while his ideas on religion and the economy were taken up by Marcel Mauss. Steiner indicates that the ways in which the Durkheimians rooted the sociology of economic knowledge in the educational system allows for an invaluable perspective on the role of economics in modern society, similar to the perspective offered by Max Weber's work. Recognizing the power of the Durkheimian approach, *Durkheim and the Birth of Economic Sociology* assesses the effect of this important thinker and his successors on one of the most active fields in contemporary sociology.

*La société savante* Jean Robillard, 2000 Comment modifier les phénomènes de cognition sociale de manière à préserver les caractéristiques sociales. Les sciences cognitives sont souvent mises contribution dans la recherche de modèles qui permettraient d'interpréter ces phénomènes autant sur le plan de leurs mécanismes que sur celui de leurs effets sur la socialité. Or les sciences cognitives ont ceci de particulier qu'elles sont pour une large part fondées sur un paradigme psychologique des fonctions cognitives. Et les sciences sociocognitives ont généralement tendance à emprunter aux sciences cognitives leurs instruments et approches de la modélisation. Cela constitue un problème majeur tant du point de vue des rapports de causalité entre événements sociaux, ainsi qu'étudiés que sur le plan de l'échelle d'analyse adoptée. Ce livre offre une réflexion générale sur la nature et le rôle des modèles dans les sciences sociales, sur laquelle est rigée une théorie de la cognition sociale. L'auteur y étudie les avantages et les problèmes méthodologiques que rencontrent les approches sociocognitives actuelles et propose quelques pistes qui, en abandonnant le recours aux modèles neuropsychologiques des sciences cognitives, visent à redonner aux catégories sociologiques une dimension cognitive qui leur convient.

**Information Sur Les Sciences Sociales** International Social Science Council, 2004 Signals and Images Madeleine Bastide, 2012-12-06 Scientists challenging dominant paradigms are either ignored or attacked by the scientific mainstream. This book, however, contains a selection of scientific papers presented at the two last GIRI meetings: International Research Group on Very Low Dose and High Dilution Effects. The majority of these papers present results performed with successful high dilutions of homeopathic

dilutions even beyond the Avogadro number All presented models are classified and their interpretation is possible either in the mechanistic paradigm or in an information paradigm This new field of research introduces new scientific concepts which are supported by experimental results Furthermore this nascent science is totally concerned with living organisms and as such it becomes necessary to define information brought by non molecular high dilutions This book presents brain storming work of this research group and is one of the starting points of a scientific evolution *The First Move* Alain

*Social Morphogenesis* Margaret S. Archer, 2013-02-20 The rate of social change has speeded up in the last three decades but how do we explain this This volume ventures what the generative mechanism is that produces such rapid change and discusses how this differs from late Modernity Contributors examine if an intensification of morphogenesis positive feedback that results in a change in social form and a corresponding reduction in morphostasis negative feedback that restores or reproduces the form of the social order best captures the process involved This volume resists proclaiming a new social formation as so many books written by empiricists have done by extrapolating from empirical data Until we can convincingly demonstrate that a new generative mechanism is at work it is premature to argue what accounts for the global changes that are taking place and where they will lead More concisely we seek to answer the question whether or not current social change can be regarded as social morphogenesis Only then in the next volumes will the same team of authors be able to remove the question mark

**Social Innovation and Sustainability Transition** Geoff Desa, Xiangping Jia, 2022-11-09 This book uses a historical and modern lens to reimagine the role that Extension could potentially play in catalyzing reciprocal co-learning relationships between Land Grant Universities and their diverse local constituencies The establishment of statewide extension systems was once seen as a way to ensure that Land Grant Universities would be accessible and responsive to all of a state's residents Extension systems continue to offer a front door to a major public university in almost every county of the United States but they tend to be viewed primarily as a way to translate science or distribute information from the university

to the public This books argues for the importance of Extension and shows that we are conceiving of this system too narrowly Only by retelling the stories of the Extension and getting people to see themselves as part of the story can we imagine a different future in which state universities and land grant colleges engage more authentically and equitably in two way relationships with their local constituents in catalyzing reciprocal co learning relationships between Land Grant Universities and their diverse local constituencies Chapter Palatable disruption the politics of plant milk chapter Feeding the melting pot inclusive strategies for the multi ethnic city chapter A carrot isn t a carrot isn t a carrot tracing value in alternative practices of food exchange chapter Virtualizing the good life reworking narratives of agrarianism and the rural idyll in a computer game and chapter Workable utopias for social change through inclusion and empowerment Community supported agriculture CSA in Wales as social innovation are available open access under a Creative Commons Attribution 4 0 International license via link [springer com](https://www.springer.com)
