Raymond F Dasmann:

Raymond F. Dasmann Raymond Fredric Dasmann, 2011 **Raymond F. Dasmann** Raymond Fredric Dasmann, 2000
Raymond F Dasmann's life as a conservation biologist during a half century embraced both groundbreaking fieldwork and the effort to delineate the concepts which are the intellectual scaffolding of modern ecology. His life work was shaped by a passion for the natural world and the desire to solve environmental problems which threaten the planet. **An Environment Fit for People, by Raymond F. Dasmann** Raymond Fredric Dasmann, 1969 Planning for the Planet Simone Schleper, 2019-07-12
During the 1960s and 1970s rapidly growing environmental awareness and concern created unprecedented demand for ecological expertise and novel challenges for ecological advocacy groups such as the International Union for Conservation of Nature and Natural Resources (IUCN). This book reveals how despite their vast scientific knowledge and their attempts to incorporate socially relevant themes IUCN experts inevitably struggled to make global schemes for nature conservation a central concern for UNESCO, UNEP and other intergovernmental organizations.
Called by the Wild Raymond F. Dasmann, 2002-04-16
Encompassing his travels to ecological hotspots around the world and his development of concepts such as bioregionalism and ecotourism, Dasmann's autobiography is a gripping chronicle of an exceptional life and of international conservation action and intrigue. **Transplanting Modernity?** Thomas B. Robertson, Jenny Leigh Smith, 2023-10-24
In general, development denotes movement or growth toward something better in the future. International development widespread in the decades following World War II was an effort at purposeful change in landscapes around the world. Contributors to this volume argue that these projects constituted an effort to transplant modernity such as knowledge or technology from places seen as more developed to places perceived as un- or underdeveloped. During its heyday, international development included not just dams, roads, health programs and agricultural projects but also animal husbandry schemes, urban development and wildlife protection plans. Projects often succeeded or failed because of existing environmental conditions and in turn these programs remade or tried to remake the land, water, wildlife and people around them. From American directed failures in water engineering in Afghanistan to the impact of livestock epidemics on economic growth in East Africa, the chapters in *Transplanting Modernity* question how science, technology and faith in Western notions of progress have influenced the pace, scope and scale of development. **Research in the Parks**, 1976 **Farewell, Promised Land** Robert Dawson, Gray Brechin, 2023-12-22
Historical accounts of California tell of flocks of birds so dense in the sky that they cast a shadow on the ground and of thunderous rivers of geese, ducks and swans moving down the state to the lagoons of Mexico and beyond. Today, citizens and travelers in California take for granted skies empty of almost everything but the contrails of airplanes. But far more than wildlife is missing from California today. In text and photographs, *Farewell, Promised Land* documents the stark contrast between the California landscape of this past and what it has become as it traces the evolution of the California environment and looks ahead to

what the future holds When writer Gray Brechin and photographer Robert Dawson received the 1992 Dorothea Lange Paul Taylor Prize from Duke University's Center for Documentary Studies they began a five year project of driving and flying around California to record the present state of its environment This book is the result of that collaboration In six thematic chapters dealing with Loss Mining Farming Cities Energy and Health the authors provide a sobering look at California's environment A concluding chapter introduces individuals and organizations now attempting to redeem the state from its present course Farewell Promised Land is a superb vehicle for communicating the causes context and seriousness of environmental and social disruptions in California It is unique in that it successfully documents topics such as energy health and cities and brings this information directly to bear on environmental issues Appealing to the intellect as well as to our sense of aesthetics Brechin and Dawson provide a timely wake up call in this brave honest and straightforward assessment of California's fate Historical accounts of California tell of flocks of birds so dense in the sky that they cast a shadow on the ground and of thunderous rivers of geese ducks and swans moving down the state to the lagoons of Mexico and beyond Today citizens and travelers

Overcoming Obstacles in Environmental Policymaking John K. Gamman, 1994-12-05 This book examines why policies and laws intended to protect the environment often do not work In particular Gamman addresses the fundamental reasons why efforts to protect natural resources in the developing world generally fail He describes why environmental initiatives originating in national governments international foreign assistance agencies and environmental groups suffer from a dysfunctional decision making process And he suggests how to improve environmental policymaking by creating partnerships for sustainable development showing how to do this with a step by step negotiation process

Preserving the Legacy

Allen G. Noble, Frank J. Costa, 1999-01-01 Though only a relatively recent topic of worldwide discussion and interest the concept of sustainable development traces its origins to the late eighteenth century when concern for resource conservation and environmental integrity first arose From this beginning the concern for sustainable development progressively expanded from being purely local to having a regional and national relevance and finally to being a global concern of import Preserving the Legacy examines this expansion while discussing several general approaches to the understanding and application of the concept of sustainability Also discussed are such weighty issues as the balancing of development aspirations with environmental management in developing countries and the means by which residents in an urbanizing region in a developed country can be induced to consider sustainable development as both a goal and a limiting factor in the conversion of agricultural land Offering both real world examples of sustainability issues and a forecast for the future of sustainability theory and practice this fascinating volume will prove invaluable to scholars of the environment geography and urban planning

Ladle,Robert J. Whittaker,2011-01-11 CONSERVATION BIOGEOGRAPHY The Earth s ecosystems are in the midst of an unprecedented period of change as a result of human action Many habitats have been completely destroyed or divided into tiny fragments others have been transformed through the introduction of new species or the extinction of native plants and animals while anthropogenic climate change now threatens to completely redraw the geographic map of life on this planet The urgent need to understand and prescribe solutions to this complicated and interlinked set of pressing conservation issues has lead to the transformation of the venerable academic discipline of biogeography the study of the geographic distribution of animals and plants The newly emerged sub discipline of conservation biogeography uses the conceptual tools and methods of biogeography to address real world conservation problems and to provide predictions about the fate of key species and ecosystems over the next century This book provides the first comprehensive review of the field in a series of closely interlinked chapters addressing the central issues within this exciting and important subject

Research Handbook on Law and Literature Goodrich, Peter,Daniela Gandorfer,Cecilia Gebruers,2022-03-22 In this original and thought provoking Research Handbook an international and interdisciplinary group of scholars artists lawyers judges and writers offer a range of perspectives on rethinking law by means of literary concepts Presenting a comprehensive introduction to jurisliterary themes it destabilises the traditional hierarchy that places law before literature and exposes the literary nature of the legal

Natural Attachments Pollyanna Rhee,2025-05-08 A nuanced analysis takes a California oil spill as its point of departure to show how affluent homeowners pushed for an environmentalism that would protect not only the earth but also property and community norms A massive oil spill in the Pacific Ocean near Santa Barbara California in 1969 quickly became a landmark in the history of American environmentalism helping to inspire the creation of both the Environmental Protection Agency and Earth Day But what role did the history of Santa Barbara itself play in this As Pollyanna Rhee shows the city s past and demographics were essential to the portrayal of the oil spill as momentous Moreover well off and influential Santa Barbarans were positioned to domesticate the larger environmental movement by embodying the argument that individual homes and families not society as a whole needed protection from environmental abuses This soon would put environmental rhetoric and power to fundamentally conservative not radical ends

Ecocriticism and the Sense of Place Lenka Filipova,2021-08-29 The book is an investigation into the ways in which ideas of place are negotiated contested and refigured in environmental writing at the turn of the twenty first century It focuses on the notion of place as a way of interrogating the socio political and environmental pressures that have been seen as negatively affecting our environments since the advent of modernity as well as the solutions that have been

given as an antidote to those pressures Examining a selection of literary representations of place from across the globe the book illuminates the multilayered and polyvocal ways in which literary works render local and global ecological relations of places In this way it problematises more traditional environmentalism and its somewhat essentialised idea of place by intersecting the largely Western discourse of environmental studies with postcolonial and Indigenous studies thus considering the ways in which forms of emplacement can occur within displacement and dispossession especially within societies that are dealing with the legacies of colonialism neocolonial exploitation or international pressure to conform As such the work foregrounds the singular processes in which different local global communities recognise themselves in their diverse approaches to the environment and gestures towards an environmental politics that is based on an epistemology of contact connection and difference and as one moreover that recognises its own epistemological limits This book will appeal to researchers working in the fields of environmental humanities postcolonial studies Indigenous studies and comparative literature *Wildlife Abstracts* U.S. Fish and Wildlife Service,1954 **The Wild and the Toxic** Jennifer

Thomson,2019-03-27 Health figures centrally in late twentieth century environmental activism There are many competing claims about the health of ecosystems the health of the planet and the health of humans yet there is little agreement among the likes of D C lobbyists grassroots organizers eco anarchist collectives and science based advocacy organizations about whose health matters most or what health even means In this book Jennifer Thomson untangles the complex web of political social and intellectual developments that gave rise to the multiplicity of claims and concerns about environmental health Thomson traces four strands of activism from the 1970s to the present the environmental lobby environmental justice groups radical environmentalism and bioregionalism and climate justice activism By focusing on health environmentalists were empowered to intervene in the rise of neoliberalism the erosion of the regulatory state and the decimation of mass based progressive politics Yet as this book reveals an individualist definition of health ultimately won out over more communal understandings Considering this turn from collective solidarity toward individual health helps explain the near paralysis of collective action in the face of planetary disaster
