Re Placing Informal Employment Implications For Work And Welfare In The Advanced Economies:

Informal Employment in Advanced Economies Colin C. Williams, Jan Windebank, 2002-09-11 Re Placing Informal Employment challenges many of the popular myths surrounding informal economic activities and offers a radical reassessment of their extent growth location and nature The book uses case studies from the UK France Italy the Netherlands the US and Canada to challenge the popular belief that informal employment is growing throughout the advanced economies the myth that this work is undertaken mostly by marginalized groups the dominant view that we should replace informal with formal employment through enforcement of regulations Examining policy options and their consequences the authors show that conventional approaches only increase inequalities and that a radical alternative solution is essential *Informal Employment in the Advanced Economies* Colin C. Williams, Janice Windebank, 1998 Re Placing Informal Employment challenges many of the popular myths surrounding informal economic activities and offers a radical reassessment of their extent growth location and nature The book uses case studies from the UK France Italy the Netherlands the US and Canada to challenge the popular belief that informal employment is growing throughout the advanced economies the myth that this work is undertaken mostly by marginalized groups the dominant view that we should replace informal with formal employment through enforcement of regulations Examining policy options and their consequences the authors show that conventional approaches only increase inequalities and that a radical alternative solution is essential Enterprise, Deprivation and Social Exclusion Alan Southern, 2012-04-27 There is little doubt that in recent years enterprise has been considered an essential approach in the alleviation of deprivation existing in the developed world The assumption is that area based initiatives provide a means by which enterprise can include all members of society in mainstream social and economic activities The rationale behind Enterprise Deprivation and Social Exclusion is to critically challenge the notion that enterprise can address the complexity behind deprivation and social exclusion by demonstrating UK and North American examples We see how enterprise has come to be regarded as a means by which poverty can be reduced and new opportunities can be opened up to support individuals However the authors here seek to give a greater appreciation to the structural roots of deprivation and pose questions about whether or not enterprise might actually exacerbate structures of social and economic exclusion What if enterprise actually maintains differences between types of community and keeps individuals entrenched in certain ways of thinking The contributions in this edited collection will offer a distinct opportunity in respect of both theoretical and empirical advancement The authors hail from both sides of the Atlantic and form an inter disciplinary group to provide complementary perspectives in this field Re-Thinking the Future of Work Colin C. Williams, 2007-02-28 How will work be organised in the future With its global perspective and critical approach Re Thinking the Future of Work provides not only an overview and examination of the array of competing visions but also a radical rethink about the direction of change Poverty in the United States Gwendolyn Mink, Alice M. O'Connor, 2004-11-22 The first interdisciplinary

reference to cover the socioeconomic and political history the movements and the changing face of poverty in the United States Poverty in the United States An Encyclopedia of History Politics and Policy follows the history of poverty in the United States with an emphasis on the 20th century and examines the evolvement of public policy and the impact of critical movements in social welfare such as the New Deal the War on Poverty and more recently the end of welfare as we know it Encompassing the contributions of hundreds of experts including historians sociologists and political scientists this resource provides a much broader level of information than previous highly selective works With approximately 300 alphabetically organized topics it covers topics and issues ranging from affirmative action to the Bracero Program the Great Depression and living wage campaigns to domestic abuse and unemployment Other entries describe and analyze the definitions and explanations of poverty the relationship of the welfare state to poverty and the political responses by the poor middle class professionals and the policy elite *Choice* ,1998 Living Wage Shelley Marshall,2019-01-17 This book is driven by a quest to re regulate work to reduce informality and inequality and promote a living wage for more people across the world It presents the findings of a multidisciplinary study in four countries of varying wealth and development exploring why people become trapped in precarious work The accounts describe the impact of supply chain governance trade agreements internal and between country migration legal factors as well as the socio economic characteristics and outlooks of the workers In a unique approach the chapters describe existing labour regulation measures that have succeeded but which have to date attracted little scholarly attention Building on these existing innovations the book proposes a new international labour law which would incrementally increase the wages of the poor and regulate precarious work in global supply chains

American Book Publishing Record ,1998 *Subject Guide to Books in Print* ,2001 *Poverty and the Third Way* Colin C Williams,Colin C. Williams,Jan Windebank,2003-08-29 The subject of poverty and how it can be tackled is a significant issue at the moment both in the UK and the US This book provides a thought provoking new approach to the subject developing a method which transcends capitalism and socialism Wide ranging audience human geography social policy sociology economics etc also practitioners in fields of community development and local economic development International market written as much for the North American market as for the UK and European **Tax Treaties:**

Building Bridges between Law and Economics ,2010 In this book experts from the field of economics take a different view of tax treaty issues than experts from the field of law In order to encourage the much needed communication between these two groups a cross disciplinary conference was held to discuss selected tax treaty issues from both a legal and economic perspective Twenty five conference papers on eight topics were prepared by lawyers and economists The papers on legal issues were presented and discussed by economists and vice versa The interdisciplinary focus of the conference not only allowed an exchange of knowledge between two groups who think differently about similar issues but also made it possible to better grasp the impact of the thinking of one group on the areas of interest to the other group The outcome of

the conference is reflected in this book By showing the legal and the economic approaches to an issue this book improves the general understanding of the two disciplines and demonstrates how the decisions in one discipline may influence the other discipline and its concepts Twenty two contributions are included written by the most distinguished academics practitioners and representatives of several international tax administrations and both tax and economic institutions Revitalising Deprived Urban Neighbourhoods Colin C. Williams, Jan Windebank, 2017-03-02 Governments in Western Europe and North America have placed job creation initiatives at the heart of their policy for revitalizing deprived neighbourhoods However relying on this alone is problematic and these governments are becoming increasingly interested in finding ways of enabling communities to help themselves Drawing upon original in depth studies of self help activities in both deprived and affluent neighbourhoods in UK cities this book examines why the populations of deprived neighbourhoods are more likely to be excluded not only from the labour market but also from adopting self help practices in response to their situation It also identifies the barriers which discourage participation in self help projects A combination of policies are advocated bringing together innovative bottom up initiatives such as LETS time currencies and Employee Mutuals with top down policies such as Active Citizens Credits This book instead suggests a fresh and positive approach towards revitalizing deprived neighbourhoods based on seeking the full engagement rather than merely the full employment of deprived populations

Economics of Global Business Rodrigo Zeidan, 2018-11-13 A textbook with innovative real world macroeconomic analyses of timely policy issues with case studies and examples from more than fifty countries This timely and refreshingly real world focused textbook examines some of the world s most critical policy issues through a macroeconomics lens After presenting analytical foundations modeling tools and theoretical perspectives Economics of Global Business goes a step further than most other texts with a practical look at the local and multinational tradeoffs facing economic policymakers in more than fifty countries Topics range from income equality and the financial crisis to GDP inflation and unemployment and notably one of the first macroeconomic examinations of climate change Written by a globetrotting economist who teaches and consults on three continents Economics of Global Business aims not for definitive answers but rather to provide a better understanding of the context dependent rationales constraints and consequences of economic policy decisions The book covers long run and short run growth with examples from the United States China the European Union South Korea Japan Latin America Africa Australia and Vietnam financial crises and central banks monetary and fiscal policies government budgets currency regimes climate change and macroeconomics income inequality and globalization All chapters rely on recent and historical examples of economic policy in action The book is particularly suitable for use as an introduction to macroeconomics for business students

Oltre il capitalocentrismo J.K. Gibson-Graham, 2025-06-19 T00:00:00+02:00 Attraverso una selezione dei suoi scritti più significativi il volume introduce per la prima volta al pubblico italiano il lavoro di J K Gibson Graham Combinando in maniera originale critica marxista anti essenzialista femminismo post strutturalista e teoria queer Gibson Graham decostruisce il capitalocentrismo implicito nelle rappresentazioni comuni dell'economia e valorizza la varietà di attività economiche spesso marginalizzate o ignorate come il lavoro di cura l'autoproduzione il volontariato e le pratiche comunitarie L'approccio propone una rilettura della realtà economica come spazio eterogeneo in cui possibile agire e sperimentare forme di cooperazione mutualismo e solidarietà già presenti nel quotidiano In questo modo si invita a riconoscere la capacità creativa dei soggetti e delle collettività nel generare modelli di vita più equi e sostenibili tracciando percorsi concreti verso una politica della possibilità qui e ora *To Amend the Employment Act of 1946* United States. Congress. Senate. Committee on Labor and Public Welfare. Subcommittee on Employment, Manpower, and Poverty, 1967 *Community Economic Development* Graham Haughton, 2013-12-16 This important book examines the ways in which community economic development can contribute to local and regional regeneration It presents a unique overview of the state of contemporary British practice in this important policy area and provides a series of fresh theoretical methodological and empirical insights which help us to understand ways in which communities are facing up to the challenges of devising and bringing about their own revitalisation Community Economic Development is underpinned by the argument that much conventional regeneration work represents at best a short term fix rather than a long term sustainable solution to the problems of socially excluded communities The emphasis of the book is largely on the British experience with contributions from a rich mix of new and established academics and practitioners *Platform Labour and Global Logistics* Immanuel Ness, 2022-12-26 Over the past 50 years the global labour market is transforming from reliable employment to low wage and unstable informal and precarious jobs This ineluctable shift is a consequence of the concentrated application of neoliberalism since the 1980s as capitalism is converting standardised labour markets in the developed Global North into contingent and informal labour *Platform Labour and Global Logistics A Research Companion* examines the most important developments and features of global logistics and the emergence of the platform economy through historical comparative chapters and case studies Part I surveys the logistics revolution and its impact on labour in key sectors of the global economy and probes the viability of the platform as a generator of economic and financial growth and innovation The chapters of Part 1 offer a fulsome analysis and critique of the economic and technical reconfiguration brought on by neoliberal capitalism and the diffusion of the platform

and logistics as a feasible model into the future Part II examines labour restructuring from standardized to informal work through the platform and information technology and the political and environmental challenges to labour Part III provides global case studies on the informal economy through case studies of crucial economies where the platform has become dominant and Part IV examines how the platform has contributed to geographic mobility and labour migration and the consequences on workers Platform Labour and Global Logistics A Research Companion presents a unique contribution to the political economy literature through highlighting the significance of the impact of the platform and logistics on the working class and potential challenges from labour across the world This book is intended for academics researchers and students studying technological innovation global supply chains labour restructuring and worker resistance
