Reactive Dyes In Biology And Medicine:

Conn's Biological Stains Richard Horobin, John Kiernan, 2020-08-13 Published on behalf of the Biological Stain Commission For 75 years Conn's Biological Stains has been a standard reference for all those who used dyes and colorants in the biological and medical sciences This long awaited tenth edition appears 25 years after R D Lillie's ninth and has been completely rewritten to reflect the increase in range of uses Although the staining of microscopical preparations continues to expand the uses of dyes and fluorochromes now extend far beyond this traditional application This book provides the first critical overview of the whole range of low molecular weight fluorescent probes outside the catalogue literature The first ten chapters are essays by leading experts on the important aspects of colorants and their uses Most of the remainder of the book consists of descriptions by Dr Horobin of the properties and recent applications of hundreds of individual compounds in about twenty chemical classes The last chapter reviews the procedures employed at the Biological Stain Commission's laboratory to assay and test dyes and certify them as suitable for their intended applications

Synthetic Dyes in Biology, Medicine And Chemistry Edward Gurr, 2012-12-02

Synthetic Dyes in Biology Medicine and Chemistry is a guide in selecting dyes for special purposes in biology medicine chemistry and other related fields It aims to help professionals including histologists cytologists and other biology and medicine experts such as chemists and general scientists The dyes discussed in this book are categorized in 17 different classes according to the nature of their salt forming sidechains the colligators This book also presents the uses of each dye The spectral curve which is the ionic and or molecular weight of each dye is also covered in this book Likewise this text provides the structural and empirical formulae of the spectral curve Part I tackles various groups of dyes These groups are the non ionic anionic and cationic dyes The anionic dyes are further grouped as wholly acid weakly amphoteric and moderately or strongly amphoteric The subsequent part deals with the examples of dyes that do not fit the categories mentioned in Part I These miscellaneous dyes are vat reactive disperse and ingrain dyes Part III presents the dyes in different tables according to wavelength of maximum absorption and ionic or molecular weight This book also covers the stabilized diazonium salts and substituted naphthols
