Abstract

The Quranic text today is recited in ten canonical reading traditions with two distinct canonical transmissions each. These reading traditions are distinct in their phonological and morphological details, as well as the interpretation of the ambiguous consonantal text. However, they all have in common that they adhere to the consonantal skeleton of the standard Quran text. Despite this adherence, on rare occasions readers do deviate from this standard text. This paper examines those cases, and explores the reasons why the canonical readers felt licensed to do so. Especially 'Abū 'Amr was prone to deviate from the consonantal text in cases of perceived grammatical issues. Moreover, the readers occasionally deviated from their regional consonantal text when other regional codices had another form. Finally, readers deviated from the consonantal text, in cases where the text came in conflict with the pausal spelling principle.

life Kierkegaard was an extraordinarily prolific writer as attested to by the 26 volume Princeton University Press edition of all of his published writings But Kierkegaard left behind nearly as much unpublished writing most of which consists of what are called his journals and notebooks Kierkegaard has long been recognized as one of history's great journal keepers but only rather small portions of his journals and notebooks are what we usually understand by the term diaries By far the greater part of Kierkegaard's journals and notebooks consists of reflections on a myriad of subjects philosophical religious political personal Studying his journals and notebooks takes us into his workshop where we can see his entire universe of thought We can witness the genesis of his published works to be sure but we can also see whole galaxies of concepts new insights and fragments large and small of partially or almost entirely completed but unpublished works Kierkegaard's Journals and Notebooks enables us to see the thinker in dialogue with his times and with himself Kierkegaard wrote his journals in a two column format one for his initial entries and the second for the extensive marginal comments that he added later This edition of the journals reproduces this format includes several photographs of original manuscript pages and contains extensive scholarly commentary on the various entries and on the history of the manuscripts being reproduced Volume 8 of this 11 volume series includes five of Kierkegaard's important NB journals Journals NB21 through NB25 which cover the period from September 1850 to June 1852 and which show Kierkegaard alternately in polemical and reflective postures The polemics emerge principally in Kierkegaard's opposition to the increasing infiltration of Christianity by worldly concerns a development that in his view had accelerated significantly in the aftermath of the political and social changes wrought by the Revolution of 1848 Kierkegaard understood the corrupting of Christianity to be in the interest of the powers that be and he directed his criticism at politicians the press and especially the Danish Church itself particularly church officials who claimed to be reformers On the reflective side Kierkegaard delves into a number of authors and religious figures some of them for the first time including Montaigne Pascal Seneca Savonarola Wesley and F W Newman These journals also contain Kierkegaard's thoughts on the decisions surrounding the publication of the Anti Climacus writings The Sickness unto Death and especially Practice in Christianity Kierkegaard's reader gets the sense both of a gathering storm by the close of the last journal in this volume the famous attack on Christendom is less than three years away and a certain hesitancy What needs reforming Kierkegaard insists is not the doctrine or the Church but existences i e lives

Reading 1759 Shaun Regan, 2013 Reading 1759 investigates the literary culture of a remarkable year in British and French history writing and ideas Familiar to many as the British year of victories during the Seven Years War 1759 was also an important year in the histories of fiction philosophy ethics and aesthetics Reading 1759 is the first book to examine together the range of works written and published during this crucial year Offering broad coverage of the year's work in writing these essays examine key works by Johnson Voltaire Sterne Adam Smith Edward Young Sarah Fielding and Christopher Smart along with such group projects as the Encyclopédie and the literary review journals of the mid eighteenth century Organized around a cluster of key topics the

volume reflects the concerns most important to writers themselves in 1759 This was a year of the new and the modern as writers addressed current issues of empire and ethical conduct forged new forms of creative expression and grappled with the nature of originality itself Texts written and published in 1759 confronted the history of Western colonialism the problem of prostitution in a civilized society and the limitations of linguistic expression Philosophical issues were also important in 1759 not least the thorny question of causation while in France state censorship challenged the Encyclopédie the central Enlightenment project Taking into its purview such texts and intellectual developments Reading 1759 puts the literary culture of this singular and singularly important year on the scholarly map In the process the volume also provides a self reflective contribution to the growing body of annualized studies that focus on the literary output of specific years *The State Trooper*, 1926 **Six Sigma and Beyond** D.H. Stamatis, 2002-11-12 The final volume of this series presents a synopsis of the curriculum that a typical Six Sigma program should follow It differs from the preceding six volumes in that it is an implementation volume therefore the information is geared towards helping readers formalize their own training The book establishes the minimum requirements for the Six Sigma Revolution and Its Alternatives Tom Brass, 2018-11-26 Against the usual argument heard most frequently on the left that there is no subject for a radical politics together with its form of political mobilization there is but in the absence of a radical leftist project this subject has in the past transferred and in many instances is still transferring his/her support to the radical politics on offer from the other end of the ideological spectrum The combination of on the one hand a globally expanding industrial reserve army generating ever more intense competition in the labour markets of capitalism and on the other the endorsement by many on the left not of class but rather of non class identities espoused by the new populist postmodernism has fuelled what can only be described as a perfect storm politically speaking **The New Larned History for Ready Reference, Reading and Research** Josephus Nelson Larned, 1923 Astadala Yogamala (Collected Works), Volume 8 B.K.S.
