Hailman, Karen B. Strier, 2006-11-02 Publisher description      *Theorizing Composition* Mary Kennedy, 1998-06-25 The last 25 years have witnessed extraordinary growth in the academic specialization variously described as composition studies or rhetoric and composition What was noticeable about the field in its infancy was a preoccupation with practice a lack of emphasis on theory and an exclusive reliance on the writing process As its disciplinary status has grown the field has become far more theoretical Composition studies has expanded its focus reconceptualized the writing process and embraced a wide range of critical perspectives The result of this change is that terms such as poststructuralism social construction gender and genre which were largely unknown in 1965 now dominate discussion This reference book is a guide to the multiplicity of theories that have emerged to form the disciplinary foundation of composition studies The volume consists of 66 entries each of which is written by an expert contributor and focuses on a particular theory or group of theories While the entries show how various individuals have contributed to theoretical movements very few concentrate on the work of a single theorist Each entry first provides a critical summary of a particular theory or group of theories including key elements basic concepts and claims and information about seminal or particularly influential works It then reviews the theory's critical reception in composition studies and discusses its significance in the field The bibliography at the end of each entry lists primary texts and major scholarship related to the theory and provides additional suggestions for further reading The volume closes with a selected bibliography of important works      **Writing Technology** Christina Haas, 2013-11-05 Academic and practitioner journals in fields from electronics to business to language studies as well as the popular press have for over a decade been proclaiming the arrival of the computer revolution and making far reaching claims about the impact of computers on modern western culture Implicit in many arguments about the revolutionary power of computers is the assumption that communication language and words are intimately tied to culture that the computer's transformation of communication means a transformation a revolutionizing of culture Moving from a vague sense that writing is profoundly different with different material and technological tools to an understanding of how such tools can and will change writing writers written forms and writing's functions is not a simple matter Further the

question of whether and how changes in individual writers experiences with new technologies translate into large scale cultural revolutions remains unresolved This book is about the relationship of writing to its technologies It uses history theory and empirical research to argue that the effects of computer technologies on literacy are complex always incomplete and far from unitary despite a great deal of popular and even scholarly discourse about the inevitability of the computer revolution The author argues that just as computers impact on discourse discourse itself impacts technology and explains how technology is used in educational settings and beyond

**The Art of University Teaching** George Melnyk,Christine Mason Sutherland,2011 A typical workday for a university professor might include addressing 400 first year students in a huge lecture auditorium and in the same day coaching a single nervous and uncertain doctoral student who is struggling to complete her dissertation Don t even ask about the research writing and committee meetings As this professor you might cope by figuring out lessons and sessions on the fly or you might dig into memories of what you learned from your own teachers Over the years university students have shown that they need to learn and communicate in a variety of ways and with a range of new technology Professors must adapt to this environment and continue to mentor well prepared analytical students by being inspired and inspiring teachers In these essays the contributors trace the many ways that professors have achieved excellence New university professors will find guidance and insight in these essays which also contain reflections by university students What skills and knowledge did they learn How did their values and beliefs transform At the end of their degree were they same people that they were upon university entrance

**PhotoGraphic Encounters** William F. Garrett-Petts, Donald Lawrence, Kamloops Art Gallery, 2000-10 Literacy is broadly understood to refer to the ability to read and write But the term is heavily value laden and is often used to elevate print at the expense of other forms of communication In *PhotoGraphic Encounters* the authors challenge this reductive notion of literacy and propose instead an integrated span of literacies reaching across disciplinary boundaries to discover a text that draws upon both the visual and the verbal *PhotoGraphic Encounters* discusses Canadian writers like Margaret Atwood George Bowering Robert Kroetsch and Daphne Marlatt and Canadian artists like Fred Douglas Ernie Kroeger Brenda Pelkey and Michael Snow then looks at the cross fertilization of visual and verbal processes in their works The authors present a new narrative practice one that fully engages lived experience The vernacular they argue is vital to our participation as readers and viewers of high art Making the connection between the vernacular and high culture creates an enabling moment in artistic production and reception and in teaching learning and talking about art and literature *PhotoGraphic Encounters* offers a compelling perspective on questions of literacy in a postmodern culture Artists writers scholars and critics alike will want this volume in their libraries Includes more than 120 B W photographs 20 colour plates index bibliography
