Student and Teacher Writing Motivational Beliefs Steve Graham, Gary A. Troia, Gustaf Bernhard Uno Skar, 2024-06-21 The study of students' motivational beliefs about writing and how such beliefs influence writing has increased since the publication of John Hays' 1996 model of writing. This model emphasized that writers' motivational beliefs influence how and what they write. Likewise, increased attention has been devoted in recent years to how teachers' motivational beliefs about writing, especially their efficacy to teach writing, impact how writing is taught and how students progress as writers. As a result, there is a need to bring together in a Research Topic studies that examine the role and influence of writing beliefs. Historically, the psychological study of writing has focused on what students write or the processes they apply when writing. Equally important but investigated less often are studies examining how writing is taught and how teachers' efforts contribute to students' writing. What has been less prominent in the psychological study of writing are the underlying motivational beliefs that drive or inhibit students' writing or serve as catalysts for teachers' actions in the classroom when teaching writing. This Research Topic will bring together studies that examine both students' and teachers' motivational beliefs about teaching writing. This will include studies examining the operation of such beliefs, how they develop, cognitive and affective correlates, how writing motivational beliefs can be fostered, and how they are related to students' writing achievement. By focusing on both students' and teachers' beliefs, the Research Topic will provide a more nuanced and broader picture of the role of motivation beliefs in writing and writing instruction. This Research Topic includes papers that address students' motivational beliefs about writing, teachers' motivational beliefs about writing or teaching writing. Students' motivational beliefs about writing include beliefs about the value and utility of writing, writing competence, attitudes toward writing, goal orientation, motives for writing, identity, epistemological underpinnings, writing and attributions for success/failure, as examples. Teachers' motivational beliefs include these same judgements, as well as beliefs about their preparation and their students' competence and progress as writers, to provide additional examples. This Research Topic is interested in papers that examine how such beliefs operate, develop, are related to other cognitive and affective variables, how they are impacted by instruction, and how they are related to students' writing performance. Submitted studies can include original research, both quantitative, qualitative, or mixed methods, meta-analysis, and reviews of the literature.

Improving Reading, Writing, and Content Learning for Students in Grades 4-12 Rosemarye T. Taylor, 2006-09-14 This excellent resource provides a realistic and systematic process that educators can immediately implement for improving reading and writing while enhancing content knowledge and skills.
