Marguerite La Caze

Responding To Evil:

Responding to Evil Joseph Francis Kelly, 2003 In *Responding to Evil* Joseph Kelly treats evil as a force in our personal lives. He talks about the impact of September 11 on the American consciousness and how that brought the question of evil front and center. Professor Kelly then looks at what evil does to us and how previous generations have dealt with it. By focusing on the sins people commit rather than the questions psychologists tend to focus on such as murder or theft or on tragedies that occurred in Rwanda or during the Holocaust, Kelly makes the discussion of evil relevant to readers like us who are not really evil but who face the problem of our own sinfulness every day. In taking up the intellectual question of how God and evil can coexist, Kelly relates the ideas in the book to real life situations especially of good and caring people. Finally, he shares how we can respond to evil and looks at how some modern Christians often ordinary people have done so. Chapters are: What Evil Does to Us, How Can God and Evil Co Exist, Responses to Evil, and Some Final Thoughts. Joseph F. Kelly, PhD, chair of the department of religious studies at John Carroll University, is also active in religious education for the Diocese of Cleveland. Of his eight previous books with Liturgical Press, he has published *The Problem of Evil in the Western Tradition* and *The World of the Early Christians*. **In Defence of Cosmopsychism** Khai Wager, 2025-10-16 Is the cosmos itself conscious and could our minds be aspects of its vast overarching consciousness? In this ambitious and original study, Khai Wager defends cosmopsychism, the view that the universe as a whole is conscious and that individual minds like ours derive from this cosmic consciousness. Wager situates cosmopsychism within what he calls the landscape of fundamental consciousness, bringing it into productive dialogue with closely related views such as panpsychism, panqualityism, and perennialism. The result is a fresh perspective on one of philosophy's deepest puzzles: the nature and origin of consciousness. The problem of phenomenal consciousness asks how subjective experience can emerge from non-conscious matter. Fundamental approaches reject the idea that consciousness arises from non-conscious matter, instead proposing that it is present at the most basic level of reality. Panpsychism, the most prominent such view, holds that all fundamental microphysical entities are conscious. This, however, leads to the combination problem: how do billions of micro-level minds combine to form distinct macro-level minds like ours? Cosmopsychism offers a radical alternative: rather than being formed from a combination of micro-level instances of consciousness, individual minds derive from a larger cosmic-level consciousness. As a result, cosmopsychism sidesteps the combination problem entirely. However, a new and equally pressing challenge arises: the derivation problem—how do individual minds derive from the cosmic consciousness? Through rigorous and insightful analysis, Wager argues that cosmopsychism can navigate these problems and offers a compelling alternative to both physicalism and panpsychism. As such, this first book-length treatment of cosmopsychism makes an illuminating contribution to debates about the nature of reality and our place within it. *Responding to Evil* Jeffrie G. assess and we do not or should not think that advanced philosophical expertise is a necessary requirement for virtue At the same time the virtuous do not only accidentally get things right rather they act well in a reliable fashion and they do so by responding appropriately to genuine reasons How is it possible for there to be genuine reasons that the virtuous are able to rely on to determine what they should do given that they are generally speaking ignorant of fundamental ethical principles and the reasons that they specify Daniel Star argues that the solution to this problem requires a new approach to understanding the relation between ethical theory and ordinary deliberation a new way of thinking about the nature of practical authority and normative reasons a new account of the nature of virtue and a rethinking of how best to understand the role that knowledge plays in deliberation and action *Take My Hand* James H.
