Responding To Adolescent Needs:

Responding to Adolescent Needs Max Sugar, 1980 *Responding to Adolescent Needs* Polly Lowe, 1988 *Adolescents, Media, and the Law* Roger J. R. Levesque, 2007-06-18 There is much controversy about the dangers of a free media when it comes to children and adolescents Many believe that this constitutional right should be amended altered or revoked entirely to prevent the young from being negatively influenced Graphic violence sexual content and the depiction of cigarette smoking have all come under fire as being unacceptable in media that is geared toward adolescents from television and movies to magazines and advertising Yet not much has been written about the developmental science behind these ideas and what effects a free media really has on adolescents This book presents a synthesis of all current knowledge about the developmental effects of a free media on adolescents Levesque first presents a full analysis of research studies into the media s effects on adolescents in four key areas sexuality violence smoking and body image All findings are assessed within the context of normal adolescent development Levesque then discusses how this knowledge can be used to inform current standards for the regulation of free speech with regard to adolescents Both legal restrictions and less formal regulatory bodies schools parent groups etc are reviewed to present a full picture of the ways in which a free media is constrained to protect adolescent s development

Attachment Theory Applied Mario Mikulincer, Phillip R. Shaver, 2023-06-20 In this compelling book prominent investigators Mario Mikulincer and Phillip R Shaver review the state of the science of attachment based interventions in psychotherapy and beyond They critically evaluate a range of programs that aim to strengthen parent child couple and therapist client relationships The theoretical and empirical underpinnings of each intervention are examined as are specific techniques used to enhance felt security and foster personal growth The book also looks at evidence based interventions outside the mental health domain including programs that target teacher student relationships and academic performance Looking to the future the authors discuss emerging applications of attachment theory in medicine and health care management and organizational behavior and group and intergroup processes See also the related work from Mikulincer and Shaver *Attachment Theory Expanded Security Dynamics in Individuals Dyads Groups and Societies*

Adolescents, Model Adolescents Roger J.R. Levesque,2005-12-27 Teachers make a difference As someone who grew up in one of the poorest and rural areas of a poor state and ended up attending elite graduate and professional schools I have much to credit my public school teachers My teachers sure struggled much to teach an amazingly wide variety of students from different backgrounds abilities and hopes Given that reality which undoubtedly repeats itself across the United States and globe one would think that I should be quite hesitant to criticize a system that produces countless grateful students and productive citizens I agree The pages that follow surely can be perceived as yet another attack on already much maligned schools that do produce impressive outcomes despite their limited resources increased obligations and the sustained barrage of attacks from competing interest groups Some may even view the text as an affront to the inalienable rights of parents to raise their children as they see fit Others surely could understand the analysis as another assault on our decentralized legal and school systems that should retain the right to balance the needs of communities parents schools and students I clearly did not intend and do not see the ultimate result as yet another diatribe on the manner teachers parents and communities treat students *Global Accelerated Action for the Health of Adolescents (AA-HA!)* World Health Organization,2023-10-11
