Rethinking Islam and Space in Europe C.J.J. Moses, Tobias Müller, Adela Taleb, 2022-09-05 The role of Islam in public spaces is one of the most prevalent political questions in Europe Contestations around the construction of mosques the ban of Islamic veils and populist rhetoric about problematic neighbourhoods indicate Europe's struggles with the place of its second largest religion This book advocates for an analytical turn in the study of Islam in Europe using space as a central conceptual lens While spatial approaches are gaining traction in the study of religion migration ethnicity race and politics the chapters in this book argue that the critical potential of a spatialised analysis in the field of Islam in Europe remains largely unexplored This volume presents a collection of nine empirical studies that offer insights into how scholars might exploit the category of space when analysing both current political issues and broader conceptual questions in the social sciences And more specifically how does a spatial perspective on Islam contribute to a deeper understanding of the formations of the state ethnicity race secularism gender and colonial structures Rethinking Islam and Space in Europe is a significant new contribution to racial and ethnic studies in Europe and will be a great resource for academics researchers and advanced students of Politics Sociology Social and Political Geography Anthropology and Religious Studies The chapters in this book were originally published as a 2021 special issue of Ethnic and Racial Studies

Rethinking Disability Patrick Devlieger, Beatriz Miranda-Galarza, Steven E. Brown, Megan Strickfaden, 2016-06-15 The act of life is a lived experience common and unique that ties each of us to every other lived experience The fact of disability does not alter this fundamental truth In this edition of Rethinking Disability World Perspectives in Culture and Society we are presented with a system of thinking that considers the values of disability as a resource as a creative source of culture that moves disability out of the realm of victimized people and insurmountable barriers and provides opportunities to use the experience of disability to enter into networks that recognize strengths of differing abilities The authors within will intrigue you will move you will charm you but always will challenge your notion of sameness and difference as they confront the construct and de construct of disability and ableism They present compelling arguments for viewing disABILITY through the multiple lenses of disability culture They explore themes and issues that transcend past and origins time and place nuances of genetics to experiences of present and becoming and towards the future and beyond mere human yet always intrinsically

connected to being human This book is intended for all audiences who dare to confront difference and sameness within themselves and in connection with others to inspire researchers who wish to explore and examine disability across social cultural and economic barriers It is an invitation to push away the barriers bring ableism inside to a place where the prosthesis is no longer the elephant in the room *Time and the Highland Maya* Barbara Tedlock,1992-03 Described as a landmark in the ethnographic study of the Maya this study of ritual and cosmology among the contemporary Quich Indians of highland Guatemala has now been updated to address changes that have occurred in the last decade **Covid's**

Body, Meaning, Healing T. Csordas,2002-09-05 Exactly where is the common ground between religion and medicine in phenomena described as religious healing In what sense is the human body a cultural phenomenon and not merely a biological entity Drawing on over twenty years of research on topics ranging from Navajo and Catholic Charismatic ritual healing to the cultural and religious implications of virtual reality in biomedical technology Body Meaning Healing sensitively examines these questions about human experience and the meaning of being human In recognizing the way that the meaningfulness of our existence as bodily beings is sometimes created in the encounter between suffering and the sacred these penetrating ethnographic studies elaborate an experimental understanding of the therapeutic process and trace the outlines of a cultural phenomenology grounded in embodiment
