**Communication Yearbook 15** Stanley Deetz, 2012-05-23 First published in 2012 The Communication Yearbook 15 focuses on cultural studies and the social production of meaning in relation to mass media messages Included are significant issues in persuasion language and dominance and interpersonal communication British Marxism and Cultural Studies Philip Bounds, David Berry, 2016-04-20 A comprehensive exploration of the profound influence of Marxist ideas on the development of Cultural Studies in Britain this volume covers a century of Marxist writing balancing synoptic accounts of the various schools of Marxist thought with detailed analyses of the most important writers Arguing that a recognisably Marxist tradition of cultural analysis began in the last two decades of the nineteenth century and continues unbroken to the present day British Marxism and Cultural Studies traces the links between contemporary developments in the field and the extended tradition of which they form a part With discussion of figures such as Jack Lindsay C L R James Julian Stallabrass and Mike Wayne as well as the cultural thinking of the New Left Gramscian Althusserian and Political Economy schools this book shows that the history of British cultural Marxism is broader and richer than many people realise As such it will be of interest to scholars and students of sociology cultural studies intellectual history and the history of the Left New Research on Social Perception John A. C Pezzullo, 2013-10-31 The environment is perhaps most misunderstood as a static place somewhere out there separated from the practices of our everyday lives Given this assumption environmental movements and concerns have remained mostly marginalized or denigrated in cultural studies publications conferences and presentations Recent global developments have made changing this oversight and at times direct resistance to engaging environmental concerns a new priority This edited collection illustrates an appreciation of the dynamic palpable and significant ways the environment permeates culture and vice versa as well as a collective commitment to the ways that cultural studies has more to offer and to learn from taking environmental matters to heart Like foundational categories of identity economics and historical context this collection reminds us why the environment is and should be considered relevant to any work done in the name of cultural studies Including research from four continents and across media the authors offer insights on timely topics such as food tourism human animal relations forests queer theory indigenous rights and water This book was published as a special issue of Cultural Studies **Television Histories** Gary R. Edgerton, Peter C. Rollins, 2021-09-15 From Ken Burns's documentaries to historical dramas such as Roots from A E s

Biography series to CNN television has become the primary source for historical information for tens of millions of Americans today Why has television become such a respected authority What falsehoods enter our collective memory as truths How is one to know what is real and what is imagined or ignored by producers directors or writers Gary Edgerton and Peter Rollins have collected a group of essays that answer these and many other questions The contributors examine the full spectrum of historical genres but also institutions such as the History Channel and production histories of such series as The Jack Benny Show which ran for fifteen years The authors explore the tensions between popular history and professional history and the tendency of some academics to declare the past off limits to nonscholars Several of them point to the tendency for television histories to embed current concerns and priorities within the past as in such popular shows as Quantum Leap and Dr Quinn Medicine Woman The result is an insightful portrayal of the power television possesses to influence our culture

Beautifully written and well argued, this book provides a long, clear look at how capitalism and capitalists seize and control culture through the ownership of copyrights, thus perpetuating their own ideologies and economic superiority.

**Media Power in Hong Kong** Charles Chi-wai Cheung, 2016-02-12 Studies of Hong Kong media primarily examine whether China will crush Hong Kong's media freedom. This book, however, traces the root problem of Hong Kong media back to the colonial era, demonstrating that before the resumption of Chinese sovereignty there already existed a uniquely Hong Kong brand of hypermarketized and oligopolistic media system. The system encouraged by the British colonial government was subsequently aggravated by the Chinese government. This peculiar system is highly susceptible to state intervention and structurally disadvantaged dissent and marginal groups before and after 1997. The book stresses that this hypermarketized media system has been constantly challenged. Through a historical study of media stigmatization of youth, this book proposes that over the years various counterforces have penetrated the structurally lopsided Hong Kong media: independent public, popular and news media all make

occasional subversive alliances to disrupt the mainstream and news media with a strong liberal professionalism provide the most subversive space for challenging cultural hegemony The book offers an alternative and fascinating account of the dynamics between hegemonic closure and day to day resistance in Hong Kong media in both the colonial and post colonial eras arguing that the Hong Kong case generates important insights for understanding ideological struggles in capitalist media

Covering the Body Barbie Zelizer, 1992-10-15 Covering the Body the title refers to the charge given journalists to follow a president is a powerful reassessment of the media's role in shaping our collective memory of the assassination at the same time as it used the assassination coverage to legitimize its own role as official interpreter of American reality Of the more than fifty reporters covering Kennedy in Dallas no one actually saw the assassination And faced with a monumentally important story that was continuously breaking most journalists had no time to verify leads or substantiate reports Rather they took discrete moments of their stories and turned them into one coherent narrative blurring what was and was not professional about their coverage
