Eden and the Fall - the Fallacies of Radical Ecological History, 1999 Radical ecology claims to be a new movement at the cutting edge of social change offering a solution to current social and ecological problems through the rejection of reformist ecological politics in favour of a radical restructuring of industrial and especially Western society The claim to have discovered the historical cause of current ecological and social problems plays a key role in validating this radical approach Although numerous interpretations of the historical origins of existing social and ecological problems exist within radical ecology three main variants have been identified This thesis critically examines the three main variants of radical ecological history the belief in primal harmony the belief in the civilisation of the goddess and its destruction by a Kurgan invasion and the view that the rise of capitalism and the mechanistic world view was responsible for the ecological and social crises of today In so doing it also examines a number of key questions central to radical ecological history when did violence and hierarchy begin in human history is it possible to argue that today s ecological crisis has a religious cause and can the scientific technological and commercial revolutions be truly described as purely Western phenomena The main findings of this thesis are that each of these variants of radical ecological history is chronically flawed In addition to numerous empirical errors each of these historical interpretations is based on an extremely simplistic Eurocentric reading of the past based on the use of archetypal stereotypes of good and evil that have little or no historical foundation While these interpretations of history vary profoundly they are all based on the same underlying model of history whose origins lie in the Judeo Christian apocalyptic tradition and ultimately in Zoroastrianism While some of the flaws of radical ecological history are a result of poor scholarship it is argued that it is the use of t

Critical Ecofeminism Greta Gaard,2017-06-16 Australian feminist philosopher Val Plumwood coined the term critical ecofeminism to situate humans in ecological terms and non humans in

ethical terms for the two tasks are interconnected and cannot be addressed properly in isolation from each other. Various using the terms critical ecological feminism, critical anti dualist ecological feminism and critical ecofeminism. Plumwood's work developed amid a range of perspectives describing feminist intersections with ecopolitical issues i.e. toxic production and toxic wastes, indigenous sovereignty, global economic justice, species justice, colonialism and dominant masculinity. Well over a decade before the emergence of posthumanist theory and the new materialisms, Plumwood's critical ecofeminist framework articulates an implicit posthumanism and respect for the animacy of all earthothers, exposing the linkages among diverse forms of oppression and providing a theoretical basis for further activist coalitions and interdisciplinary scholarship. Had Plumwood lived another ten years, she might have described her work as Anthropocene Ecofeminism, Critical Material Ecofeminism, Posthumanist Anticolonial Ecofeminism; all of these inflections are present in her work. Here, Critical Ecofeminism advances upon Plumwood's intellectual activist and scholarly work by exploring its implications for a range of contemporary perspectives and issues: critical animal studies, plant studies, sustainability studies, environmental justice, climate change and climate justice, masculinities and sexualities. With the insights available through a critical ecofeminism, these diverse eco justice perspectives become more robust.

The Impossible Community John P. Clark, 2013-06-06. This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com. *The Impossible Community* confronts a critical moment when social and ecological catastrophe loom, the Left seems unable to articulate a response and the Right is monopolizing public debates. This book offers a reformulation of anarchist social and political theory to develop a communitarian anarchist solution. It argues that a free and just social order requires a radical transformation of the modes of domination exercised through social ideology and institutional structures. Communitarian anarchism unites a universalist concern for social and ecological justice while recognizing the integrity and individuality of the person. In fact, anarchist principles of mutual aid and voluntary cooperation can already be seen in various contexts, from the rebuilding of New Orleans after Katrina to social movements in India. This work offers both a theoretical framework and concrete case studies to show how contemporary anarchist practice continues a long tradition of successfully synthesizing personal and communal liberation. This significant contribution will appeal not only to students in anarchism and political theory but also to activists.
