Plank, 2012-09-10 Co published by Routledge for the American Educational Research Association AERA Educational policy continues to be of major concern Policy debates about economic growth and national competitiveness for example commonly focus on the importance of human capital and a highly educated workforce Defining the theoretical boundaries and methodological approaches of education policy research are the two primary themes of this comprehensive AERA sponsored Handbook Organized into seven sections the Handbook focuses on 1 disciplinary foundations of educational policy 2 methodological perspectives 3 the policy process 4 resources management and organization 5 teaching and learning policy 6 actors and institutions and 7 education access and differentiation Drawing from multiple disciplines the Handbook s over one hundred authors address three central questions What policy issues and questions have oriented current policy research What research strategies and methods have proven most fruitful And what issues questions and methods will drive future policy research Topics such as early childhood education school choice access to higher education teacher accountability and testing and measurement cut across the 63 chapters in the volume The politics surrounding these and other issues are objectively analyzed by authors and commentators Each of the seven sections concludes with two commentaries by leading scholars in the field The first considers the current state of policy design and the second addresses the current state of policy research This book is appropriate for scholars and graduate students working in the field of education policy and for the growing number of academic government and think tank researchers engaged in policy research For more information on the American Educational Research Association please visit <http://www.aera.net> *Australian national bibliography* , 1961 Case Studies In Educational Change David Carter, 2012-10-12 This text the second in a two volume set examining the process of educational reform describes case studies on the change process of education as it impacts on the individual at work The authors provide interesting comparisons of similar changes occurring within education in different national settings including Australia New Zealand Israel the USA and the UK The case studies are based on three themes systematic change the transition from policy to practice and curriculum contexts The effects of governmental control over the curriculum and attempts to reform education by legislation are explained and the similarities are seen as marginalisation of professional educators corporatisation of education systems instrumentalisation of curriculum and the inability of those in power to draw from past knowledge on educational change Written to stand alone this book can also be read in conjunction with volume 1 International Perspectives on Educational Reform and Policy Implementation which examines the historical social and economic influences on education policy reform The authors argue that change takes a predictable format and once

understood can be directed and managed The books are intended to be of interest to all involved in the planning and implementation of change together pointing the way to effective management of such change processes Monthly Catalog of United States Government Publications United States.
