Nollet, Hamir Singh Rathore, 2015-01-22 The need to feed an ever growing global population combined with increasing demand for sustainable agricultural practices has generated a significant rise in demand for biopesticides By responding concurrently to the interests of farming forestry and industrial sectors biopesticides offer a considerable potential for utilization in sustainable

Biorational Control of Arthropod Pests Isaac Ishaaya, A.

Rami Horowitz,2009-08-28 For nearly 50 years pest control was mostly based on broad spectrum conventional insecticides such as organochlorines organophosphates carbamates and pyrethroids However the severe adverse effects of pesticides on the environment problems of resistance reaching crisis proportions and public protests led to stricter regulations and legislation aimed at reducing their use Ways to reduce the use of synthetic pesticides in plant protection and to use more alternative and novel methods for pest control or biorational control are the challenges of pest control for the twenty first century The term biorational biological rational pesticides can be defined as the use of specific and selective chemicals often with a unique modes of action that are compatible with natural enemies and the environment with minimal effect on n target organisms Biorational control is based on a diversity of chemical biological and physical approaches for controlling insect pests which results in minimum risk to man and the environment *Insect Sex Pheromone Research and Beyond* Yukio Ishikawa,2020-03-19 This book provides a complete overview of cutting edge research on insect sex pheromones and pheromone communication systems The coverage ranges from the chemistry biosynthesis and reception of sex pheromones to the control of odor source searching behavior and from molecules to the application of research findings to robotics The book both summarizes the progress of studies conducted using *Bombyx mori* and several groups of moths and reviews sex pheromones of some non lepidopteran insect groups of agricultural importance Attention is drawn to recent findings on elaborate neural information processing in the brain in male moths and to the importance of olfactory receptors specifically tuned to sex pheromone molecules Featuring contributions from leading experts on the topic this book will be a unique and valuable resource for researchers and students in the fields of entomology chemical ecology insect physiology and biochemistry evolution biomimetics and bioengineering In addition to researchers general insect lovers will find the book fascinating for its descriptions of the marvelous abilities of insects and the underlying mechanisms involved **Allelopathy, the Effects of Chemicals Produced by Plants** Henry Gilbert,1994 **Allelopathy** Henry Gilbert,1994-12 244 citations covering the effects of chemicals produced by plants Author and subject indexes Handbook of Pest Management John R. Ruberson,1999-07-09 Provides a detailed summary of pest management principles and techniques outlining a broad selection of critical issues regarding current practice and future technology in this area Discusses the role of soils weather and surrounding habitats in regulating pest occurrence and severity Insect Ecology: Concepts to Management K.
