Sense Of Common Ground:

A Sense of Common Ground Fazal Sheikh, 1996 *Teaching the Arts Behind Bars* Rachel Marie-Crane Williams, 2003
America's two million incarcerated men, women and youth live in a hidden, isolated world filled with depression, anxiety, hostility and violence. But the nation's soaring prison population has not been forgotten by a dedicated network of visual artists, writers, poets, dancers, musicians and actors who teach the arts in correctional settings. This anthology compiles the narratives of several accomplished arts in corrections teachers who share their personal experiences, philosophies and bittersweet anecdotes as well as practical advice, survival skills and program evaluation guidelines. *Teaching the Arts Behind Bars* is an invaluable tool for artists, program administrators and corrections professionals and a testament to the power of creative expression in promoting communication, positive social interaction, inner healing and self-esteem. *A Sense of Common Ground*, 2003 **A sense of common ground** Fazal Sheikh (Photograph, USA, Afghanistan), 1996

Mathematisation and Demathematisation, 2007-01-01 In this volume, scholars from diverse strands of research have contributed their perspectives on a process of mathematisation which renders social, economical or political relationships increasingly formal. At the same time, mathematical skills lose their importance as they become replaced by diverse technological tools. A process of demathematisation takes place. The computerization of financial transactions, calculation of taxes and fees, comparison of prices as well as orientation by means of GPS, visualisation of complex data and electronic voting systems all these mathematical technologies increasingly penetrate the lifestyle of consumers. What are the perils and promises of this development? Who is in charge, who is affected, who is excluded? A common concern of all the authors of this volume is an attempt to draw attention to issues related to the formatting power of mathematics and to its role as implicit knowledge which results in a process of demathematisation. This process, having once received considerable attention, is now threatened to be eclipsed by the proliferation of a discussion of school mathematics which shows a tendency of cutting off its own philosophical and political roots. Taken together, the contributions reveal a rather complex picture. They draw attention to the importance of clarifying epistemological, societal and ideological issues as a prerequisite for a discussion of curriculum.

Christ-Oriented Expository Preaching Kyoochan Lee, 2020-07-24 This book provides an exegetical, theological, rhetorical paradigm: the Christ-oriented approach (Lk 24:27-44) that facilitates accuracy, effectiveness and practicality in preaching the New Testament. Use of the Old Testament in providing a practical expository model and sermon preparation evaluation principles: this work moves beyond the level of theory into the realm of praxis and will thus appeal to practitioners as well as to academics. *Clusivity* Anna Ewa Wieczorek, 2014-09-18 Dealing with the concepts of inclusion and exclusion encoded linguistically, both implicitly and explicitly, this book develops an original framework for the analysis of these phenomena in political discourse. The approach taken situates political discourse in a broader context of social and psychological relations between groups and their members which influence the manner in which the speaker's message is constructed and

construed by individuals The present study proposes a pragmatic cognitive model which underlies and explains the discursive representation of belongingness and dissociation in terms of the conceptual location of various discourse entities in the Discourse Space cf Chilton 2005 The model in question is concerned with three mechanisms which combined form a fully fledged apparatus for the analysis of the legitimising power of association and dissociation in political discourse through positive self and negative other presentation tactics The study is a theoretical enterprise which however includes a comprehensive empirical part whose aim is to evaluate and confirm the theoretical assumptions made The focus is essentially on the relationship between the speaker and the addressees and the speaker's attempt to maintain it discursively Thus Clusivity A New Approach to Association and Dissociation in Political Discourse will appeal to discourse analysts pragmaticians and cognitive analysts as well as to political and social sciences analysts social psychologists journalists and speechwriters

Communicating (with) Care Sarah

Bigi,2016-08-15 At the start of studies on health communication scholars were primarily concerned with showing the ethical implications of a new approach to care and with collecting evidence to demonstrate its greater effectiveness as opposed to the paternalistic and mechanistic paradigms Well into the second decade of the 21st century different issues need to be addressed Aging populations and the spread of chronic diseases are challenging the sustainability of health care systems worldwide increased awareness of health issues among the population and greater citizen participation seem to threaten clinicians authority In this new scenario it is acknowledged that the quality of verbal communication plays a crucial role but it is still not clear how it impacts on the outcomes of care which are its constitutive components and how it interacts with the institutional cultural and social context of interactions This book suggests that the time is ripe for a fresh start in health communication studies As Debra Roter points out in her foreword this proposal is ambitious in attempting to integrate perspectives derived from pragmatics and argumentation theory with those derived from quantitative methods of medical interaction analysis and its prediction of outcomes On the other hand as Giovanni Gobber explains in his foreword health communication can profit from an application of a performance oriented linguistic analysis that pays attention to the role of the various relevant context factors in speech events related to specific activity types In this way the open questions regarding communication in medical encounters are considered under a new light The answers provided open up novel lines of research and provide an original perspective to face the new challenges in medical care The Routledge Handbook of Mapping and Cartography Alexander Kent,Peter Vujakovic,2017-10-04 This new Handbook unites cartographic theory and praxis with the principles of cartographic design and their application It offers a critical appraisal of the current state of the art science and technology of map making in a convenient and well illustrated guide that will appeal to an international and multi disciplinary audience No single volume work in the field is comparable in terms of its accessibility currency and scope The Routledge Handbook of Mapping and Cartography draws on the wealth of new scholarship and practice in this emerging field from the latest conceptual developments in mapping and advances in map making technology to reflections on the role of maps in society It brings together 43 engaging chapters on a diverse range of topics including the history of cartography map use and user issues cartographic design remote sensing volunteered geographic information VGI and map art The title s expert contributions are drawn from an international base of influential academics and leading practitioners with a view to informing theoretical development and best practice This new volume will provide the reader with an exceptionally wide ranging introduction to mapping and cartography and aim to inspire further engagement within this dynamic and exciting field The Routledge Handbook of Mapping and Cartography offers a unique reference point that will be of great interest and practical use to all map makers and students of geographic information science geography cultural studies and a range of related disciplines **Leadership, Violence, and School Climate** Kyle E. Blanchfield,Peter D. Ladd,2013-07-01 In the book Leadership Violence and School Climate Case Studies in Creating Non Violent Schools three important themes are

emphasized namely democratic leadership violence and school climate The book recognizes that safety should be the first issue of concern when addressing school violence However violence in schools should not be the sole concern of outside experts who advocate for lock downs metal detectors and bullet proof glass Through democratic school leadership violence can be reduced by those professionals actually working in schools The book emphasizes that reduction in school violence originates from school leaders having a comprehensive understanding of the climate found in schools Leadership violence and school climate are connected through the use of democratic principles that address crisis trauma empowerment common ground critical thinking assertiveness and others The book points out how schools can reverse their reactionary stance to violence and become pro active through the practice of democratic principles *Intercultural Pragmatics* Istvan Kecskes, 2014 In *Intercultural Pragmatics* the first book on the subject Istvan Kecskes establishes the foundations of the field boldly combining the pragmatic view of cooperation with the cognitive view of egocentrism in order to incorporate emerging features of communication

The Construction of 'Ordinariness' across Media Genres Anita Fetzer, Elda Weizman, 2019-12-15 Departing from the premise that being ordinary is brought into the discourse and brought out in the discourse and is thus an interactional achievement the contributions to this edited volume investigate its construction reconstruction and deconstruction in media discourse Ordinariness is perceived as a scalar notion which is conceptualised against the background of both non ordinariness and extra ordinariness The chapters address its strategic construction across media genres public talk Prime Minister's Questions interview radio call in commenting and discursive activities tweets social media posts as done in various languages American English Austrian German British English Chinese French Finnish Hebrew and Japanese by professional participants e.g. politicians journalists scientists and by ordinary people participating in media discourse e.g. ordinary citizens viewers members of the audience Discursive strategies used to bring about non extra ordinariness include small stories quotations conversational style irony naming and addressing as well as references to the private public interface

Lying and Insincerity Andreas Stokke, 2018-06-28 Andreas Stokke presents a comprehensive study of lying and insincere language use He investigates how lying relates to other forms of insincerity and explores the kinds of attitudes that go with insincere uses of language Part I develops an account of insincerity as a linguistic phenomenon Stokke provides a detailed theory of the distinction between lying and speaking insincerely and accounts for the relationship between lying and deceiving A novel framework of assertion underpins the analysis of various kinds of insincere speech including false implicature and forms of misleading with presuppositions prosodic focus and semantic incompleteness Part II sets out the relationship between what is communicated and the speaker's attitudes Stokke develops the view of insincerity as a shallow phenomenon that is dependent on conscious attitudes rather than deeper motivations The various ways of speaking while being indifferent toward what one communicates are covered and the phenomenon of bullshitting is distinguished from lying and other forms of insincerity Finally an account of insincere uses of interrogative imperative and

exclamative utterances is also given
