The Rise and Fall of Scottish Common Sense Realism Douglas McDermid, 2018-03-09 The Rise and Fall of Scottish Common Sense Realism examines the ways in which five Scottish philosophers Lord Kames 1696 1782 Thomas Reid 1710 1796 Dugald Stewart 1753 1828 Sir William Hamilton 1788 1856 and James Frederick Ferrier 1808 1864 tackled a problem which has haunted Western philosophy ever since Descartes that of determining whether any form of perceptual realism is defensible or whether the very idea of a material world existing independently of perception and thought is more trouble than it is worth This century long conversation about the relation between mind and world led these five Scots to think uncommonly hard about a host of challenging issues in epistemology metaphysics philosophy of mind and meta philosophy In order to present each philosopher's views in a fair and reasonably charitable light Douglas McDermid has tried to identify the main problems each was attempting to solve to relate his work to that of his predecessors where possible to describe the mistakes real or perceived he was particularly anxious to correct to explain the internal logic of his position and to discuss some of the main objections which he anticipated and tried to rebut McDermid's hope is that even seasoned students of the realism controversy may learn something new and valuable from this exercise if only because he has chosen to focus not on the usual suspects Descartes Locke Berkeley Hume and Kant but on a fresh and undervalued cast of characters *Elements of Mental Philosophy Embracing the Two Departments of the Intellect and the Sensibilities* Thomas C. Upham, 2024-08-14
