Separate City:

The Separate City Christopher Silver, John V. Moeser, 2021-10-21 A ground breaking collaborative study merging perspectives from history political science and urban planning *The Separate City* is a trenchant analysis of the development of the African American community in the urban South While similar in some respects to the racially defined ghettos of the North the districts in which southern blacks lived from the pre World War II era to the mid 1960s differed markedly from those of their northern counterparts The African American community in the South was and to some extent still is a physically expansive distinct and socially heterogeneous zone within the larger metropolis It found itself functioning both politically and economically as a separate city a city set apart from its predominantly white counterpart Within the separate city itself internal conflicts reflected a structural divide between an empowered black middle class and a larger group comprising the working class and the disadvantaged Even with these conflicts the South's new black leadership gained political control in many cities but it could not overcome the economic forces shaping the metropolis The persistence of a separate city admitted to the profound ineffectiveness of decades of struggle to eliminate the racial barriers with which southern urban leaders indeed all urban America continue to grapple today [Options for Cable Legislation](#) United States. Congress. House. Committee on Energy and Commerce. Subcommittee on Telecommunications, Consumer Protection, and Finance, 1984 [City Limits](#) Keith Hayward, 2016-07-18 *City Limits* contributes to a growing body of work under the umbrella of cultural criminology which attempts to bring an appreciation of cultural change to an understanding of crime in late modernity Hayward and Young 2004 Hayward presents an ambitious theoretical analysis that attempts to inspire a cultural approach to understanding the crime city nexus and in particular to re address strain and the concept of relative deprivation in the context of a culture of consumption The book incorporates an impressive array of literature from beyond the boundaries of traditional criminology including urban studies social theory and most strikingly from art and architectural criticism illustrating a multidisciplinary approach This provides for a challenging and enlightening read with a particularly important emphasis on the impact of consumer culture on the lived urban experience and spatial dynamics of the city and in turn for an understanding of transgression and criminality Runner up for the British Society of Criminology Book Prize 2004

The Growth of the Medieval City David M Nicholas, 2014-06-17 The first part of David Nicholas's massive two volume study of the medieval city this book is a major achievement in its own right It is also fully self sufficient though many readers will want to use it with its equally impressive sequel which is being published simultaneously In it Professor Nicholas traces the slow regeneration of urban life in the early medieval period showing where and how an urban tradition had survived from late antiquity and when and why new urban communities began to form where there was no such continuity He charts the different types and functions of the medieval city its interdependence with the surrounding countryside and its often fraught relations with secular authority The book ends with the critical changes of the late thirteenth century that established an

urban network that was strong enough to survive the plagues famines and wars of the fourteenth and fifteenth centuries

C.** Raphael Sealey, 1976-10-28 This book introduces the reader to the serious study of Greek history concentrating more on problems than on narrative The topics selected have been prominent in modern research and references to important discussions of these have been provided Outlined are controversial issues of which differing views can be defended Mr Sealey's preference is for interpretations which see Greek history as the interaction of personalities rather than for those which see it as a struggle for economic classes or of abstract ideas Sealey assumes that the Greek cities of the archaic and classical periods did not inherit any political institutions from the Bronze Age that the extensive invasions that brought Mycenaean civilization to an end destroyed political habits as effectively as stone palaces Accordingly he believes that the Greeks of the historic period were engaged in the fundamental enterprise of building organized society out of nothing The first chapters of this work deal with the steps taken by the early tyrants in Sparta and Athens toward constructing stable organs of authority and of political expression In later chapters interest shifts to relations that developed between the states and especially to the development of lasting alliances Attention is given to the Peloponnesian League to the Persian Wars to the Delian League and to the Second Athenian Sea League of the fourth century
