Separate Roads (Ribbons West Book #2) Judith Pella, Tracie Peterson, 2011-11-01 Book Two in repackaged RIBBONS WEST Series While the Civil War is raging Brenton Baldwin has promised to provide a safe escort to California for Caitlan O Connor But now that his heart is totally hers how can he leave her once they finally arrive Meanwhile Kiernan and Victoria O Connor struggle as his work on the Central Pacific Railroad keeps them separated for long periods of time Then a devastating accident with explosives suddenly changes everything What will this mean for all of them **Separate Roads to Feminism**

Benita Roth, 2004 This examines the emergence of feminist movements from the Civil Rights Black Liberation movement the Chicano movement and the white left in the 1960s and 1970s The author argues that the second wave was comprised of feminisms organizationally distinct movements that influenced each other in complex ways The making of second wave feminisms resulted from decisions that feminists made about their political choices given constraints that affected their activism These constraints were placed on them by structural inequalities that militated against unity among feminists from different racial ethnic communities by loyalties that feminists particularly feminists of color felt to other members of their movement communities and by the necessity of making political decisions within a competitive and complex extra

Gender Equity in Education and the Road to Title IX Eileen H. Tamura, 2022-08-19 This book provides a comprehensive history of the passage of Title IX the key legislation to bring about gender equity in education Using a variety of primary source material this historical study uses sociological conceptual frameworks to analyze feminist activism in the 1960s that culminated in the 1970s with Title IX and its regulation It mines the field of social network theory and uses concepts from social movement theory to highlight issues that undergirded the struggle to open up the system for women and show how activists were able to achieve their goals Throughout the volume highlights interactions between and among various groups proponents of the women s movements political figures administrative bodies and policy specialists **Network Economics**

Günter Knieps, 2014-11-14 This textbook on network economics provides essential microeconomic instruments for the analysis of network sectors like telecommunications transport or energy Network specific characteristics emerge both on the cost side and benefit side requiring network providers to develop innovative entrepreneurial competition strategies for costing pricing and investment From a competition policy perspective a number of interesting questions arise In which parts of networks is competition functional In contrast where is an abuse of market power to be expected What is the division of labor between cartel authorities and regulatory agencies The book develops an analytical framework for all network industries which allows readers to study entrepreneurial strategies as well as regulation and competition policies for network industries **Driver Expectancy in Highway Design and Traffic Operations** Gerson J. Alexander, 1986 Expectancy

relates to a driver's readiness to respond to situations, events and information in predictable and successful ways. This report describes the concept of driver expectancy in the context of the driving task and provides examples of expectancy and expectancy violations. It includes a procedure for identifying general and specific expectancy violations to enable engineers to develop remedial treatments to deal with expectancy problems. **Upper Deschutes Resource Management Plan**, 2005

Social Controversy and Public Address in the 1960s and Early 1970s Richard J. Jensen, 2017-10-01 The period between the 1960s and 1970s is easily one of the most controversial in American history. Examining the liberal movements of the era as well as those that opposed them, this volume offers analyses of the rhetoric of leaders including those of the civil rights movement, the Chicano movement, the gay rights movement, second wave feminism, and conservative resistance groups. It also features an introduction that summarizes much of the significant research done by communication scholars on dissent in the 1960s and 1970s. This time period is still a fertile area of study, and this book provides insights into the era that are both provocative and illuminating, making it an essential read for anyone looking to learn more about this time in America.

Faux Feminism Serene Khader, 2024-10-29 For readers of *Hood Feminism* and *Against White Feminism*: An incisive examination of why the pillars of feminism have eroded and how all women, not just the girlbosses, can rebuild them. After over 175 years, the feminist movement, now in its fourth wave, is at risk of collapsing on its eroding foundation. In *Faux Feminism*, political philosopher Serene Khader advocates for another feminism, one that doesn't overwhelmingly serve white affluent girlbosses. With empathy, passion, and wit, Khader invites the reader to join her as she excavates the movement's history and draws a blueprint for a more inclusive and resilient future. A feminist myth buster, Khader begins by deconstructing faux feminisms. Thought to be the pillars of good feminism, they may appeal to many but in truth leave most women behind. Khader identifies these traps that white feminism lays for us all, asking readers to think critically about The Freedom Myth, The overarching misconception that feminism is about personal freedom rather than collective equality; The Individualism Myth, The pervasive idea that feminism aims to free individual women from social expectations; The Culture Myth, The harmful misconception that other cultures restrict women's liberation; The Restriction Myth, The flawed belief that feminism is a fight against social restrictions; The Judgment Myth, The fallacy of celebrating women's choices without first interrogating the privileges afforded or denied to the women. In later chapters, Khader draws on global and intersectional feminist lessons of the past and present to imagine feminism's future. She pays particular attention to women of color, especially those in the Global South. Khader recounts their cultural and political stories of building a more inclusive framework in their societies. These are the women she argues from whom today's feminists can learn. Khader's critical inquiry begets a new vision of feminism, one that tackles inequality at the societal, not individual, level and is ultimately rooted in community. *The Commercial & Financial Chronicle ...*, 1903 **Public Finance and Public Policy** Arye L. Pradhan, Maher Ibrahim Sameen, 2019-04-02 This book aims to promote the core understanding of a proper modelling of road traffic accidents by deep learning methods using traffic information and road geometry delineated from laser scanning data. The first two chapters of the book introduce the reader to laser scanning technology with creative explanation and graphical illustrations review and recent methods of extracting geometric road parameters. The next three chapters present different machine learning and statistical techniques applied to extract road geometry information from laser scanning data. Chapters 6 and 7 present methods for modelling roadside features and automatic road geometry identification in vector data. After that this book goes on reviewing methods used for road traffic accident modelling including accident frequency and injury severity of the traffic accident. Chapter 8 Then the next chapter explores the details of neural networks and their performance in predicting the traffic accidents along with a comparison with common data mining models. Chapter 10 presents a novel hybrid model combining extreme gradient boosting and deep neural networks for predicting injury severity of road traffic accidents. This chapter is followed by deep learning applications in modelling accident data using feed forward convolutional recurrent neural network models. Chapter 11 The final chapter Chapter 12 presents a procedure for modelling traffic accident with little data based on the concept of transfer learning. This book aims to help graduate students professionals decision makers and road planners in developing better traffic accident prediction models using advanced neural networks.
