Andrews, 1983-06-30 In *Presidential Government in Gaullist France* William G Andrews describes and explains the basic character of executive legislative relations in Gaullist France from 1958 to 1974 He demonstrates that the Fifth Republic became presidential despite its parliamentary constitution because of changes made by DeGaulle that were compatible with the emergent character of French society The information is provided in a conceptual framework that gives it greater coherence explanatory value and significance Andrews relates differences in the nature of institutions of societies and of political problems to types of power relationships that exist between the legislative and executive branches of government In order to achieve an objective appraisal of the controversial leader Andrews fits DeGaulle's constitutional efforts into a broader understanding of the relationships among great leaders texts societies and institutions The book enhances our understanding of the operation of the Fifth Republic and of French government in general **Transactions of the Sixth International Congress on Large Dams, 15-20 September, 1958, New York, 1959** **Brazilian Bulletin, 1957** **Proceedings of the 3rd International Symposium on Orbital Disorders Amsterdam, September 5-7, 1977** G.M. Bleeker, 2012-12-06 We have compiled a series of over 300 consecutive cases of unilateral exophthalmos with definitive diagnosis of the causes of disease process and an adequate follow up period Orbital and periorbital tumors constitute 34% of this series inflammatory diseases including thyroid disorders 50% arteriovenous abnormalities 4% and miscellaneous disorders 12% All patients were thoroughly evaluated clinically and with appropriate diagnostic tests including ultrasonography combined A scan and B scan computerized axial tomography EMI cranial scan and radiographic techniques plain films and hypocycloidal polytomography orbital

venography and carotid arteriography Each test was found to have diagnostic capabilities which complemented other studies depending upon the specific disease process involved No one test was entirely adequate without the others Radiographic studies demonstrated bony abnormality in 50% of tumor cases but in only 28% of the entire series of exophthalmos cases Primary orbital tumors had a lower yield with radiography than did secondary tumors Computerized tomography demonstrated diagnostic soft tissue abnormality in 86% of tumors 43% of inflammatory diseases and an overall yield of 62% positive results Ultrasonography proved the most versatile test for evaluation of orbital soft tissues with 80% positive results for tumors 87% for inflammatory disorders and 78% overall accurate diagnosis *AF Press Clips* ,1967-07

Periodicals Division,1902 **Industrial Espionage and Technology Transfer** John R. Harris,2017-07-05 Britain and France were the leading industrial nations in 18th century Europe This book examines the rivalry which existed between the two nations and the methods used by France to obtain the skilled manpower and technology which had given Britain the edge particularly in the new coal based technologies Despite the British Act of 1719 which outlawed industrial espionage and technology transfer France continued to bring key industrial workers from Britain and to acquire British machinery and production methods Drawing on a mass of unpublished archival material this book investigates the nature and application of British laws and the involvement of some major British industrialists in these issues and discusses the extent to which French espionage had any real success In the process it presents an in depth understanding of 18th century economies and the cultures and bureaucracies which were so important in shaping economic life Above all the late John Harris saw the history of industrial espionage as one means of restoring the thoughts and activities of human beings to the centre stage of industrial history These are the stories of individuals Holkers Trudaines Wilkinsons or Milnes and their impact on the world **Operatic Geographies** Suzanne Aspden,2019-04-22 Since its origin opera has been identified with the performance and negotiation of power Once theaters specifically for opera were established that connection was expressed in the design and situation of the buildings themselves as much as through the content of operatic works Yet the importance of the opera house's physical situation and the ways in which opera and the opera house have shaped each other have seldom been treated as topics worthy of examination Operatic Geographies invites us to reconsider the opera house's spatial production Looking at opera through the lens of cultural geography this anthology rethinks the opera house's landscape not as a static backdrop but as an expression of territoriality The essays in this anthology consider moments across the history of the genre and across a range of geographical contexts from the urban to

the suburban to the rural and from the Old world to the New One of the book s most novel approaches is to consider interactions between opera and its environments that is both in the domain of the traditional opera house and in less visible more peripheral spaces from girls schools in late seventeenth century England to the temporary arrangements of touring operatic troupes in nineteenth century Calcutta to rural open air theaters in early twentieth century France The essays throughout Operatic Geographies powerfully illustrate how opera s spatial production informs the historical development of its social cultural and political functions

John Law James Buchan,2018-09-06 At the summit of his power John Law was the most famous man in Europe Born in Scotland in 1671 he was convicted of murder in London and after his escape from prison fled Scotland for the mainland when Union with England brought with it a warrant for his arrest On the continent he lurched from one money making scheme to the next selling insurance against losing lottery tickets in Holland advising the Duke of Savoy amassing a fortune of some 80 000 But for his next trick he had grander ambitions When Louis XIV died leaving a thoroughly bankrupt France to his five year old heir Law gained the ear of the Regent Philippe D Orleans In the years that followed Law s financial wizardry transformed the fortunes of France enriching speculators and investors across the continent and he was made Controller General of Finances effectively becoming the French Prime Minister But the fall from grace that was to follow was every bit as spectacular as his meteoric rise John Law by a biographer of Adam Smith and the author of Frozen Desire and Capital of the Mind dramatises the life of one of the most inventive financiers in history a man who was born before his time and in whose day the word millionaire came to be coined
