cultural linguistic and personal negotiations This book presents a trans disciplinary framework for conceptualising international students and lecturers practices within the institutional structure This framework has been developed by drawing on a modified version of Lillis heuristic of talk around text and positioning theory The framework enables an exploration of not only the reasons underpinning international students specific ways of meaning making but also their potential choices in constructing knowledge A distinctive contribution of the book is the development of a dialogical pedagogic model for mutual adaptation between international students and academics rather than the onus being on exclusive adaptation from the students Existing research on international education indicates the significance of reciprocal adaptation between international students and academics Yet very little has been done to conceptualise what mutual adaptation means and what is involved in this process The dialogical model introduced in this book offers concrete steps towards developing reciprocal adaptation of international students and academics within the overarching institutional realities of the university It can be used as a tool to enhance the education of international students in this increasingly internationalised environment This book is a significant contribution to the field of international education It takes a critical stance on contemporary views of globally mobile students The insights into international students voices hidden intentions and their potential choices in meaning making presented in this book will attract dialogues about the critical issues related to inclusive practices internationalised curriculum and institutional responses to the diverse needs of international students
