Materials For A Balance Of The Soviet Economy 1928 193:

Materials for a Balance of the Soviet National Economy, 1928-1930 Soviet Union. T[?]S[?]entral'noe upravlenie narodnokhozi[?]a[?]istvennogo ucheta, 1985 Newly translated materials from the years of mass collectivisation and the launching of the Soviet industrialisation drive

The Soviet Defence Industry Complex from Stalin to Krushchev J. Barber, M. Harrison, 1999-12-08 The huge complex of Soviet institutions and enterprises specialised in military production powerfully influenced the course of the twentieth century through resistance to imperial Japan the defeat of Nazi Germany and nuclear stalemate with America in the Cold War Based on collaborative research by Russian and British scholars in the hitherto secret archives of the Soviet government party and armed forces this book is a pioneering investigation of the economic dynamics and social and political significance of Soviet defence

The Political Economy of Stalinism Paul R. Gregory, 2003-10-27 This book uses the formerly secret Soviet state and Communist Party archives to describe the creation and operations of the Soviet administrative command system It concludes that the system failed not because of the jockey i e Stalin and later leaders but because of the horse the economic system Although Stalin was the system s prime architect the system was managed by thousands of Stalins in a nested dictatorship The core values of the Bolshevik Party dictated the choice of the administrative command system and the system dictated the political victory of a Stalin like figure This study pinpoints the reasons for the failure of the system poor planning unreliable supplies the preferential treatment of indigenous enterprises the lack of knowledge of planners etc but also focuses on the basic principal agent conflict between planners and producers which created a sixty year reform stalemate

Some British Empiricists in the Social Sciences, 1650-1900 Richard Stone, 1997 This book describes the development of economic demographic and social statistics in the British Isles from the mid seventeenth century to the end of the nineteenth as represented by the work of twelve pioneers in these fields Its most distinctive feature is its tables which bring together in clear and succinct form an impressive body of data collected from a large number of disparate sources and are complemented by an exhaustive description of their historical context An important aspect of the book is the short biographies that open each chapter and bring to life the personalities of its central characters

Regime and Society in Twentieth-Century Russia Ian D. Thatcher, 2016-07-27 This book contains fresh approaches to the interaction between regime and society in twentieth century Russia It offers new answers to familiar questions How useful is totalitarianism as a model to categorise authoritarian regimes What chances existed for tsarism to establish itself as a constitutional monarchy Were Trotsky and Lenin dictators in waiting How did the Bolsheviks make the Lenin cult What opposition did intellectuals offer in the Soviet regime What is the nature of contemporary Russian constitutionalism It is required reading for historians political scientists sociologists and everyone interested in modern Russia

Farm to Factory Robert C. Allen, 2021-07-13 To say that history s greatest economic experiment Soviet communism was also its greatest economic failure is to say what many consider obvious Here in a startling reinterpretation

Robert Allen argues that the USSR was one of the most successful developing economies of the twentieth century. He reaches this provocative conclusion by recalculating national consumption and using economic demographic and computer simulation models to address the what if questions central to Soviet history. Moreover by comparing Soviet performance not only with advanced but with less developed countries he provides a meaningful context for its evaluation. Although the Russian economy began to develop in the late nineteenth century based on wheat exports modern economic growth proved elusive. But growth was rapid from 1928 to the 1970s due to successful Five Year Plans. Notwithstanding the horrors of Stalinism the building of heavy industry accelerated growth during the 1930s and raised living standards especially for the many peasants who moved to cities. A sudden drop in fertility due to the education of women and their employment outside the home also facilitated growth. While highlighting the previously underemphasized achievements of Soviet planning Farm to Factory also shows through methodical analysis set in fluid prose that Stalin's worst excesses such as the bloody collectivization of agriculture did little to spur growth. Economic development stagnated after 1970 as vital resources were diverted to the military and as a Soviet leadership lacking in original thought pursued wasteful investments. *Slavic Review*, 1991
