Combat Vehicle Weight Reduction by Materials Substitution National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, National Materials and Manufacturing Board, Defense Materials Manufacturing and Infrastructure Standing Committee, 2018-11-12 Vehicle weight reduction is an effective strategy for reducing fuel consumption in civilian vehicles For combat vehicles it presents not only an important opportunity to reduce fuel use and associated logistics but also important advantages in transport and mobility on the battlefield Although there have been numerous efforts in the past to reduce the overall weight of combat vehicles combat vehicle weight has continued to increase over time due to new threats and missions On December 8 and 9 2014 the National Academies of Sciences Engineering and Medicine held a workshop to explore opportunities in lightweight materials for armored vehicles This was the ninth workshop in an ongoing series for the U S military on materials and manufacturing issues The workshop discussed future advances in weight reduction by materials substitution for vehicles including such topics as armor structure automotive parts and armaments This publication summarizes the presentations and discussions from the workshop *Use of Lightweight Materials in 21st Century Army Trucks* National Research Council, Division on Engineering and Physical Sciences, National Materials Advisory Board, Committee on Lightweight Materials for 21st Century Army Trucks, 2003-05-02 In order to achieve the Army's envisioned Objective Force related to deployability transportability and mobility the Committee on Lightweight Materials for the 21st Century Army Trucks was asked to identify research and technology

development opportunities related to the introduction of new lightweight structural materials for light medium and heavy Army trucks *Commercialization of New Manufacturing Processes for Materials* ,1998 **Intermetallic Alloy**

Office of Technology Assessment,1994 Smart Structures Jan Holnicki-Szulc,José Rodellar,2012-12-06 Smart intelligent structures have been the focus of a great deal of recent research interest In this book leading researchers report the state of the art and discuss new ideas results and trends in 43 contributions covering fundamental research issues the role of intelligent monitoring in structural identification and damage assessment the potential of automatic control systems in achieving a desired structural behaviour and a number of practical issues in the analysis and design of smart structures in mechanical and civil engineering applications Audience A multidisciplinary reference for materials scientists and engineers in such areas as mechanical civil aeronautical electrical control and computer engineering **Advanced automotive technology : visions of a super-efficient family car. ,**

Reducing the Logistics Burden for the Army After Next National Research Council,Division on Engineering and Physical Sciences,Commission on Engineering and Technical Systems,Committee to Perform a Technology Assessment Focused on Logistics Support Requirements for Future Army Combat Systems,1999-03-22 This study assesses the potential of new technology to reduce logistics support requirements for future Army combat systems It describes and recommends areas of research and technology development in which the Army should invest now to field systems that will reduce logistics burdens and provide desired capabilities for an Army After Next AAN battle force in 2025 Nonconventional Concrete Technologies National Research Council,Division on Engineering and Physical Sciences,National Materials Advisory Board,Commission on Engineering and Technical Systems,Committee on Nonconventional Concrete Technologies for Renewal of the Highway Infrastructure,1997-03-25 Nonconventional Concrete Technologies Renewal of the Highway Infrastructure identifies research and development opportunities in innovative nonconventional materials and processes that have the potential to accelerate the construction process improve the durability of highway pavement and bridges and enhance the serviceability and longevity of new construction under adverse conditions *Thin-Walled Structures* J.Y. Richard Liew,V. Thevendran,N.E. Shanmugam,1998-11-27 Thin plated structures are used extensively in building construction automobile aircraft shipbuilding and other industries because of a number of favourable factors such as high strength weight ratio development of new materials and processes and the availability of efficient analytical methods This class of structure is made by joining thin plates together at their edges and they rely for their rigidity and strength upon the tremendous stiffness and load carrying capacity of the flat plates from which they are made Many of the problems encountered in these structures arise because of the effects of local buckling The knowledge of various facets of this phenomenon has increased dramatically since the 1960s

Problem areas which were hitherto either too complex for rigorous analysis or whose subtleties were not fully realized have in these years been subjected to intensive study Great advances have been made in the areas of inelastic buckling The growth in use of lightweight strong materials such as fibre reinforced plastics has also been a contributory factor towards the need for advances in the knowledge of the far post buckling range The conference is a sequel to the international conference organised by the University of Strathclyde in December 1996 and this international gathering will provide the opportunity for discussion of recent developments and trends in design of thin walled structures *New at the Energy Library* Energy Library,1991 **Plunkett's Automobile Industry Almanac: Automobile, Truck and Specialty Vehicle Industry Market Research, Statistics, Trends & Leading Companies** Jack W. Plunkett,2007-10 Provides information on the truck and specialty vehicles business including automotive industry trends and market research mergers acquisitions globalization automobile manufacturers truck makers makers of specialty vehicles such as RVs automobile loans insurance and other financial services dealerships and components manufacturers **The Cumulative Book Index** ,1995 A world list of books in the English language Hearings United States.
