Mineral Assessment Report ,1982 *British Geological Literature* ,1983 **The Conterminous United States Mineral Assessment Program** Denise A. Wiltshire,John N. Fischer,Forest P. Lyford,Andrew J. Cohen,1984 **Preliminary Technology Assessment Report** ,1977 **Annual Report on Mineral Industry Operations in Ontario During Calandar Year ...** ,1914 *1989 Annual Report on Alaska's Mineral Resources* ,1989 **U.S. Geological Survey Circular** ,1984 **California Statewide Wilderness Study Report: v. 1. Garcia Mountain** ,1991 **Technology Assessment and Research Program for Offshore Minerals Operations** John B. Gregory,Charles E. Smith,1988 Quaternary of the Thames D.R. Bridgland,2012-12-06 The principal aim of this volume is to provide descriptions of Sites of Special Scientific Interest selected as part of the Geological Conservation Review that yield evidence for the Pleistocene history of the River Thames and its tributaries Although defined thematically the volume covers all Pleistocene GCR sites in the Thames valley A number of sites in southern East Anglia are also included because they provide important evidence bearing on the history of the Thames system The justification for a GCR volume devoted to the Thames lies in the special importance of the river in the British Quaternary The volume is concerned with the history of Britain over approximately the last two million years of geological time during the repeated glacial phases of the Quaternary Ice Age and the warmer intervals between them Many such climatic fluctuations are recorded in the deposits of the Thames which can be shown to have existed as the predominant west to east drainage line in south eastern England throughout the Pleistocene The Thames has left a detailed record of its earlier presence in the form of deposits which comprise fluviially aggraded floodplain sediments predominantly gravels preserved on the valley sides where they form geomorphological terrace features The oldest deposits are at the highest levels forming a terrace staircase that records successive stages in the evolution of the valley **Assessment of Environmental Impact of the Mineral Mining Industry** Industrial Environmental Research Laboratory (Cincinnati, Ohio),J. S. Greber,1979 **Mineral Resource Assessment of the Thames-Coromandel and Hauraki Districts, New Zealand** A. B. Christie,2008 **Quaternary of the Trent** David R. Bridgland,Andy Howard,Mark J. White,Tom S. White,2014-03-31 This volume is an integrated overview and synthesis of available data relating to the Quaternary evolution of the River Trent It provides detailed descriptions of the Pleistocene sedimentary records from the Trent its tributaries and related drainage systems a sedimentary record that spans a period of approximately half a million years and the biostratigraphical and archaeological material preserved therein Significant new data are presented from recently discovered sites of geological and archaeological importance including previously unrecognised fluvial deposits as well as novel analyses such as mathematical modelling of fluvial incision as recorded by the river terrace deposits In combination with a thorough review of the literature on the Trent these new data have contributed to revised chronostratigraphical and palaeogeographical frameworks for central England and revealed the complexity of the Pleistocene fluvial and glacial records in this region The

fragmentary Trent terrace sequence is an important element of wider reconstructions of Pleistocene palaeodrainage in Britain providing a link between the records preserved in the English Midlands and those in East Anglia Minerals Yearbook United States. Bureau of Mines,1995 *Energy Research Abstracts* ,1992-03 **Geology's Significant Sites and their Contributions to Geoheritage** R. M. Clary,E.J. Pyle,W.M. Andrews,2024-07-23 The contributions in this book explore several geologically significant sites and in doing so acknowledge and explore not just the geological exposures themselves but also the people and issues that are fundamentally intertwined with the history of our science and its impact on our society Through selective examples of outcrops and locales integral to the history of geology we explore the evolution of modern geology as well as the geodiversity and geoheritage of our planet While the volume is far from comprehensive the chapters contained herein detail a range for geoheritage value scale of geoheritage sites and potential for geoheritage opportunities that will promote a broader richer understanding of the complexity of the geoheritage of Earth Importantly many chapters offer a cautionary tale of sites almost lost to posterity and submit their take away lessons for community mobilization towards geoheritage site protection *Annual Report of the State Board of Taxes and Assessment* New Jersey.
