**Key Urban Housing of the Twentieth Century** Hilary French, 2008-10-28 A collection of housing designs built over the last hundred years illustrating innovative approaches Fourth in the Key series with newly drawn plans suitable for study in architecture schools this volume will appeal to students of urban design and planning as well as architecture Key developments covered include early apartment blocks the projects of European modernism high rise and large scale schemes and postmodernism Exterior and interior photographs show materials massing and context 150 color photographs 500 line drawings Modern Housing for America Gail Radford, 1996 In an era when many decry the failures of federal housing programs this book introduces us to appealing but largely forgotten alternatives that existed when federal policies were first defined in the New Deal Led by Catherine Bauer supporters of the modern housing initiative argued that government should emphasize non commercial development of imaginatively designed compact neighborhoods with extensive parks and social services The book explores the question of how Americans might have responded to this option through case studies of experimental developments in Philadelphia and New York While defeated during the 1930s modern housing ideas suggest a variety of design and financial strategies that could contribute to solving the housing problems of our own time New Urban Housing Hilary French, 2006 A revised addition to the Living In series shows and describes the gardens boulevards museums monuments and parks of Paris and includes interiors of homes decorated in various styles **Latin American Modern Architectures** Patricio del Real, Helen Gyger, 2013-06-03 Latin American Modern Architectures Ambiguous Territories has thirteen new essays from a range of distinguished architectural historians to help you understand the region's rich and varied architecture It will also introduce you to major projects that have not been written about in English A foreword by historian Kenneth Frampton sets the stage for essays on well known architects such as Lucio Costa and Flix Candela which will show you unfamiliar aspects of their work and for essays on the work of little known figures such as Uruguayan architect Carlos Gmez Gavazzo and Peruvian architect and politician Fernando Bela nde Terry Covering urban and territorial histories from the nineteenth and twentieth centuries along with detailed building analyses this book is your best source for historical and critical essays on a sampling of Latin America's diverse architecture providing much needed information on key case studies Contributors include Noem Adagio Pedro Ignacio Alonso Luis Casta eda Viviana d Auria George F Flaherty Mar a Gonz lez Pend s Cristina L pez Uribe Hugo Mondrag n L pez Jorge Nudelman Blejwas Hugo

Palmarola Sagredo Gaia Piccarolo Claudia Shmidt Daniel Talesnik and Paulo Tavares      **Modern Architecture: A Critical History (Fifth) (World of Art)** Kenneth Frampton, 2020-09-08 An extensively revised and updated edition of a bestselling classic on modern architecture and its origins by Kenneth Frampton Kenneth Frampton's highly acclaimed survey of modern architecture and its origins has been a classic since it first appeared in 1980 Starting with the cultural developments since 1750 that drove the modern movement moving through the creation of modern architecture and exploring the effects of globalization and the phenomenon of international celebrity architects this book is the definitive history of modern architecture For this extensively revised and updated fifth edition of *Modern Architecture* Frampton added new chapters exploring the ongoing modernist tradition in architecture while also examining the varied responses to the urgent need to build more sustainably and create structures that will withstand changing climates This new edition features completely redesigned interiors and an updated and expanded bibliography making this volume more indispensable than ever

*Building Character* Charles L. Davis II, 2019-09-06 In the nineteenth century paradigm of architectural organicism the notion that buildings possessed character provided architects with a lens for relating the buildings they designed to the populations they served Advances in scientific race theory enabled designers to think of race and style as manifestations of natural law just as biological processes seemed to inherently regulate the racial characters that made humans a perfect fit for their geographical contexts architectural characters became a rational product of design Parallels between racial and architectural characters provided a rationalist model of design that fashioned some of the most influential national building styles of the past from the pioneering concepts of French structural rationalism and German tectonic theory to the nationalist associations of the Chicago Style the Prairie Style and the International Style In *Building Character* Charles Davis traces the racial charge of the architectural writings of five modern theorists Eugene Emmanuel Viollet le Duc Gottfried Semper Louis Sullivan Frank Lloyd Wright and William Lescaze to highlight the social political and historical significance of the spatial structural and ornamental elements of modern architectural styles      **Planning and Urban Design Standards** American Planning Association, 2006-02-03 From the publishers of *Architectural Graphic Standards* this book created under the auspices of The American Planning Association is the most comprehensive reference book on urban planning design and development available today Contributions from more than two hundred renowned professionals provide rules of thumb and best practices for mitigating such environmental impacts as noise traffic aesthetics preservation of green space and wildlife water quality and more You get in depth information on the tools and techniques used to achieve planning and design outcomes including economic analysis mapping visualization legal foundations and real estate developments Thousands of illustrations examples of custom work by today's leading planners and insider information make this work the new standard in the field Order your copy today      **The Architecture of Use** Stephen Grabow, Kent Spreckelmeyer, 2014-10-03 By analyzing ten examples of buildings that embody the human experience at an extraordinary level this book clarifies the

central importance of the role of function in architecture as a generative force in determining built form Using familiar twentieth century buildings as case studies the authors present these from a new perspective based on their functional design concepts Here Grabow and Spreckelmeyer expand the definition of human use to that of an art form by re evaluating these buildings from an aesthetic and ecological view of function Each building is described from the point of view of a major functional concept or idea of human use which then spreads out and influences the spatial organization built form and structure In doing so each building is presented as an exemplar that reaches beyond the pragmatic concerns of a narrow program and demonstrates how functional concepts can inspire great design evoke archetypal human experience and help us to understand how architecture embodies the deeper purposes and meanings of everyday life **Urban Policy** United States. Congress. House. Committee on Banking, Finance, and Urban Affairs. Subcommittee on Housing and Community Development,1978 By-Right, By-Design Liz Falletta,2019-06-26 Housing is an essential but complex product so complex that professionals involved in its production namely architects real estate developers and urban planners have difficulty agreeing on good housing outcomes Less than optimal solutions that have resulted from a too narrow focus on one discipline over others are familiar high design that is costly to build that makes little contribution to the public realm highly profitable but seemingly identical cookie cutter dwellings with no sense of place and well planned neighborhoods full of generically designed unmarketable product types Differing roles languages and criteria for success shape these perspectives which in turn influence attitudes about housing regulation Real estate developers for example prefer projects that can be built as of right or by right meaning that they can be approved quickly because they meet all current planning zoning and building code requirements Design focused projects heretofore by design by contrast often require time to challenge existing regulatory codes pursuing discretionary modifications meant to maximize design innovation and development potential Meanwhile urban planners work to establish and mediate the threshold between by right and by design processes by setting housing standards and determining appropriate housing policy But just what is the right line between by right and by design By Right By Design provides a historical perspective conceptual frameworks and practical strategies that cross and connect the diverse professions involved in housing production The heart of the book is a set of six cross disciplinary comparative case studies each examining a significant Los Angeles housing design precedent approved by variance and its associated development type approved as of right Each comparison tells a different story about the often hidden relationships among the three primary disciplines shaping the built environment some of which uphold and others of which transgress conventional disciplinary stereotypes "Architecture, Design and Craft in Toronto 1900-1940 " Alla Myzelev,2017-07-05 Toronto the largest and one of the most multicultural cities in Canada boasts an equally interesting and diverse architectural heritage Architecture Design and Craft in Toronto 1900 1940 tells a story of the significant changes in domestic life in the first 40 years of the twentieth century Adopting a multidisciplinary approach to studies of residential spaces the author

examines how questions of modernity and modern living influenced not only architectural designs but also interior furnishings modes of transportation and ways to spend leisure time The book discusses several case studies some of which are known both locally and internationally for example Casa Loma while others such as Guild of All Arts or Sherwood have been virtually unstudied by historians of visual culture The overall goal of the book is to put Toronto on the map of scholars of urban design and architecture and to uncover previously unknown histories of design craft and domesticity in Toronto This study will be of interest not only to the academic community namely architects designers craftspeople and scholars of these disciplines along with social historians but also the general public interested in local history and or visual culture

**Neighborhoods** National Endowment for the Arts,1977      **Invisible Gardens** Peter Walker,Melanie Louise Simo,1996  
Invisible Gardens is a composite history of the individuals and firms that defined the field of landscape architecture in America from 1925 to 1975 a period that spawned a significant body of work combining social ideas of enduring value with landscapes and gardens that forged a modern aesthetic The major protagonists include Thomas Church Roberto Burle Marx Isamu Noguchi Luis Barragan Daniel Urban Kiley Stanley White Hideo Sasaki Ian McHarg Lawrence Halprin and Garrett Eckbo They were the pioneers of a new profession in America the first to offer alternatives to the historic landscape and the park tradition as well as to the suburban sprawl and other unplanned developments of twentieth century cities and institutions The work is described against the backdrop of the Great Depression the Second World War the postwar recovery American corporate expansion and the environmental revolution The authors look at unbuilt schemes as well as actual gardens ranging from tiny backyards and play spaces to urban plazas and corporate villas Some of the projects discussed already occupy a canonical position in modern landscape architecture others deserve a similar place but are less well known The result is a record of landscape architecture s cultural contribution as distinctly different in history intent and procedure from its sister fields of architecture and planning during the years when it was acquiring professional status and struggling to define a modernist aesthetic out of the startling changes in postwar America      *Architecture and Urbanism in Modern Korea* Inha Jung,2013-07-31 Although modernization in Korea started more than a century later than in the West it has worked as a prominent ideology throughout the past century in particular it has brought radical changes in Korean architecture and cities Traditional structures and ways of life have been thoroughly uprooted in modernity s continuous negation of the past This book presents a comprehensive overview of architectural development and urbanization in Korea within the broad framework of modernization Twentieth century Korean architecture and cities form three distinctive periods The first defined as colonial modern occurred between the early twentieth century and 1945 when Western civilization was transplanted to Korea via Japan and a modern way of life albeit distorted began taking shape The second is the so called developmental dictatorship period Between 1961 and 1988 the explosive growth of urban populations resulted in large scale construction booms and architects delved into modern identity through the locality of traditional architecture The last period

began in the mid 1990s and may be defined as one of modernization settlement and a transition to globalization With city populations leveling out urbanization and architecture came to be viewed from new perspectives Inha Jung however contends that what is more significant is the identification of elements that have remained unchanged Jung identifies continuities that have been formed by long standing relationships between humans and their built environment and despite rapid modernization are still deeply rooted in the Korean way of life For this reason in the twentieth century regionalism exerted a great influence on Korean architects Various architectural and urban principles that Koreans developed over a long period while adapting to the natural environment have provided important foundations for architects works By exploring these sources this carefully researched and amply illustrated book makes an original contribution to defining modern identity in Korea s architecture housing and urbanism
