Oceanography Megascience The Oecd Forum:

Operational Oceanography H.W.A. Behrens,J.C. Borst,J.P. van der Meulen,L.J. Droppert,J.H. Stel,1997-12-12 GOOS is an international programme for a permanent global framework of observations modelling and analysis of ocean variables which are needed to support operational services around the world The EuroGOOS strategy has two streams the first is to improve the quality of marine information in European home waters and the second is to collaborate with similar organisations in other continents to create a new global ocean observing and modelling system that will provide the open ocean forecasts needed to achieve the best possible performance by local marine information services everywhere The EuroGOOS strategy envisages our national agencies making a major contribution to that challenging task of globalizing ocean forecasting The conference also provided an opportunity to take stock of the state of marine science and technology in Europe relevant to the EuroGOOS strategy and the state of information services and customer needs

Seventy Years of Exploration in Oceanography Klaus Hasselmann,2010-04-08 It all began with Markus Jochum approaching one of us HvS when you guys are doing interviews with senior scientists from oceanography and related sciences why are you not doing Walter Munk Indeed why not Walter Munk an icon in oceanography had just given a wonderful talk in a symposium in honor of his 90th birthday sweeping a grand circle from his earliest work with Chip Cox on airborne measurements of ocean surface roughness to the latest satellite data not simply a review but the struggle of an active scientist opening up new perspectives as inspiring and stimulating as when one of us KH rst met him at the Ocean Waves Conference in Easton in 1961 Fig I 1 Walter immediately agreed to share with us his recollections on the nearly seventy years of his path breaking contributions in a sheer amazing range of topics from ocean waves internal waves ocean currents tides tsunamis sea level microseisms and the rotation of the earth to ocean acoustic tomography With you guys Markus was referring to HvS and the various partners HvS had 1 invited to join him in conducting a series of interviews of retired colleagues

Marine Issues

Peter N. Ehlers, Elisabeth Mann-Borgese, Rüdiger Wolfrum, Cristina Hoß, 2002-04-01 This volume collects a number of essays and articles from about twenty experts in various fields connected to marine environmental issues These essays were first

presented at the XXVIII Pacem in Maribus Conference held in December 2000 at the International Tribunal of the Law of the Sea in Hamburg Germany The purpose of the Conference was to enhance awareness of the European public governments the private sector and academia about the importance of responsible ocean and coastal management based on ocean science Reflecting the innovative interdisciplinary approach of the conference these volume groups contributors from leading biologists political scientists geographers and jurists according to specific regional relevance and not along strict disciplinary lines This approach allows the experts to treat marine issues concerning regions such as the North Sea the Baltic Sea or the Black Sea in a comprehensive manner This collection could become an essential instrument for scholars and scientists working within the field of marine environmental issues **Megascience** ,1995 *Megascience Policy Issues* Organisation for Economic Co-operation and Development,1995 On cover title page Megascience the OECD forum Large Facilities In Physic - Proceedings Of The 5th Eps International Conference On Large Facilities Herwig Schopper,Maurice

Jacob,1995-05-04 Physics research relies increasingly on the use of large facilities The construction and operation of these facilities represent an increasing fraction of the funding for research The most often calls for international collaborations Since large facilities are now of great importance in all domains of physics it is instructive to consider them in parallel This is what is done in this book which puts emphasis on large physics facilities in Europe whilst taking a worldwide perspective

Megascience: the OECD Forum ,1996 **Marine Ecosystem Assessment for the Southern Ocean: Meeting the Challenge for Conserving Earth Ecosystems in the Long Term** Monica M. C. Muelbert,2024-12-24 National and international agencies need assessments of change in ecosystems and their drivers in order to sustain natural systems to maintain the delivery of services and to meet the challenge for conserving Earth ecosystems in the long term In marine systems change may arise directly from human activities e g fisheries indirectly from local or global activities cascading effects through food webs from fisheries or changing environments from climate change and or ocean acidification or from naturally varying processes A particular challenge for managers is to identify how dangerous future climate change will be for ecosystems and their services and whether mitigation or adaptation may be needed in advance in order to achieve the conservation requirements For regions of international attention particularly those that have the attention of many management or policy oriented bodies a standardized process is needed to harmonize the scientific information on the status and trends in ecosystems used by the different bodies That process also needs to ensure the information is available in a timely manner For example assessments of change in habitats species and or food webs in the Southern Ocean are currently compiled separately for at least ten different international organizations or processes A Marine Ecosystem Assessment for the Southern Ocean MEASO aims to harmonize that information for policy makers This assessment began with an international conference in April 2018 <http://www.measo2018.aq> where it was agreed to undertake the first MEASO over 2018 2019 with the view to provide the outcomes to relevant bodies such as the Scientific Committee for the Conservation of
