Revolutionary Rehearsals:

Revolutionary Rehearsals Colin Barker, 2008-09 Five times in the last 40 years the working class has posed a radical alternative to the status quo France 1968 A general strike and factory occupations by millions of workers shake the country Chile 1972 Workers defending the Popular Unity government set up workers councils the cordones and demand control over production Portugal 1974 Army officers overthrow the dictator Caetano and release an upsurge of popular power whichs last 18 months Iran 1979 The viciously repressive Shah is toppled and workers set up independent councils the shoras Poland 1980 Demanding radical change workers build the independent trade union Solidarity to fight for their own interests exposing the false socialism of the Eastern Bloc In each of these cases the actions of workers themselves were the driving force of struggles with revolutionary potential They demonstrate that workers can and will fight back on a mass scale Each episode offers an inspiring glimpse of the way in which workers rise to the challenge of fighting for a better world and pose their own alternative to the system Although none of these struggles ultimately achieved their goals they were revolutionary rehearsals that hold important lessons about the struggle for socialism under modern conditions **Revolutionary**

Rehearsals in the Neoliberal Age Colin Barker, Gareth Dale, Neil Davidson, 2021-07-01 This ambitious volume examines revolutionary situations during a non revolutionary historical conjuncture the neoliberal era The last three decades have seen an increase in the number of political upheavals that challenge existing power structures many of them taking the form of urban revolts This book compellingly explores a series of such upheavals in Eastern Europe South Africa Indonesia Argentina Bolivia Venezuela sub Saharan Africa including Congo Zimbabwe Burkina Faso and Egypt Each chapter studies the ways in which protest movements developed into insurgent challenges to state power and the strategies that regimes have deployed to contain and repress revolt In addition to empirical chapters the book engages in theorization of revolution dealing with questions such as the patterning of revolution in contemporary history the relationship between class struggle and social movements and the prospects of socialist revolution in the twenty first century *Red Flags* David

Camfield, 2025-04-24T00:00:00Z Increasingly people are responding to the contemporary crises underwritten by capitalism by exploring the politics of communism Some have taken a sympathetic even nostalgic view of actually existing socialist AES societies past and present including the USSR China and Cuba and the Marxist Leninist political tradition associated with them They see these states as a powerful alternative to capitalism governed by parties genuinely committed to socialism and staunchly resisting Western imperialism But were these societies really in transition towards a classless stateless society of freedom the original communist goal Is Marxism Leninism the political approach that should orient people on the left now *Red Flags* traces the path from the 1917 Russian Revolution to the construction of the world s first AES society the USSR It also looks at the post revolution societies created along the same lines in China and Cuba Using the intellectual tools of historical materialism *Red Flags* argues that they were not in fact moving towards communism because the social relations

remained fixed in class exploitation The workers were never liberated At a time of burgeoning anti communism from both conservatives and liberals this book is an accessible vibrant synthesis of the history of communism that draws on the latest research to develop a rigorous analysis of the contradictions and uneasy truths the left needs to confront if it is to build a genuinely liberatory alternative to capitalism

The Twilight of World Trotskyism John Kelly, 2022-10-28 The Twilight of World Trotskyism analyzes the reasons behind the historic failure of the Trotskyist movement around the world The book begins this assessment by briefly recapitulating the origins of Trotskyism as a political current within the communist movement and elaborating its major elements before describing the historical development of Trotskyism in the four countries where it has sunk the deepest roots and which house the clear majority of the world s Fourth Internationals Argentina Britain France and the USA It then proceeds to map the current state of the global Trotskyist movement Whatever their current size and status Trotskyist organizations aspire to become mass political parties and lead revolutionary seizures of power It is therefore appropriate to examine them through the metrics applied to mainstream parties namely organization membership and political influence The author looks at the dynamics of the Trotskyist movement focusing in particular on the supposedly harmful effects of the communist movement before then turning to examine the role of Trotskyist organizations in the many revolutionary situations that have appeared since the 1920s and in the various cycles of protest that have occurred in the latter half of the 20th century and the early years of the 21st century The final section examines the two success stories frequently cited in Trotskyist literature namely the cases of Bolivia and Sri Lanka The book concludes by setting out and examining a wide variety of explanations for the chronic and sustained weaknesses of the Trotskyist movement including its flawed appraisals of contemporary politics and economics ultra radical programmes and policies failures in understanding the dynamics of protest and the baleful legacy of Soviet communism It is argued that these weaknesses are rooted in Trotskyist doctrine and are therefore integral not peripheral features of world Trotskyism This volume will be essential reading for activists and scholars interested in the transnational history and politics of the radical left

Ours to Master and to Own Immanuel Ness, Dario Azzellini, 2011 From the dawning of the industrial epoch wage earners have organized themselves into unions fought bitter strikes and gone so far as to challenge the very premises of the system by creating institutions of democratic self management aimed at controlling production without bosses With specific examples drawn from every corner of the globe and every period of modern history this pathbreaking volume comprehensively traces this often underappreciated historical tradition Ripe with lessons drawn from historical and contemporary struggles for workers control Ours to Master and to Own is essential reading for those struggling to create a new world from the ashes of the old Immanuel Ness is professor of political science at Brooklyn College City University of New York and edits WorkingUSA Dario Azzellini is a writer documentary director and political scientist at Johannes Kepler University in Linz

Arms and the People Mike Gonzalez, Houman Barekat, 2012-12-10 This collection examines the

relationship between mass movements and the military Some argue that it is impossible to achieve and protect a revolution without the support of the army but how can the support of the army be won Arms and the People explores the impact of social extremes on the solidarity within the state s military and on the changing loyalties of these soldiers The authors examine a series of historical moments in which a crisis in the military has reflected deep instability in the wider world including Russia in 1917 Egypt during the Arab Spring the Paris Commune as well as long standing instability in Venezuela and Indonesia amongst many others Including a range of international authors who have either studied or been directly involved in such social upheavals Arms and the People is a pioneering contribution to the study of revolutionary change

The Politics of the Encounter Andy Merrifield,2013-04-15 The Politics of the Encounter is a spirited interrogation of the city as a site of both theoretical inquiry and global social struggle The city writes Andy Merrifield remains important virtually and materially for progressive politics And yet he notes more than forty years have passed since Henri Lefebvre advanced the powerful ideas that still undergird much of our thinking about urbanization and urban society Merrifield rethinks the city in light of the vast changes to our planet since 1970 when Lefebvre s seminal Urban Revolution was first published At the same time he expands on Lefebvre s notion of the right to the city which was first conceived in the wake of the 1968 student uprising in Paris We need to think less of cities as entities with borders and clear demarcations between what s inside and what s outside and emphasize instead the effects of planetary urbanization a concept of Lefebvre s that Merrifield makes relevant for the ways we now experience the urban The city from Tahrir Square to Occupy Wall Street seems to be the critical zone in which a new social protest is unfolding yet dissenters aspirations are transcending the scale of the city physically and philosophically Consequently we must shift our perspective from the right to the city to the politics of the encounter says Merrifield We must ask how revolutionary crowds form where they draw their energies from what kind of spaces they occur in and what kind of new spaces they produce

Communes and the Venezuelan State Anderson Bean,2022-03-01 Since 2006 Venezuela has witnessed an explosion of different forms of popular power and

participatory democracy Over 47 000 grassroots neighborhood based communal councils and 3 000 communes have been constructed In Communes and the Venezuelan State The Struggle for Participatory Democracy in a Time of Crisis Anderson Bean offers a critical analysis of these experiments in popular and workers power and their potential for societal transformation within and beyond Venezuela Drawing on extensive ethnographic research Bean demonstrates how workers and peasants through networks of popular power exercise agency over their own development while facing challenges from the capitalist state Most importantly this book connects with the far reaching implications that the communal movement in Venezuela has for building a society responsive more to the needs of ordinary people than to the desires of the elites A Radical History of the World Neil Faulkner,2018-09-20 History is a weapon The powerful have their version of events the people have another And if we understand how the past was forged we arm ourselves to change the future This is a history of struggle revolution and social change of hominids hunters and herders of emperors and slaves of patriarchs and women of rich and poor of dictators and revolutionaries From the ancient empires of Persia and Rome to the Russian Revolution the Vietnam War and the 2008 Crash this is a history of greed and violence but also of solidarity and resistance Many times in the past a different society became an absolute necessity Humans have always struggled to create a better life This history proves that we the many have the power to change the world Rehearsals of Revolution Rustom Bharucha,1983 Social Media and Social Movements Baris Çoban,2015-12-17 This book examines the increased utilization of social media in daily life and its impact on social movements The contributors analyze social media revolutions such as the Arab Spring the 15 M movement in Spain the Occupy Nigeria movement and the Occupy Gezi movement in Turkey The contributors to this collection academics researchers and activists implement diverse methodological approaches both descriptive and quantitative to cut across various disciplines including communication and media studies cultural studies politics sociology and education Spaces of Creative Resistance Andrea Gevurtz Arai,2025-06-17 Spaces of Creative Resistance Social Change Projects in Twenty First Century East Asia brings together an exciting cross regional interdisciplinary group of scholars scholar activists artists and others for a collection that addresses the last two decades hollowing out of social connections socioeconomic income gaps and general precarity of life in East Asian societies Written by authors from China Japan South Korea Taiwan and Hong Kong each chapter is focused on people making a difference together in socially sustainable ways particularly in the areas of gender labor and environments both built and natural These projects all constitute acts of creative resistance to neoliberal development and each act of creative resistance demonstrates how individuals and communities across East Asia are making new worlds and lifeways in the small and everyday Taking on larger political and economic forces that affect their lives and communities each project and group of individuals featured here is focused on making more liveable presents and more possible futures **Handbook of Research on the Global Political Economy of Work** Maurizio Atzeni,Dario Azzellini,Alessandra Mezzadri,Phoebe Moore,Ursula Apitzsch,2023-10-06 This

ground breaking Handbook broadens empirical and theoretical understandings of work work relations and workers It advances a global intersectional labour studies agenda laying the foundations for the politically emancipatory project of decolonising the political economy of work

The Global Development Crisis Benjamin Selwyn,2014-02-07 The central paradox of the contemporary world is the simultaneous presence of wealth on an unprecedented scale and mass poverty Liberal theory explains the relationship between capitalism and poverty as one based around the dichotomy of inclusion into capitalism vs exclusion from capitalism Within this discourse the global capitalist system is portrayed as a sphere of economic dynamism and as a source of developmental opportunities for less developed countries and their populations Development policy should therefore seek to integrate the poor into the global capitalist system The Global Development Crisis challenges this way of thinking Through an interrogation of some of the most important political economists of the last two centuries Friedrich List Karl Marx Leon Trotsky Joseph Schumpeter Alexander Gerschenkron Karl Polanyi and Amarta Sen Selwyn argues that class relations are the central cause of poverty and inequality within and between countries In contrast to much development thinking which portrays the poor as reliant upon benign assistance this book advocates the concept of labour centred development Here the poor are the global labouring classes and their own collective actions and struggles constitute the basis of an alternative form of non elitist bottom up human development

Political Power Reconsidered Maximilian Lakitsch,2014 Around the world people have been expressing their discontent with political situations demanding rights wanting change and attacking governmental institutions and their actors Greek Spanish and Turkish authorities have arrested protesters and fired tear gas Egyptian and Syrian governments have turned off the Internet People have occupied public spaces in Manhattan Mass demonstrations and protest activities have taken place against corrupt regimes and unjust justice systems This book is based on articles presented at the State of Peace Conference in 2013 These essays all consider the question of political power by discussing various manifestations of civic discontent and state responses Series Dialog Contributions to Peace Research Vol 66

The Palgrave Handbook of Social Movements, Revolution, and Social Transformation Berch Berberoglu,2018-09-26 This handbook on social movements revolution and social transformation analyzes people s struggles to bring about social change in the age of globalization It examines the origins nature dynamics and challenges of such movements as they aim to change dominant social economic and political institutions and structures across the globe Departing from a theoretical introduction that explores major classical and contemporary theories of social movements and transformation the contributions collected here use a class based approach to examine key cases of social movements rebellions and revolutions worldwide from the turn of the twentieth to the early twenty first centuries Against this wide ranging background the handbook concludes by charting the varied and competing future developments and trajectories of social movements revolutions and social transformations

Homes in Crisis Capitalism Marnie Holborow,2024-02-22 Homes in Crisis Capitalism explores the core social reproduction role that

individual households fulfil in our societies and the class and racial effects of this on gender inequality and discrimination Women now make up nearly half of the paid workforce globally yet prevailing neoliberal social policy continues to rule out adequate state provision of child and elder care choosing instead to rely on marketized services to fill the gap It is mainly women who carry out this little valued care work either in a non paid or paid capacity and gender inequality is entrenched across society Official gender parity policies often expressed in terms of equality of opportunity have done little to ease the double burden of domestic and care work for the vast majority of women Competitive labour markets discriminate against those expected to be the primary caregivers of children the sick and disabled and older people In addition the presence across many societies of an acute housing crisis and soaring inflation have put added pressures on home life A social reproduction crisis has developed and it is working class women and women of colour who are paying the price Holborow analyses homes in crisis capitalism through a Marxist lens of capitalist social reproduction This book charts the interwoven social and political effects and outcomes of work and care provided in the home and makes the case for a radical break with capitalism to give social reproduction the material resources and social recognition it deserves *Troublemaking* Lydia Hughes, Jamie Woodcock, 2023-04-25 There are no unorganisable workers only workers yet to be organised There has been an explosion of organising among workers many assumed to be unorganisable from delivery drivers in London to tech workers in Silicon Valley The culmination of years of conversations on picket lines in community centres and in union offices with workers in Britain the US India Argentina South Africa Brazil and across Europe *Troublemaking* brings together lessons from around the world Precarious workers waste collectors in Mumbai show that no worker is unorganisable cleaner organising at LSE and St Mary's hospital in London and Sans papier workers in France indicate that demanding more at work can lead to big wins Struggles like The Water Wars in Cochabamba Bolivia show how we can use our power beyond the workplace From these movements Lydia Hughes and Jamie Woodcock draw a number of lessons about why organising at work is the first step in building another world They put forward three principles for organising First the need for action Struggles can change the world but they also change people who go through them Rather than using action as a last resort we need action to build a movement Second the need to build the rank and file of unions Power comes from organising at work not in trusting others to do it on our behalf Third democracy matters in organising This is not only about winning but also developing the confidence to build another kind of world This is not a how to guide but a set of principles for the politics of organising *Counterpublics and the State* Robert Asen, Daniel C. Brouwer, 2001-09-27 Explores antagonistic encounters between people both individuals and groups and governments
