The Revolutionary Russian Economy, 1890-1940 Vincent Barnett, 2004-03-04 The pre revolutionary Russian economy was backward and stagnant Whatever the criticisms of the economy post revolution the turnaround in terms of growth and output was staggering This book looks at the alternatives to Stalin s reform program that had such tragic outcomes Applying the ideas of orthodox economic theory Marxism and also instituti The Revolutionary Russian Economy, 1890-1940

Vincent Barnett, 2004-03-04 Looking at the alternatives to Stalin s reform program that had such tragic outcomes this snappy readable book this will be an insightful text for economic and political historians with an interest in Russia **Europe's**

Green Revolution and Others Since Jonathan Harwood, 2012-05-04 How best to foster agricultural development in the Third World has long been a subject of debate and from a European perspective the persistent failure to design peasant friendly technology is puzzling From the late 19th century for example various western European countries also underwent green revolutions in which systematic attempts were made to promote the adoption of technological innovation by peasant farmers This book focuses on the development of public sector plant breeding in Germany from the late nineteenth century through its fate under National Socialism Harwood uses this historical case study in order to argue that peasant friendly research has an important role to play in future Green Revolutions **The International Tin Cartel** John

Hillman, 2010-02-25 This book brings together two areas of inquiry the history of tin and its role in producing countries and the history of cartelization as a solution to the inherent difficulties of primary commodity markets *Ideas and Economic*

Crises in Britain from Attlee to Blair (1945-2005) Matthias Matthijs, 2012-08-21 During the period from 1945 to 2005 Britain underwent two deep seated institutional transformations when political elites successfully challenged the prevailing wisdom on how to govern the economy Attlee and Thatcher were able to effectively implement most of their political platforms During this period there were also two opportunities to challenge existing institutional arrangements Heath s U turn in 1972 signalled his failure to implement the radical agenda promised upon election in 1970 whilst Tony Blair s New Labour similarly failed to instigate a major break with the Thatcherite settlement Rather than simply retell the story of British economic policymaking since World War II this book offers a theoretically informed version of events which draws upon the literatures on institutional path dependence economic constructivism and political economy to explain this puzzle It will be of great interest to both researchers and postgraduates with an interest in British economic history and the fields of political economy and economic crisis more widely The History of Migration in Europe Francesca Fauri, 2014-10-03 The History of

Migration in Europe belies several myths by arguing for example that immobility has not been the normal condition of people before the modern era Migration far from being an income maximizing choice taken by lone individuals is often a household strategy and local wages benefit from migration This book shows how ssuccesses arise when governments liberalize and accompany the international movements of people with appropriate legislation while failures take place when the legislation

enacted is insufficient belated or ill shaped Part I of this book addresses mainly methodological issues Past and present migration is basically defined as a cross cultural movement cultural boundaries need prolonged residence and active integrationist policies to allow cross fertilization of cultures among migrants and non migrants Part II collects chapters that examine the role of public bodies with reference to migratory movements depicting a series of successes and failures in the migration policies through examples drawn from the European Union or single countries Part III deals with challenges immigrants face once they have settled in their new countries Do immigrants seek integration in their host culture Through which channels is such integration achieved and what roles are played by citizenship and political participation What is the identity of migrants and their children born in the host countries This text s originality stems from the fact that it explains the complex nature of migratory movements by incorporating a variety of perspectives and using a multi disciplinary approach including economic political and sociological contributions

Economy and Economics of Ancient Greece Takeshi Amemiya,2007-02-08 Adding to the small amount that has been written on this aspect of economic history Amemiya a leading economist based at Stanford University analyzes the exact nature of the ancient Greek economy offering an unprecedented broad and comprehensive survey

The Political Economy of Mercantilism Lars Magnusson,2015-06-12 Since the days of Adam Smith Mercantilism has been a hotly debated issue Condemned at the end of the 18th century as a false system of economic thinking and political practice it has returned paradoxically to the forefront in regard to issues such as the creation of economic growth in developing countries This concept is often used in order to depict economic thinking and economic policy in early modern Europe its meaning and content has been highly debated for over two hundred years Following on from his 1994 volume Mercantilism The Shaping of an Economic Language this new book from Lars Magnusson presents a more synthetic interpretation of Mercantilism not only as a theoretical system but also as a system of political economy This book incorporates samples of material from the 1994 publication alongside new material ordered in a new set of chapters and up date discussions on mercantilism up to the present day Tracing the development of a particular political economy of Mercantilism in a period of nascent state making in Western and Continental Europe from the 16th to the 18th century the book describes how European rulers regarded foreign trade and industrialisation as a means to achieve power and influence amidst international competition over trades and markets Returning to debates concerning whether Mercantilism was a system of power or of wealth Magnusson argues that it is in fact was both and that contemporaries almost without exception saw these goals as interconnected He also emphasises that Mercantilism was an all European issue in a time of trade wars and the struggle for international power and recognition In examining these issues this book offers an unrivalled modern synthesis of Mercantilist ideas and practices

Innovation and Technological Diffusion Harry Kitsikopoulos,2015-10-23 This book deals with two key aspects of the history of steam engines a cornerstone of the Industrial Revolution specifically the road that led to its discovery and the process of diffusion of the early steam engines The first part of the volume outlines

the technological and scientific developments which took place between the 16th and 18th centuries proving critical for the invention of this strategic technology The most important question addressed is why did England come up with this innovation first as opposed to other countries e g France Italy which were more advanced in terms of knowledge pertinent to it The second part of the volume traces the process of diffusion of the early steam engines the Newcomen model through to 1773 the year prior to the first commercial application of the second generation of steam engines the Watt model The process of diffusion is quantified on the basis of a novel method before proceeding with a discussion of the main determinants of this process Kitsikopoulos pulls together a large amount of relevant evidence found in primary sources and more technically oriented literature which is often ignored by economic historians This book will be of interest to economic historians and historians of technology

A History of Macroeconomic Policy in the United States John H. Wood, 2009-01-13 This book examines the controlling influences that drive macroeconomic policies in the United States It addresses the history of the interests ideas and practices of monetary and fiscal policies in the United States [Agriculture and Economic Development in Europe Since 1870](#)

Pedro Lains, Vicente Pinilla, 2008-09-11 This book adopts a revisionist perspective on the European economy addressing the lack of coherent study of the agricultural sector and reassessing old theories about the links between agricultural and economic development

Pricing Theory, Financing of International Organisations and Monetary History Lawrence H. Officer, 2014-04-08 This book presents the lifelong and ongoing research of Lawrence H Officer in a systematic way The result is an authoritative treatment of such issues as market structure and economic efficiency where more than one characteristic of a commodity is priced both in general and in application to shipping conferences financing of the United Nations and International Monetary Fund monetary history of the UK and US and central bank preferences between gold and dollars The book first examines multidimensional pricing defined as pricing when a commodity or service has several characteristics that are priced The second part is concerned with country group conflicts in the United Nations and International Monetary Fund The book then takes a fresh look at historical experiences of monetary standard upheavals and the final part considers a crucial time 1958-67 during which central bank gold dollar decisions were power politically determined

Privatization and Transition in Russia in the Early 1990s Carol Scott Leonard, David Pitt-Watson, 2013-06-19 Few economic events have caused such controversy as the privatization process in Russia Some see it as the foundation of political and economic freedom For others it was economics gone wrong and ended in Russians stealing money from their own country As Russia reasserts itself and its new brand of capitalism it is ever more important that policy makers and scholars understand the roots of the economic structure and governance of that country what was decided who made the decisions and why what actually transpired and what implications this has for the future of Russia This work written by two senior advisors to the Russian government has unique access to documentation tracking the decision making process in the Russian Mass Privatization process By close reference to events and

supplemented by interviews with many of the key participants it shows that the policies adopted were often influenced and shaped by different forces than those cited by current popular accounts The book challenges the interpretation of Russian privatization by some of the West's most eminent economists It underlines that economists of all schools who bring assumptions from the West to the analysis of Russia may reach false or misleading conclusions It is an essential guide for anyone interested in Russian economic reform and anyone who seeks to understand this enigmatic country and its actions today

An Economic History of the American Steel Industry Robert P. Rogers, 2009-03-30 This book provides a basic outline of the history of the American steel industry a sector of the economy that has been an important part of the industrial system The book starts with the 1830s when the American iron and steel industry resembled the traditional iron producing sector that had existed in the old world for centuries and it ends in 2001 The product of this industry steel is an alloy of iron and carbon that has become the most used metal in the world The very size of the steel industry and its position in the modern economy give it an unusual relevance to the economic social and political system

Famines in European Economic History Declan Curran, Lubomyr Luciuk, Andrew G. Newby, 2015-04-24 This volume explores economic social and political dimensions of three catastrophic famines which struck mid nineteenth and early twentieth century Europe the Irish Famine An Gorta Mór of 1845-1850 the Finnish Famine Suuret Nälkävuodet of the 1860s and the Ukrainian Famine Holodomor of 1932-1933 In addition to providing new insights into these events on international national and regional scales this volume contributes to an increased comparative historiography in historical famine studies The parallel studies presented in this book challenge and enhance established understandings of famine tragedies including famine causation and culpability social and regional famine vulnerabilities core periphery relationships between nations and regions degrees of national autonomy and self sufficiency as well as famine memory and identity Famines in European Economic History advocates that the impact and long term consequences of famine for a nation should be understood in the context of evolving geopolitical relations that extend beyond its borders Furthermore regional structures within a nation can lead to unevenness in both the severity of the immediate famine crisis and the post famine recovery This book will be of interest to those in the fields of economic history European history and economic geography

Russian and Western Economic Thought Vladimir Avtonomov, Harald Hagemann, 2022-10-03 This book examines the interrelations between Russian and European economics from the early 19th century to the present It analyzes how Western economic thinking such as classical economics and the marginal revolution influenced Russian economic thinking and how Western economic ideas were modified and adapted to better reflect the specific Russian circumstances of the time Moreover the contributions in this book show how these modified ideas also influenced Western economists at the end of the 19th century when Russian economics had reached the stage of professionalism and joined the international discourse on the discipline Written by an international selection of respected experts this book provides an overview of the most influential Russian economists and covers a wide range of topics such as

the marginal revolution the specific influence of Marxism the evolution of mathematics and statistics in Russia in the 1890s 1920s and the unique experience of building a planned economy in the Soviet Union It is intended for all scholars and students who are interested in the history of economic thought The Political Economy of Disaster Mats Lundahl,2013 Haiti one of the least developed and most vulnerable nations in the Western Hemisphere made the international headlines in January 2010 when an earthquake destroyed the capital Port au Prince More than a year later little reconstruction has taken place in spite of a strong international funding commitment Mats Lundahl has written several seminal works on Haiti and this volume brings together the best of his past work on Haiti s economic and political history along with a comprehensive introduction and two new chapters which bring the story right up to the present day Together the volume provides both historical background and explanation as to why Haiti was so badly affected by the earthquake and to why reconstruction efforts have been ineffective this far Lundahl argues that the two main causes can found in the interaction between the growth of the population and the destruction of the arable soil on the one hand and in the creation of a predatory state during the nineteenth century which still exists to this day This book provides a comprehensive analysis which charts these themes from the time of the arrival of Columbus in the island in 1492 to the present day The book also deals with contemporary market and policy failures as well as the crucial recent elections and considers the path ahead for this impoverished nation This book will be of huge relevance and interest not only to students and researchers in economic history but also for all those working on development economics development studies and American and Caribbean Studies more generally Central Banking in a Democracy John H. Wood,2014-10-17 The Federal Reserve System which has been Congress s agent for the control of money since 1913 has a mixed reputation Its errors have been huge It was the principal cause of the Great Depression of the 1930s and the inflation of the 1970s and participated in the massive bailouts of financial institutions at taxpayers expense during the recent Great Recession This book is a study of the causes of the Fed s errors with lessons for an improved monetary authority beginning with an examination of the history of central banks in which it is found that their performance depended on their incentives as is to be expected of economic agents An implication of these findings is that the Fed s failings must be traced to its institutional independence particularly of the public welfare Consequently its policies have been dictated by special interests financial institutions who desire public support without meaningful regulation as well as presidents and those portions of Congress desiring growing government financed by inflation Monetary stability which used to be thought the primary purpose of central banks requires responsibility meaning punishment for failure instead of a remote and irresponsible to the public agency such as the Fed It requires either private money motivated by profit or Congress disciplined by the electoral system as before 1913 Change involving the least disturbance to the system suggests the latter **Labour-Intensive Industrialization in Global History** Gareth Austin,Kaoru Sugihara,2013-09-13 The prevailing view of industrialization has focussed on technology capital

entrepreneurship and the institutions that enabled them to be deployed Labour was often equated with other factors of production and assigned a relatively passive role Yet it was labour absorption and the improvement of the quality of labour over the course of several centuries that underscored the timing pace and quality of global industrialization While science and technology developed in the West and whereas the use of fossil fuels especially coal and oil were vital to this process the more recent history has been underpinned by the development of comparatively resource and energy saving technology without which the diffusion of industrialization would not have been possible The labour intensive resource saving path which emerged in East Asia under the influence of Western technology and institutions and is diffusing across the world suggests the most realistic route humans could take for a further diffusion of industrialization which might respond to the rising expectations of living standards without catastrophic environmental degradation

Nationalism and Economic Development in Modern Eurasia Carl Mosk, 2013-02-15 This book advances a new theory of why nationalism emerged in the modern world In particular it explains why nationalism and economic development are closely linked and why warfare plays a crucial role in the spread of the nation state system It is based on qualitative and quantitative evidence over the period 1600 to 2000 for seven countries Great Britain France Germany Yugoslavia the United States Japan and China
