Reworking Modernity Capitalisms And Symbolic Discontent:

Reworking Modernity Allan Pred, Michael Watts, 1992 Using both grand conceptualizations and grounded case studies Allan Pred and Michael Watts look at how people cope with and give meaning to capitalism and modernity in different times and places As capital accumulation has grown and taken new forms it has affected technology and labor relations which in turn have affected people's daily lives These changes have not always been either welcome or easy Pred and Watts focus on the symbolic discontent and cultural confrontations that accompany capitalism They depict people struggling over the meaning of change in their lives and over new relations of power Modernity is experienced differently in different times and places To illustrate this point Pred and Watts offer four case studies that range across time and space These studies remind us that there are multiple capitalisms and multiple reactions to capitalisms Watts begins with a study of a Muslim millenarian movement that arose alongside the Nigerian oil boom of the 1970s When a Muslim prophet and disenfranchised followers tried to create a distinctive community and identity they came into brutal conflict with state authorities Thousands died in the resulting oppression Watts's next case is less bloody at least in the short run He tells us what happened when technological change was introduced in rice production in West African peasant society Peasants were drawn into the world economy as contract farmers This changed work relations and affected everyday life in peasant households Families began to fight over who would work and under what conditions They struggled over gender identity and property rights We move back in time and across space for their third case study Pred discusses changes in the daily life of the Stockholm working class at the end of the nineteenth century He writes of the various forms their discontent took as they struggled with economic restructuring Even conflict over street names took on special meaning For the last case Pred takes us to a steel mill in California When a South Korean company became half owner of the mill there was money for modernization and the threat of layoffs was reduced But the workers remained unhappy They protested low wages unsafe conditions and unfair recruitment practices Their labor issues turned into issues of nationalism morality and identity All four case studies demonstrate the shock of modernity and how the resulting struggles affect daily life Delimiting Modernities Sven Trakulhun, Ralph Weber, 2015-02-12 This collection seeks to contribute to the many long standing discussions on modernity but also and more specifically to the more recent debates over trends to pluralize modernity These debates are current in many different academic disciplines such as sociology anthropology literature and postcolonial studies Hitherto most engagements with modernity in the plural have remained conspicuously confined to one or other intra disciplinary notion of modernities such as that of Shmuel Eisenstadt's multiple modernities which has triggered a host of conference papers and publications largely within sociology all the while it seems that the literatures for instance of multiple modernities and alternative modernities are each distinguished by the fact that one ignores the other It is the principal aim of this edited volume to subject these disciplinary discussions to a more encompassing view assembling contributions from different

scholars who not only work in different disciplines and regional settings but who also engage with their research topics in a variety of approaches and at different levels of analysis The volume thus transcends the sometimes narrow boundaries of the debates over modernities within the established academic disciplines and seeks to turn the unavoidable friction brought about by this interdisciplinary setting into most original and insightful scholarship

Remaking Modernity Julia Adams, Elisabeth S. Clemens, Ann Shola Orloff, 2005-02 A sociology collection reviewing the state of historical study in a wide range of areas while showcasing the use of poststructuralist approaches to studying family gender war protest revolution state making social provisions colonialism trans

Modernity David Punter, 2017-09-16 This exciting volume in the Transitions series explores both history and contemporary ideas pushing forward the boundaries of what we understand by modernity This book is distinguished from its competitors by its clear focus on close readings of commonly studied texts and a strict policy on writing for an undergraduate readership

The State Must Be Our Master of Fire Dennis Galvan, 2004-06-17 Over several centuries the Serer of the Siin region of Senegal developed a complex system of land tenure that resulted in a stable rural society productive agriculture and a well managed ecosystem Dennis Galvan tells the story of what happened when French colonial rulers and later the government of the newly independent Senegal imposed new systems of land tenure and cultivation on the Serer of Siin Galvan's book is a painstaking and skillful autopsy of ruinous Western style rational economic development policy forced upon a fragile yet self sustaining society It is also a disquieting demonstration of the general folly of such an approach and an attempt to articulate a better more sensitive and ultimately more productive model for change a model Galvan calls institutional syncretism

Routledge Handbook of Political Corruption Paul Heywood, 2014-12-17 Since the early 1990s a series of major scandals in both the financial and most especially the political world has resulted in close attention being paid to the issue of corruption and its links to political legitimacy and stability Indeed in many countries in both the developed as well as the developing world corruption seems to have become almost an obsession Concern about corruption has become a powerful policy narrative the explanation of last resort for a whole range of failures and disappointments in the fields of politics economics and culture In the more established democracies worries about corruption have become enmeshed in a wider debate about trust in the political class Corruption remains as widespread today possibly even more so as it was when concerted international attention started being devoted to the issue following the end of the Cold War This Handbook provides a showcase of the most innovative and exciting research being conducted in Europe and North America in the field of political corruption as well as providing a new point of reference for all who are interested in the topic The Handbook is structured around four core themes in the study of corruption in the contemporary world understanding and defining the nature of corruption identifying its causes measuring its extent and analysing its consequences Each of these themes is addressed from various perspectives in the first four sections of the Handbook whilst the fifth section explores new directions that are emerging in corruption research The

contributors are experts in their field working across a range of different social science perspectives **Teaching**

Geography 11-18: A Conceptual Approach Lambert, David, Morgan, John, 2010-01-01 This book provides a practical guide for students and practising teachers as to how concepts can form the basis of geography teaching This is particularly important at this time as the revised national curriculum for Geography which takes effect from September 2008 has greatly reduced the prescribed content to be covered and instead emphasises that geography is underpinned by a small number of key concepts that provide the building blocks for curriculum planning The new national curriculum for geography identifies 7 concepts Place Space Scale Interdependence Physical and human processes Environmental interaction and sustainable development and Cultural understanding and diversity and these areas are reflected in the book's table of contents This focus on concepts represents a significant shift in how geography is to be taught in schools yet there has been little extended discussion of what a concept led approach to teaching and learning would entail This book will provide geography teachers with a theoretically robust and practical approach to curriculum planning based on the concepts that underpin the subject

Frontiers of Development in the Amazon Antonio Augusto Rossotto Ioris, Rafael R. Ioris, Sergei V. Shubin, 2020-06-22 Frontiers of Development in the Amazon Riches Risks and Resistances contributes to ongoing debates on the processes of change in the Amazon a region inherently tied to the expansion of internal and external socio economic and environmental frontiers This book offers interdisciplinary analyses from a range of scholars in Europe Latin America and the United States that question the methods of development and the range of socio ecological impacts of those methods by examining the theoretical methodological and empirical dimensions of frontier making along with evaluating and refining existing frameworks Contributors focus on the complex politics of border formation shaped by institutional economic and political forces placing them in relation to ethical imaginary and symbolic elements In doing so contributors explore the dynamic production of identities values and subjectivities covering matters of migratory patterns complex power struggles and intensive at times violent clashes Among other topics this book assesses the recent encroachment of export driven agribusiness into the Amazon Region in the context of recolonization resource exploitation and multiple programs of modernization and national integration Scholars of Latin American studies international development environmental studies and applied social sciences will find this book particularly useful **Discipline and the Other Body** Steven
