

A group of people are walking away from the viewer on a wide, light-colored path that stretches into the distance. The path is flanked by dry, scrubby vegetation. In the background, there are rolling hills and a bright sunset or sunrise sky with scattered clouds. Long shadows are cast on the path. The title 'THE SECOND MILE' is overlaid in a large, white, serif font, with 'THE' and 'MILE' on separate lines above 'SECOND'.

Access to the Internet is an increasing problem in many areas of the world As the popularity and usefulness of the Internet increases on a daily basis lack of access to the technology is putting many groups at a disadvantage in terms of better education better jobs and even in terms of higher levels of civic participation However creating a network infrastructure to serve outlying communities and sectors of the population is not straight forward This book brings together all the aspects of the problem technical regulatory and economic into one volume to provide a comprehensive resource It describes the latest technological advances that allow cost effective network infrastructures to be built and places them in the context of the applications and services that the infrastructure will deliver A section on business models and case studies from North American and Europe demonstrate that the solutions are economically and practically viable This book is essential for anyone looking to gain an understanding of the issues and technology surrounding the access debate It will be of particular relevance to network engineers designers planners at the incumbent operator companies charged with delivering broadband access to as yet unconnected regions Governments and regulatory bodies will also find this a useful guide to the problems that they may face Wounded Lions Ronald A.
