Schmitter,Wolfgang Streeck,19?? *Convergence* Weltbank,2013 In the most general sense convergence is the integration of any traditionally segmented areas of communications systems Convergence is happening today in Egypt and is driven by the growth of digital media and packet data communication In specific terms it is essential that the Government of Egypt should create the environment in which convergence can occur without impediment This will allow increased and risk reduced investment in the ICTs sector positively influence employment and industry growth and enable Egypt to establish itself as a hub for content and services for the Arab world Indirect impacts such as the effect on employment in the ICT sector and in the upstream content industry are more difficult to quantify without a detailed analysis of these individual industries in Egypt However the evidence from other countries indicates that these sectors could be significant in terms of the contribution to the economic output of the country and employment Finally we also considered the overall impact of the sector on economic growth in Egypt It is not possible to isolate the specific impact of convergence on economic growth However to the extent that convergence leads to increased investment and use of ICT international evidence indicates that there would be a positive impact on long run rates of economic growth The Convergence: Emily Rose Laochua,2018-12-23 The final chapter to The Convergence graphic novel series
