### Abstract

*This study aims to measure the influence of investment in key sectors, namely Agriculture & Allied, Industry, and Services, on Bihar's economic growth. To achieve this, we employ the decomposition methodology introduced by Jalava and Pohjola (2002) by formulating a set of structural relationships and establishing interconnections between the growth of these sectors and the role of investment. Firstly, we examine the stationarity of the variables in these structural relationships using the Augmented Dickey-Fuller test. Next, we estimate the structural relations through Ordinary Least Square (OLS) analysis to investigate the specific contribution of investment in the Agriculture & Allied sector to the overall economic growth rate. Finally, we explore alternate simulation scenarios that support the promotion of public sector investment in the Agriculture & Allied sector. Through this comprehensive analysis, we aim to provide valuable insights into the importance of investing in this sector for Bihar's sustainable economic development.*

## 1. Introduction

### 1.1. Unleashing Bihar's Economic Growth Potential: Exploring the Role of Investment in Key Sectors

Investment plays a pivotal role in driving economic growth by bolstering productive capacity, creating job opportunities, fostering technological innovations, and contributing to government tax revenue. In India, strategic policy initiatives, such as government-led investments in core sectors during the early Five-Year Plans and the nationalization of banks in 1969, have facilitated an impressive saving-investment profile compared to countries with similar per capita income. Additionally, the opening up of the Indian economy to Foreign Direct Investment has further strengthened this trajectory.

India's investment rate, exceeding 36% of GDP, has propelled a remarkable growth rate of 8.2% during the 11th plan. Even higher growth rates are anticipated in the future, with investment rates of 38.4% and 41.4% outlined in the Approach Paper to the 12th plan. Bihar, a state that historically lagged behind in socio-economic indicators until the tenth plan, managed to surpass national growth rates during the 11th plan. The state aims to continue this trend in subsequent plans to bridge the existing gap. Conducting a meticulous analysis of investment's impact on major sectors, namely Agriculture & Allied, Industries, and Services, can prove instrumental in achieving optimal returns on investment.

The structural transformation of the Indian economy, under different policy regimes, has led to uneven growth patterns and

variations in sectoral composition, ultimately influencing economic growth. Post-independence, policymakers made conscious efforts to boost the agricultural sector through initiatives like the green revolution and advancements in cultivation practices. During the liberalization era, the structural transformation shifted from the primary sector to the secondary/tertiary sector, albeit at a comparatively slower pace than previous substitution regimes. Following economic reforms, the roles of the agriculture and service sectors became more interchangeable. Presently, both the Indian and Bihar economies derive a substantial portion of their contributions from the service sector, followed by industry and agriculture, respectively. Monitoring and controlling the sectoral contributions will be crucial, as technology and sector integration play vital roles in driving economic growth. However, the analysis of investment's contribution to economic growth in various sectors does not suggest an optimal path.

Previous studies, such as Mazumdar and Mallick, identified investment growth asymmetry and the dominant role of the industry sector in private investment in India [1, 2]. However, these studies lacked a comprehensive examination of the investment contributions and growth dynamics across major sectors. A similar analysis is missing for Bihar, leaving the state without a justified investment pattern.

This paper aims to fill that gap by measuring the linkages and investment contributions of Bihar's major sectors, including Agriculture & Allied (comprising agriculture, animal husbandry, forestry, and fisheries), Industry (encompassing mining, quarrying,

Indian agriculture has been diversifying from cereals to high value crops and livestock products in accordance with the changing consumption patterns. As such it faces the challenges of a new economic regime besides the usual problems of rising population, unemployment and poverty, declining investments in the agriculture sector and degradation of natural resources. These issues are discussed in the book in light of the significant transformation in the economic structure of the Indian economy from agriculture to non agriculture industry and services and changing cropping pattern from cereals to non cereals in accordance with the changing consumption pattern. The book would be of interest to teachers, researchers, policymakers, students and general readers having an interest in agricultural development in India.

**Current Issues in the Economy and Finance of India** Aswini Kumar Mishra, Vairam Arunachalam, Debasis Patnaik, 2018-09-13. This proceedings volume highlights important points of achieving a balanced and sustained growth path from diverse economics and finance perspectives touching on a wide array of economic and social analyses in India. Featuring contributions presented at the 2018 International Conference on Economics and Finance (ICEF 2018) held at the Birla Institute of Technology and Science, Pilani, Goa, India, the enclosed papers explore topics such as inflation dynamics, information transmission in post recession era, leverage effect and volatility asymmetry, structural change and economic growth and reforming tax systems among others. The Indian economy today is remarkable and not surprisingly it is growing very rapidly. It has emerged as the fastest growing major economy in the world as per the Central Statistical Organization (CSO) and International Monetary Fund (IMF) and it is expected to be one of the top three economic powers of the world over the next 10 to 15 years backed by its strong democracy and partnership. At the backdrop of impressive progress of the Indian economy during the last two decades, the question that remains to be answered is: does India still have a long way to go before it is functioning well as a market economy? This book critically examines the performance of the Indian economy at the national, state and sectorial levels. Featuring contributions from leading academicians, scholars and practitioners from Asia and the rest of the world, this book is an asset to students, professors, scholars, practitioners and policy makers in the areas of India economics, finance and sustainable development.
