LoPucki, Elizabeth Warren, 2000 The systems approach we employ in this book looks at more than just law Law is one of many elements that together constitute the secured credit system To teach the law without teaching the system in which it is embedded would deprive the law of much of its meaning and make it more difficult to understand Lynn LoPucki and Elizabeth Warren Fully incorporating the new Article 9 of the UCC this substantially revised edition of the groundbreaking text continues to simplify the conceptually complex policies of the secured credit system with an innovative systems approach By exploring secured transactions and investment securities in a series of assignments and problems students are empowered to focus on secured transactions as one aspect of a larger system thus facilitating learning and comprehension of the material What makes this casebook stand out from the rest Expert authorship renowned authors Lynn LoPucki and Elizabeth Warren draw on their years of legal scholarship and teaching excellence to refine and extend their systems approach Uses the author's unique and innovative systems approach treating secured credit as a system with subsystems that work together to accomplish the system's principal goal A combination of traditional application and open ended theoretical problems are presented in the order of difficulty with the most difficult problems focusing on an actual practice setting to enhance student learning Each assignment is appropriate for a 50 60 minute class contains carefully selected problems that involve students in case strategy and planning and includes all the information needed to answer the problems New To The Third Edition Incorporates the new Article 9 Secured Transactions of the UCC throughout the entire text Updated cases and problems reflect recent legal trends and developments A thoroughly revised Teacher's Manual in every chapter      **Secured Credit in Europe** Teemu Juutilainen, 2018-03-22 Winner of the 2016 2018 KG Idman Prize This monograph seeks the optimal way to promote compatibility between systems of proprietary security rights in Europe focusing on security rights over tangible movables and receivables Based on comparative research it proposes how best to tackle cross border problems impeding trade and finance notably uncertainty of enforceability and unexpected loss of security rights It offers an extensive analysis of the academic literature of more recent years that has appeared in English German the Scandinavian languages and Finnish The author organises the concrete means of promoting compatibility into a centralised substantive approach a centralised conflicts approach a local conflicts approach and a local substantive approach The centralised approaches develop EU law and the local approaches Member State laws The substantive approaches unify

international commercial law corporate law or comparative secured transactions and practitioners involved in international commercial transactions      *Secured Credit and the Harmonisation of Law* Gerard McCormack, 2011-01-01 This book will be of great interest to practitioners policymakers and academics as well as students particularly postgraduate students of law and business throughout the world      *An Empirical Study of Residential Developer Bankruptcies in the United States 2007-2008* Pei Yee Woo, 2010 With falling home prices and home foreclosures currently acknowledged as a severe problem in the U S more attention needs to be paid to the contributing phenomenon of residential developers undergoing liquidation which has left behind a trail of partially completed or abandoned properties This dissertation presents the results of an empirical investigation aimed at understanding this phenomenon Specifically we addressed the following research questions How have the Chapter 11 bankruptcy cases of residential developers and home builders during this downturn been resolved How did the actions taken by secured lenders in the course of bankruptcy proceedings shape the resolution outcome To what extent was bank behavior during these bankruptcies affected and constrained by the banking regulatory framework and culture This dissertation research involves the analysis of more than 200 residential developers that filed Chapter 11 bankruptcy petitions between November 2007 and December 2008 The main finding is that only a small minority of these developers confirmed a reorganization plan The majority of the cases were dismissed or converted to Chapter 7 culminating in foreclosure or liquidation Over 70% of the cases showed at least one instance where a secured lender sought lift stay motions to pursue foreclosure Among such cases orders granting the lift stay motions were granted most of the time Investigating this insistence on quick foreclosure more nuanced views of banks lending functions risk management and their regulatory environment are explored through a study of FDIC data interviews with industry participants and banks comment letters A key finding is that during a recession banks may have a preference for liquidation in bankruptcy because of capital shortfalls and procyclical regulatory pressure to reduce portfolio concentrations particularly in real estate lending This would be inconsistent with theories that secured lenders will choose economically optimal outcomes within a bankruptcy case as they may choose outcomes that are sub optimal within a bankruptcy to maximize an exogenous urgent need for capital

**Columbia Law Review** ,1996      **Where Credit is Due** John Powell, Christy Rogers, 2013-11-21 While much recent attention has been focused on the subprime lending and foreclosure crisis little has been said about its radically disparate impact Drawing upon history as well as insight into the current crisis this book shows that this crisis is not an anomaly especially for people of color nor is it over People of color have been excluded from wealth building opportunities via homeownership continuously throughout United States history from the outright denial of credit and residential racial discrimination to federally sponsored urban renewal programs The subprime lending and foreclosure crisis is predicted to strip a quarter of a trillion dollars in wealth from black and Latino homeowners It has reversed home ownership gains for people of color and has decimated neighborhoods across the United States while impacting local regional national and

international economies The consequences are devastating This collection of essays provides a framework for creating equitable policy and ultimately building more stable communities for all Americans Doing Business 2015 World Bank, 2014-10-24 Twelfth in a series of annual reports comparing business regulation in 189 economies Doing Business 2015 measures regulations affecting 10 areas of everyday business activity Starting a business Dealing with construction permits Getting electricity Registering property Getting credit Protecting minority investors Paying taxes Trading across borders Enforcing contracts Resolving insolvency Labor market regulations This year's report will present data for a second city for the 11 economies with more than 100 million inhabitants These are Bangladesh Brazil China India Indonesia Japan Mexico Nigeria Pakistan the Russian Federation and the United States Three of the 10 topics covered have been expanded with further plans to expand on five additional indicators in next year's report Additionally the Doing Business rankings are now based on the distance to the frontier measure where each economy is evaluated based on how close their business regulations are to the best global practices This provides a more precise view of each economy's performance and its improvement over time The report updates all indicators as of June 1 2014 ranks economies on their overall ease of doing business and analyzes reforms to business regulation identifying which economies are strengthening their business environment the most Doing Business illustrates how reforms in business regulations are being used to analyze economic outcomes for domestic entrepreneurs and for the wider economy It is a flagship product produced in partnership by the World Bank and IFC that garners worldwide attention on regulatory barriers to entrepreneurship More than 60 economies have used the Doing Business indicators to shape reform agendas and monitor improvements on the ground In addition the Doing Business data has generated over 2 000 articles in peer reviewed academic journals since its inception **U.C. Davis Law Review** University of California, Davis. School of Law, 1998 **Secured Transactions Reform and Access to Credit** Frederique Dahan, John Simpson, 2009-01-01 The book is unique It brings together articles on the economics and the law of property rights and combines these with case studies observations of what works and what does not and a checklist of things to watch for This is a very useful book that should appeal to reformers working in the field whether they are governmental officials trying to modernize their economies or economists and lawyers working in developmental agencies There are few other books or publications that bring together the views of experts working in this important albeit somewhat neglected area of financial sector plumbing William P Armstrong Banking and Finance Law Review a well presented collection of interesting papers within which one finds a rich resource of information and perspectives on secured transactions reform from parts of the world which are often overlooked in comparative commercial law scholarship Noel McGrath Journal of Business Law with its insightful analysis interesting empirical studies and knowledgeable team of contributors the book will be illuminating and useful not just for those interested in development but also anyone who has anything to do with granting credit and taking security Dora S Neo Singapore Journal of Legal Studies This is an excellent unique book The material is very well written and

presented in a carefully thought out coherent way It tells us a legal story of our own unique time Any lawyer working in transition economies whether or not directly on reform projects would find it of great interest Even economists should perhaps take a look at it Roger McCormick Law and Financial Markets Review Secured transactions reform also known as collateral or pledge law reform is increasingly seen as an important building block for economic development The commonly held view is that the availability and cost of credit as well as the efficiency of the market for secured credit are directly influenced by the laws affecting secured transactions and their implementation However there is still a lot of confusion about this relatively complex and technical area of the law and its role in promoting access to credit and economic growth The chapters presented here provide for the first time a comprehensive and cutting edge view of the subject from both a legal and economic perspective They start at the macro level of financial systems moving towards the behaviours of lenders commercial banks and micro lenders policy options for government and the mechanisms of collateral law reform By approaching the subject from different angles and experiences the work advocates an inclusive approach to the subject where all stakeholders interests can be taken into account It addresses the question of what role laws and institutions can play to encourage access to credit This book will be of primary interest to those involved in economic development and the interaction between law and economics either for practical reasons for example working on reform or providing advice on investment in transition economies or for research purposes The Journal of Law and Commerce ,1997
