Securities Environmental Cases And Mateirals:

Securities Elizabeth Glass Geltman,1994 **Security and Environmental Sustainability of Multimodal Transport** Michael Bell,Solmaz Haji Hosseinloo,Urszula Kanturska,2010-06-07 Not until the recent attacks on transport systems has transport security become a focus of public concern and academic research Various aspects of transport security have already been analysed under different agendas Some research was focused on the potential risk to the environment resulting from transport in particular from the transport of hazardous or dangerous goods while other research considered critical elements of transport networks or supply chains as vital lifelines in the case of natural disasters Recently new threats stimulated interest in transport security as a stand alone issue placing it at the forefront of political and academic agendas A NATO Advanced Research Workshop held at Imperial College London in January 2009 brought together those with expertise in the above mentioned fields in order to verify the current state of knowledge in the field and identify promising areas for future work The workshop concentrated on maritime and intermodal transport risk management and long term strategic planning rather than on the details of monitoring or detection techniques This collection of papers emanates largely from that workshop While transport systems are widely recognized as terrorist targets complete protection of these systems is economically and practically infeasible The workshop looked at analytical methods to identify critical points in the transport infrastructure and the prioritization of defensive and mitigating measures given the limited resources available Deficiencies in methods for conducting such an assessment were identified and the need for cost effective mitigation measures was emphasized **Environmental Change and Security Project Report** ,2002 *Environment and Security* M. Lowi,B. Shaw,2000-05-16 This book is based on a conference addressing the relationship between the environment and security in the post Cold War world It brings together scholars and practitioners from a variety of different disciplines and perspectives in an effort to both explore the complexities of the relationship between environmental variables and security conditions and re focus the debate within the environmental community The book combines analytical frameworks and case study material with proposals for addressing environmental challenges and enhancing the security and welfare of peoples states and regions

National Security and International Environmental Cooperation in the Arctic – the Case of the Northern Sea Route Willy Østreng,2012-12-06 The basic objective of this report is to place the debate about the future of the Northern Sea Route into the larger picture of Arctic politics and the emerging agenda of the Arctic as a developing region in international society National security and international environmental cooperation are the objects of study employed both separately and in various conceptual combinations to realize this purpose To help me in this I was privileged to draw on the profound expertise of my highly esteemed co authors Professor Franklyn Griffiths at the University of Toronto and Senior Researchers at IMEMO in Moscow Raphael Vartanov Alexei Roginko and Alexander Kolossov To their cooperative spirit friendship and solid contributions to this report am deeply indebted The report is the result of multiple contributions both in terms of

substance and funding extending far beyond the inputs of the team of authors The professional input and thorough work behind the scene done by Liv Astrid Sverdrup Researcher at FNI at an early stage of the project has been invaluable Senior Consultant Kjell Moe at the Norwegian Polar Institute also provided valuable comments and improvements to the biological parts of the Introductory chapter whilst Senior Consultant Ann Skarstad at FNI worked wonders with the language for those of us not having English as our mother tongue Claes Lykke Ragner Deputy head of the NSROP secretariat and Dr Future of the Nuclear Security Environment in 2015 Russian Academy of Sciences,National Academy of Sciences,Policy and Global Affairs,Committee on International Security and Arms Control,Joint Committees on the Future of the Nuclear Security Environment in 2015,2009-02-02 The U S National Academies NAS and the Russian Academy of Sciences RAS building on a foundation of years of interacademy cooperation conducted a joint project to identify U S and Russian views on what the international nuclear security environment will be in 2015 what challenges may arise from that environment and what options the U S and Russia have in partnering to address those challenges The project s discussions were developed and expanded upon during a two day public workshop held at the International Atomic Energy Agency in November 2007 A key aspect of that partnership may be cooperation in third countries where both the U S and Russia can draw on their experiences over the last decade of non proliferation cooperation More broadly the following issues analyzed over the course of this RAS NAS project included safety and security culture materials protection control and accounting MPC A best practices sustainability nuclear forensics public private partnerships and the expansion of nuclear energy **National Security Assessment of the High Performance Explosives and Explosive Components Industries** United States. Office of Strategic Industries and Economic Security. Strategic Analysis Division,2001 Security and Environment in the Mediterranean Hans Günter Brauch,Peter H. Liotta,Antonio Marquina,Paul F. Rogers,Mohammad El-Sayed Selim,2012-12-06 In this volume security specialists peace researchers environmental scholars demographers as well as climate desertification water food and urbanisation specialists from the Middle East and North Africa Europe and North America review security and conflict prevention in the Mediterranean They also analyse NATO s Mediterranean security dialogue and offer conceptualisations on security and perceptions of security challenges as seen in North and South The latter half of the book analyses environmental security and conflicts in the Mediterranean and environmental consequences of World War II the Gulf War the Balkan wars and the Middle East conflict It also examines factors of global environmental change population growth climate change desertification water scarcity food and urbanisation issues as well as natural disasters Furthermore it draws conceptual conclusions for a fourth phase of research on human and environmental security and peace as well as policy conclusions for cooperation and partnership in the Mediterranean in the 21st century Understanding Security Mike Bourne,2013-11-26 This broad ranging new text introduces a wide range of theoretical perspectives with a central focus on their application to understanding key issues in global state and human security in the contemporary world

Deterrence and the New Global Security Environment Ian R. Kenyon, John Simpson, 2013-10-18 This collection of papers rigorously examines the current place of deterrence in international security relations delivering the best of contemporary thinking This is a special issue of the leading journal Contemporary Security Policy It shows how and why nuclear deterrence was the central organizing mechanism for international security relations in the second half of the twentieth century It has been replaced by a new global security environment in which the central role of deterrence both nuclear and otherwise appears to have diminished The Cold War has been succeeded by a new state of play This book will be of interest to students of military and naval history and security studies

Environmental Security and Gender Nicole Detraz, 2014-08-21 Over the past 20 years scholars policymakers and the media have increasingly recognized the links between both traditional and non traditional security issues and the changing condition of the global environment Concepts such as environmental security and resource conflict have been used to hint at these significant linkages While there has been a good deal of scholarly work conducted that seeks to identify the ways that actors link these concepts there has been little examination of the intersection between approaches to environmental security and gender This book explores this intersection to provide an insight into the gendered nature of both global environmental politics and security studies It examines how the issues of security and the environment are linked to theory and practice and the extent to which gender informs these discussions By adopting a feminist environmental security discourse this book provides crucial redefinitions of key concepts and offers new insights into the ways we understand security environment connections Case studies evaluate if and how environment and security discourses are being used to understand a range of environmental issues and how a feminist environmental security discourse contributes to our understanding of security environment connections This multidisciplinary volume draws on literature from the environmental sciences security studies and sociology to highlight the complex human insecurities that often accompany environmental change As conceptualizations of security continue to shift and broaden to include environmental issues and concerns it is imperative that gender informs the debate

Environmental Security in Harbors and Coastal Areas Igor Linkov, Gregory A. Kiker, Richard J. Wenning, 2007-03-31 History has shown how powerful societies decline when natural resources are unable to be replenished This book explores the challenges facing coastal areas during in the near future It emphasizes beliefs that the convergence of seemingly disparate viewpoints and uncertain and limited information is possible only by using available risk assessment methodologies and decision making tools such as multi criteria decision analysis MCDA

Contemporary Security Studies Alan Collins, 2019 With in depth coverage of a wide range of issues from terrorism inter state conflict and nuclear deterrence to environmental security health and organized crime Contemporary Security Studies Fifth Edition is the definitive introduction to security studies Bringing together leading scholars it provides a student friendly guide to critical theoretical approaches and the most important issues that dominate the modern security agenda Throughout the text students are encouraged to question their own preconceptions and to use

their own judgement to critically evaluate key approaches and ideas To help them achieve this each chapter is punctuated with helpful learning features including key ideas think points and case studies which demonstrate the real world applications relevance and implications of the theory The book is supported by online resources designed to help students take their learning further For students Explore relevant security issues in greater depth with additional online case studies Test your understanding of the key ideas and themes in each chapter with self marking multiple choice questions Expand your knowledge of the subject with web links to additional reliable sources For registered lecturers Use the adaptable PowerPoint slides as the basis for lecture presentations or as hand outs in class

Energy, Governance and Security in Thailand and Myanmar (Burma) Adam Simpson,2016-04-29

Across the world states are seeking out new and secure supplies of energy but this search is manifesting itself most visibly in Asia where rapid industrialisation in states such as China and India is fomenting a frantic scramble for energy resources Due to entrenched societal inequities and widespread authoritarian governance however the pursuit of national energy security through transnational energy projects has resulted in devastating impacts on the human and environmental security of local populations These effects are particularly evident in both Thailand and Myanmar Burma which located at the crossroads of Asia are increasingly engaged in the cross border energy trade Based on extensive fieldwork and theoretical analysis this ground breaking book proposes a new critical approach to energy and environmental security and explores the important role that both local and transnational environmental movements are playing in the absence of effective and democratic governments in providing activist environmental governance for energy projects throughout the region By comparing the nature of this activism under two very different political regimes it delivers crucial theoretical insights with both academic and policy implications for the sustainable and equitable development of the South s natural resources

New Challenges in Energy Security C. Mitchell,J. Watson,J. Whiting,2013-08-29 Researchers and practitioners explore the effect of evolving global economic and political powers on energy security within the UK and puts forward practical options for moving towards a more energy secure system over both the short and long terms

Law Books in Print: Author index Nicholas Triffin,1997 *Balkan Yearbook of European and International Law 2023* Enis Omerović,Ivana Kunda,Zlatan Meškić,Dušan V. Popović,2024-11-21 The fifth volume of the Balkan Yearbook of European and International Law BYEIL discusses diverse and actual legal topics of international and comparative dimensions and angles The BYEIL 2023 focuses on the special topic of Human Rights at Multiple Levels and contributes to the extensively researched field characterised by emerging trends with the authors providing a deeper and more concise understanding of human rights related issues Discussions surrounding indivisibility interdependence universalism versus cultural relativism inevitably led to exploring human rights at various levels The two permanent sections on European Law and International Law deal with recent developments in these highly dynamic and developing areas They serve as a forum for scholarly discourse on these topics from the South East European perspective
