Regulating Investor Protection under EU Law Antonio Marcacci, 2018-06-27 This book analyzes the legal system for the protection of retail investors under the European Union law of investment services It identifies the regulatory leitmotiv driving the EU lawmaker and ascertains whether and to what extent such a system is self sufficient using a set of EU made

and EU enforced rules that is essentially different and autonomous from the domestic legal orders In this regard the book takes a double perspective comparative and intra firm Given the federal dimension of the US legal system and thus the role model it plays vis vis the EU the book compares the two systems To fully highlight the existing gaps and measure how self sufficient the EU system is against its American counterpart the Union Federal level as such is analyzed i e detached from the national in EU terms and State in US terms level Regulating Investor Protection under EU Law also showcases the unique intra firm perspective from a European investment firm and analyzes how EU produced public law rules become a set of compliance requirements for investment services providers This within the firm angle gauges the self sufficiency of the EU system of retail investor protection from the standpoint of an EU regulated entity The book is intended for both compliance professionals and academic scholars interested in this topic while also including illustrative sections intended to provide a broader regulatory view for less experienced readers Going Public in the USA and the Valuation of IPOs Marco
