Three dominant forces worldwide are driving change today in our financial markets competition technology and regulation But their collective impact in reshaping the markets though they may be viewed individually as desirable or well intentioned is producing challenging results that are difficult to predict hard to control and not easy to understand Extreme market turbulence has underlined the key issues as much attention turns to the appropriate regulatory response That is the backdrop for this thought provoking book emerging from a Baruch College Conference on equity market structure in the aftermath of the global financial crisis and featuring contributions from an acclaimed panel of international scholars policymakers regulators and industry leaders The result presents emerging perspective and ideas that illuminate the dynamics of financial regulation today and into the future The Zicklin School of Business Financial Markets Series presents the insights emerging from a sequence of conferences hosted by the Zicklin School at Baruch College for industry professionals regulators and scholars Much more than historical documents the transcripts from the conferences are edited for clarity perspective and context material and comments from subsequent interviews with the panelists and speakers are integrated for a complete thematic presentation Each book is focused on a well delineated topic but all deliver broader insights into the quality and efficiency of the U S equity markets and the dynamic forces changing them **NAFTA &**

International Law Christopher Peter Michael Waters, 2006 British and Canadian Perspectives on International Law examines the impact of public international law on the United Kingdom's and Canada's domestic legal systems. It also analyses the contributions of British and Canadian practice to the development of international norms. Topics addressed include international criminal law, international humanitarian law, human rights and human security, asylum, trade, jurisdiction, reception law, and media portrayals of international law. Whereas international law scholarship usually takes a global, regional, or national approach, this book's chapters are written by leading scholars and practitioners from both countries and provide unique comparative views. While there remains much in common between the two states' understandings of international law, recent developments have shown significant points of departure.

About Canada: Corporate Crime Lauren Snider, 2015-04-01T00:00:00Z When corporations misbehave, the consequences are devastating. The monetary costs of the 2008 financial crisis, a direct result of financial mismanagement, were in the trillions, and yet none of those responsible were held to account. The monetary costs of Criminal Code theft pale in comparison, and yet our prisons are filled with people who commit street theft. In order to understand why governments, regulators, unions, activists, and community groups have such a difficult time preventing and sanctioning corporate criminals, we must first recognize the vital role of corporate economic power. Focusing on crimes against workers, employees, and the environment and financial crimes, *About Canada: Corporate Crime* traces the ways that particular systems of government, from nineteenth-century crony capitalism to neoliberalism and globalized capitalism, develop policies regarding the socially harmful and illegal behaviour of corporations. This book shows why governments are reluctant to pass, enforce, and administer meaningful regulation of corporations, institutions, and actors with the power to put thousands of potential voters out of work. Generate negative commentaries from highly respected experts and produce critical editorials from 80 percent of Canadian media owned and controlled, let us remember by many of these same corporations. Assessing the present state and future prospects of corporate crime, this book asks: How did we get here? What do we know about corporate crime? Why does it matter? and What are the main issues, developments, today? In the end, it asks the most important question of all: How can political and economic systems be changed to prevent or, at the very least, mitigate the tremendous damage corporate activities are inflicting on human lives, health, jobs, communities, and economies.

Global History of Accounting, Financial Reporting and Public Policy Gary J. Previts, Peter Walton, Peter Wolnizer, 2011-07-12 Addresses Global Accounting History, developments focusing upon financial reporting and related institutional aspects of disclosures for accountability and decision-making purposes. This title also addresses five countries of the Americas: Argentina, Brazil, Canada, Mexico, and the United States of America.

Financial Stability and Prudential Regulation Alison Lui, 2016-10-04 Financial stability is one of the key tenets of a central bank s functions Since the financial crisis of 2007 2009 an area of hot debate is the extent to which the central bank should be involved with prudential regulation This book examines the macro and micro prudential regulatory frameworks and systems of the United Kingdom Australia the United States Canada and Germany Drawing on the regulator frameworks of these regions this book examines the central banks roles of crisis management resolution and prudential regulation Alison Lui compares the institutional structure of the new twin peaks model in the UK to the Australian model and the multi regulatory US model and the single regulatory Canadian model The book also discusses the extent the central bank in these countries as well as the ECB are involved with financial stability and argues that the institutional architecture and geographical closeness of the Bank of England and Financial Policy Committee give rise to the fear that the UK central bank may become another single super regulator which may provide the Bank of England with too much power As a multi regional comparative study on the importance and effectiveness of prudential regulation this book will be of great use and interest to students and researchers in finance and bank law economics and banking
