SECURITIZATION, STRUCTURED FINANCE, AND CAPITAL MARKETS. STEVEN L. SCHWARCZ, 2018

Securitization, Structured Finance and Capital Markets Steven L. Schwarcz, Bruce A. Markell, Lissa Lamkin Broome, 2004

This book is now available in paperback *Securitization Structured Finance and Capital Markets* provides an introduction to securitization as a method of financing. It is suitable for an independent course or seminar in securitization and structured finance and may also be used as supplementary reading or as advanced examples in courses in bankruptcy, secured transactions, trusts, corporations, securities regulation, corporate finance, tax, banking, or accounting. The book is organized by substantive legal areas. The first chapter provides an overview of securitization and is a terrific starting point for anyone trying to learn more about this 6 trillion industry where assets as diverse as car loans, credit card debt, student loans, home mortgages, and commercial mortgages are securitized to provide the loan originator with a source of capital at lower cost than might otherwise be available. The first chapter introduces securitization through a detailed discussion of an actual securitization of loans made to purchasers of Hondas. The Honda deal is followed as an example throughout the subsequent chapters, and numerous documents from the deal are reprinted in the book. Students should benefit from the concrete example and the opportunity to examine the actual legal documents used to implement this type of financing transaction. Subsequent chapters of the book examine Article 9 of the UCC, the Bankruptcy Code, accounting issues, tax, and other considerations, securities laws, and the Investment Company Act. There is a separate chapter focused on special concerns of banks securitizing loans, a chapter on international and cross border issues in securitization, and a concluding chapter exploring the academic debate relating to the efficiency of securitization. Each chapter of the book contains discussion questions, and these questions are thoroughly addressed in the Teacher's Manual, available only to professors.

True Sale Securitization in Germany and China Shengzhe Wang, 2005-05-02. Inhaltsangabe Abstract. The Master thesis for LL.M. at Goethe University's ILF titled *True Sale Securitization in Germany and China* is a comparative study about true sale securitization. The initial reason for a comparative study was the similarity of banking centred financial systems in these two countries. Another reason is connected with the True Sale Initiative (TSI), a plan composed by major German banks aiming at improving their financial situation. German banks start to be plagued by the non performing loans (NPLs) since 2001 due to mediocre performance of German corporations and depreciation of banks' investment to the east part during 1990s. Facing the competitions from other countries and under pressures from the International Convergence of Capital Measurement and Capital Standards (a Revised Framework Basel II) issued by the Basel Committee on Banking and

Supervisory Practice Basel Committee at the Bank for International Settlements the German banks employed the TSI as one part of the bigger financial reform to regain competition in Europe and worldwide December 2004 the first true sale securitization was successfully constructed in Germany after German federal government changed some of its formerly unfriendly legal taxation and accounting rules The German experiences with TSI can shed some light into how China to develop its asset backed securities ABS market in order to save its heavy NPLs burdened banks and find alternative funds for its corporations Although securitization might be a possible solution the Chinese current legal system and market infrastructure prevents it from fully utilizing this modern financing technique What China can learn from Germany's experiences is that a special securitization law is preferred to amending each relevant laws and rules in order to get rid of legal barriers and contradictions for true sale securitizations In addition strong governmental supports will facilitate and accelerate the process of true sale securitization market development The similarities between the German and Chinese financial system is the main incentive for this study Both Germany and China have a financial system that is dominated by banks and at the same time features a weak capital market Banks are the main external financing sources for domestic corporations Furthermore in both countries banks are suffering losses and carrying burden of non performing loans NPLs due to the bad

Systemic Risk, Institutional Design, and the Regulation of Financial Markets Anita Anand,2016-12-22 Following the recent financial crisis regulators have been preoccupied with the concept of systemic risk in financial markets believing that such risk could cause the markets that they oversee to implode At the same time they have demonstrated a certain inability to develop and implement comprehensive policies to address systemic risk This inability is due not only to the indeterminacy inherent in the term systemic risk but also to existing institutional structures which because of their existing legal mandates ultimately make it difficult to monitor and regulate systemic risk across an entire economic system Bringing together leading figures in the field of financial regulation this collection of essays explores the related concepts of systemic risk and institutional design of financial markets responding to a number of questions In terms of systemic risk what precisely is the problem and what can be done about it How should systemic risk be regulated What should be the role of the central bank banking authorities and securities regulators Should countries implement a macroprudential regulator If not how is macroprudential regulation to be addressed within their respective legislative schemes What policy mechanisms can be employed when developing regulation relating to financial markets A significant and timely examination of one of the most intractable challenges posed to financial regulation **Core Concepts of Commercial Law** John F. Dolan,Bruce A. Markell,Lawrence Ponoroff,2004 This book reflects the authors belief that to teach only the rules would give students a false sense and static understanding of what commercial law is all about and what makes it exciting This book is also an effective platform for a more detailed approach to the rules of commercial law Problems could be easily supplemented text to provide students with a more technical understanding of these rules The authors emphasize some of the rules because those rules help students understand the basic concepts Most of the study deals with the UCC specifically Articles 9 3 4 and 5
