Securitization Of Credit Inside The New Technology Of Finance:

Securitization of Credit James A. Rosenthal, Juan M. Ocampo, 1991-01-16 The first guide to this new financial trend Credit securitization also known as asset securitization is a financial technology for packaging underwriting and selling loans in the form of securities First used in packaging mortgage loans as in the case of GNMA and other federally insured mortgage backed securities credit securitization has grown rapidly and spread to other forms of credit including auto loans student loans credit card balances and so on This book provides lenders and other financial professionals with clear analyses of many actual credit securitization deals Includes much information unavailable elsewhere **True Sale Securitization in**

Germany and China Shengzhe Wang, 2005-05-02 Inhaltsangabe Abstract The Master thesis for LL M at Goethe university s ILF titled True Sale Securitization in Germany and China is a comparative study about true sale securitization The initial reason for a comparative study was the similarity of banking centred financial systems in these two countries Another reason is connected with the True Sale Initiative TSI a plan composed by major German banks aiming at improving their financial situation German banks start to be plagued by the non performing loans NPLs since 2001 due to mediocre performance of German corporations and depreciation of banks investment to the east part during 1990s Facing the competitions from other countries and under pressures from the International Convergence of Capital Measurement and Capital Standards a Revised Framework Basel II issued by the Basel Committee on Banking and Supervisory Practice Basel Committee at the Bank for International Settlements the German banks employed the TSI as one part of the bigger financial reform to regain competition in Europe and worldwide December 2004 the first true sale securitization was successfully constructed in Germany after German federal government changed some of its formerly unfriendly legal taxation and accounting rules The German experiences with TSI can shed some light into how China to develop its asset backed securities ABS market in order to save its heavy NPLs burdened banks and find alternative funds for its corporations Although securitization might be a possible solution the Chinese current legal system and market infrastructure prevents it from fully utilizing this modern financing technique What China can learn from Germany s experiences is that a special securitization law is preferred to amending each relevant laws and rules in order to get rid of legal barriers and contradictions for true sale securitizations In addition strong governmental supports will facilitate and accelerate the process of true sale securitization market development The similarities between the German and Chinese financial system is the main incentive for this study Both Germany and China have a financial system that is dominated by banks and at the same time features a weak capital market Banks are the main external financing sources for domestic corporations Furthermore in both countries banks are suffering losses and carrying burden of non performing loans NPLs due to the bad **The Law of Securitisations** Pierre de Gioia Carabellese, Camilla Della Giustina, 2023-03-31 The book The Law of Securitisations From Crises to Techno sustainability provides a full and detailed account of the EU legislation in the area of structured finance with the new legal rules dissected

and discussed in their full extent Securitisation transactions have been identified in the literature among the main reasons for the 2007 2008 financial crisis alongside derivative contracts More than a decade later the EU legislature passed in 2017 a legal framework comprehensively disciplining the area of securitisations in the EU On such a background the main purpose of the book is to discuss and analyse in a holistic way both the rationale behind the securitisations as financial transactions and their main players e g originators SPVs and credit rating agencies and their ESG Environmental Social and Governance challenges particularly the recent regulation passed in the EU during the 2020 2021 global pandemic The goal of this legal analysis is to identify and clarify the entire legal process of securitisations as a result of the new EU legislation as well as duties responsibilities and practices incumbent on the main players Furthermore the monograph is also concerned with the new challenges facing financial markets and their regulation the new concept of sustainability and the development of technology In this scenario there is a blend of financial issues new environmental challenges and ultimately the role human beings are expected to play also from a social justice perspective Adopting not just doctrinal methodology but also comparative from a private law perspective and interdisciplinary regulatory and law and economics the authors also include a discussion of the main literature which has blossomed over the last two decades on structured finance transactions particularly the literature that unveiled a decade ago the concept of shadow banking This book will be one of the first to focus on the new EU Securitisation Regulation and will be of interest to academics students and practitioners of financial law

Introduction to Securitization Frank J. Fabozzi, Vinod Kothari, 2008-06-06 Introduction to Securitization outlines the basics of securitization addressing applications for this technology to mortgages collateralized debt obligations future flows credit cards and auto loans The authors present a comprehensive overview of the topic based on the experience they have gathered through years of interaction with practitioners and graduate students around the world The authors offer coverage of such key topics as structuring agency MBS deals and nonagency deals credit enhancements and sizing using interest rate derivatives in securitization transactions asset classes securitized operational risk factors implications for financial markets and applying securitization technology to CDOs Finally in the appendices the authors provide an essential introduction to credit derivatives an explanation of the methodology for the valuation of MBS ABS and the estimation of interest rate risk

Securitization is a financial technique that pools assets together and in effect turns them into a tradable security The end result of a securitization transaction is that a corporation can obtain proceeds by selling assets and not borrowing funds In real life many securitization structures are quite complex and enigmatic for practitioners investors and finance students Typically books detailing this topic are either too lengthy too technical or too superficial in their presentation Introduction to Securitization is the first to offer essential information on this topic at a fundamental yet comprehensive level providing readers with a working understanding of what has become one of today's most important areas of finance Authors Frank Fabozzi and Vinod Kothari internationally recognized experts in the field clearly define securitization contrast it with corporate finance and explain its advantages They carefully illustrate the structuring of asset backed securities ABS transactions including agency mortgage backed securities MBS deals and nonagency deals and show the use of credit enhancements and interest rate derivatives in such transactions They review the collateral classes in ABS such as retail loans credit cards and future flows and discuss ongoing funding vehicles such as asset backed commercial paper conduits and other structured vehicles And they explain the different types of collateralized debt obligations CDOs and structured credit

detailing their structuring and analysis To complement the discussion an introduction to credit derivatives is also provided The authors conclude with a close look at securitization s impact on the financial markets and the economy with a review of the now well documented problems of the securitization of one asset class subprime mortgages While questions about the contribution of securitization have been tainted by the subprime mortgage crisis it remains an important process for corporations municipalities and government entities seeking funding The significance of this financial innovation is that it has been an important form of raising capital for corporations and government entities throughout the world as well as a vehicle for risk management Introduction to Securitization offers practitioners and students a simple and comprehensive entry into the interesting world of securitization and structured credit **Technology in Financial Markets** Marco
